## ACKNOWLEDGMENTS

**Lars B. Johanson** was responsible for the technical supervision and coordination of this volume under the general direction of **Glenn W. King**, Chief, Statistical Compendia Branch. Assisting in the research and analytical phases of assigned sections and in the development aspects of new tables were **Rosemary E. Clark**, **Richard P. Kersey**, **Stacey M. Lowe**, and **Jean F. Maloney**. **Catherine Lavender** provided primary editorial assistance. Other editorial assistance was rendered by **Susan Antroinen**, **Samuel E. Santos**, and **Barbara Shugart**.

Maps were designed and produced by **Connie Beard** and **Jessica Dobrowolski** of the Cartographic Operations Branch within the Geography Division.

**Catherine M. Raymond**, **Patricia Edwards**, **Wanda Cevis**, **Linda Chen**, and **Diane Oliff-Michael** of the Administrative and Customer Services Division, **Walter C. Odom**, Chief, provided publications and printing management, graphics design and composition, and editorial review for print and electronic media. General direction and production management were provided by **James R. Clark**, Assistant Division Chief, and **Susan L. Rappa**, Chief, Publications Services Branch.

The cooperation of many contributors to this volume is gratefully acknowledged. The source note below each table credits the various government and private sector agencies that have collaborated in furnishing the information for the *Statistical Abstract*.

## Preface

---

The *Statistical Abstract of the United States*, published since 1878, is the standard summary of statistics on the social, political, and economic organization of the United States. It is designed to serve as a convenient volume for statistical reference and as a guide to other statistical publications and sources. The latter function is served by the introductory text to each section, the source note appearing below each table, and Appendix I, which comprises the Guide to Sources of Statistics, the Guide to State Statistical Abstracts, and the Guide to Foreign Statistical Abstracts.

This volume includes a selection of data from many statistical sources, both government and private. Publications cited as sources usually contain additional statistical detail and more comprehensive discussions of definitions and concepts. Data not available in publications issued by the contributing agency but obtained from the Internet or unpublished records are identified in the source notes. More information on the subjects covered in the tables so noted may generally be obtained from the source.

Except as indicated, figures are for the United States as presently constituted. Although emphasis in the *Statistical Abstract* is primarily given to national data, many tables present data for regions and individual states and a smaller number for metropolitan areas and cities. Appendix II, Metropolitan and Micropolitan Statistical Areas: Concepts, Components, and Population, presents explanatory text, a complete current listing and population data for metropolitan and micropolitan areas defined as of November 2004. Statistics for the Commonwealth of Puerto Rico and for island areas of the United States are included in many state tables and are supplemented by information in Section 29. Additional information for states, cities, counties, metropolitan areas, and other small units,

as well as more historical data are available in various supplements to the *Abstract* (see inside back cover).

Statistics in this edition are generally for the most recent year or period available by summer 2005. Each year over 1,400 tables and charts are reviewed and evaluated; new tables and charts of current interest are added, continuing series are updated, and less timely data are condensed or eliminated. Text notes and appendices are revised as appropriate.

Several special features such as *USA Statistics in Brief*, *Mini Historical Statistics*, and *State Rankings* can be found on our Web site: <<http://www.census.gov/statab/www/>>.

**Changes in this edition**—In recognition of this being the 125<sup>th</sup> edition of the *Statistical Abstract*, historical tables will be included at the beginning of each section in order to highlight related data when they first appeared in earlier editions. These cover topics such as: the number of alien passengers arriving in the U.S. (1819 to 1870); the number of juvenile delinquents (1890 and 1904); apportionment of congressional representation (1790 to 1900); number of pension claims filed and allowed each year (1861); and imports and exports of merchandise into and out of Alaska (1879 to 1905).

We have introduced 80 new tables in this edition, including several from the American Community Survey. These cover a variety of topics including select family planning and medical services, asthma incidence among children under 18 years of age, public schools with broadband and wireless connections, state trends in identity theft, hazardous waste generated, shipped, and received by state, retail gasoline prices by selected areas, and a profile of second-home buyers. In addition, a number of new tables have been added that contain data from the 2002 Economic Census. For a complete

list of new tables, see Appendix VI, p. 965. Section 10 has a new title (National Security and Veterans Affairs) that reflects its reorganization and 13 new tables on the subject of homeland security.

### **Statistical Abstract on other media—**

The *Abstract* is available on the Internet and on CD-ROM. Both versions contain the same material as the book, except for a few copyrighted tables for which we did not receive permission to release in these formats. Our Internet site <<http://www.census.gov/statab/www>> contains this 2006 edition plus selected earlier editions in Adobe Acrobat .pdf format. The CD-ROM version also includes spreadsheet files for each table and links to the Web sites of each source. Many of the spreadsheet files on the CD-ROM contain more historical and/or detailed data than are found in the book.

### **Statistics for states and metropolitan areas—**

Extensive data for the states and metropolitan areas of the United States can be found in the *State and Metropolitan Area Data Book: 1997–98*. This publication minus some data items, as well as selected rankings of the states and metropolitan areas, is available on our Internet site at <<http://www.census.gov/statab/www/smadb.html>>. The CD-ROM version is also available.

### **Statistics for counties and cities—**

Extensive data for counties can be found in the *County and City Data Book: 2000*. It features 191 data items covering everything from age and agriculture to water use and wholesale trade for all states and counties with U.S. totals for comparison. Also included are 103 data items for cities with population of 25,000 or more. The primary sources are Census 2000 and the 1997 Economic Census. Two tables present 11 data items from Census 2000 for all places and minor civil divisions with a population of 2,500 or more.

This publication, as well as selected rankings, is available on our Internet site at <<http://www.census.gov/statab/www/ccdb.html>>. Some data items that appear in the book from private sources are not

available on the Internet or CD-ROM versions because we did not receive copyright permission to release the data items in these formats. For a database with over 5,000 county items, check out USA Counties at <<http://www.census.gov/statab/www/county.html>>.

### **Statistical Abstract Postcard User Survey—**

Inserted in this edition is the ninth user survey taken periodically to ask for your suggestions on various aspects of the *Abstract*. Your input will help us to maintain the usefulness of the *Abstract*. If the postcard is missing and you would like to participate in the Survey, you may obtain one by writing us at: U.S. Census Bureau, Statistical Compendia Staff, ACSD, Room 1051-4, Washington, DC 20233, or e-mail us at <[ACSD.US.Data@census.gov](mailto:ACSD.US.Data@census.gov)>.

**Limitations of the data—**The contents of this volume were taken from many sources. All data from either censuses and surveys or from administrative records are subject to error arising from a number of factors: Sampling variability (for statistics based on samples), reporting errors in the data for individual units, incomplete coverage, nonresponse, imputations, and processing error. (See also Appendix III, pp. 941.) The Census Bureau cannot accept the responsibility for the accuracy or limitations of the data presented here, other than those for which it collects. The responsibility for selection of the material and for proper presentation, however, rests with the Census Bureau.

### **For additional information on data presented—**

Please consult the source publications available in local libraries or write to the agency indicated in the source notes. Write to the Census Bureau only if it is cited as the source.

**Suggestions and comments—**Users of the Statistical Abstract and its supplements (see inside back cover) are urged to make their data needs known for consideration in planning future editions. Suggestions and comments for improving coverage and presentation of data should be sent to the Director, U.S. Census Bureau, Washington, DC 20233.

**Headnotes** immediately below table titles provide information important for correct interpretation or evaluation of the table as a whole or for a major segment of it.

**Footnotes** below the bottom rule of tables give information relating to specific items or figures within the table.

**Unit indicators** show the *specified quantities* in which data items are presented. They are used for two primary reasons. Sometimes data are not available in absolute form and are estimates (as in the case of many surveys). In other cases we round the numbers in order to save space to show more data, as in the case above.

### EXAMPLES OF UNIT INDICATOR INTERPRETATION FROM TABLE

Year	Item	Unit Indicator	Number shown	Multiplier
2000 . . . . .	Value of seizures . . . . .	\$ Millions . . . . .	1,945	1,000,000

#### To Determine the Figure It Is Necessary to Multiply the Number Shown by the Unit Indicator:

Value of seizures by Border Patrol – 1,945 x \$1,000,000 – \$1,945,000,000 (over \$1.9 billion)

When a table presents data with more than one unit indicator, they are found in the headnotes and column headings (Tables 2 and 29), spanner (Table 40), stub (Table 25), or unit column (Table 127). When the data in a table are shown in the same unit indicator, it is shown in boldface as the first part of the headnote (Table 2). If no unit indicator is shown, data presented are in absolute form (Table 1).

**Vertical rules** are used to separate independent sections of a table (Table 1), or in tables where the stub is continued into one or more additional columns (Table 2).

**Averages**—An average is a single number or value that is often used to represent the “typical value” of a group of numbers. It is regarded as a measure of “location” or “central tendency” of a group of numbers.

The *arithmetic mean* is the type of average used most frequently. It is derived by summing the individual item values of a particular group and dividing the total by the number of items. The arithmetic mean is often referred to as simply the “mean” or “average.”

The *median* of a group of numbers is the middle number or value when each item in the group is arranged according to size (lowest to highest or visa versa); it generally has the same number of items above it as well as below it. If there is an even number of items in the group, the median is taken to be the average of the two middle numbers.

*Per capita* (or per person) quantities—a per capita figure represents an average computed for every person in a specified group (or population). It is derived by taking the total for an item (such as income, taxes, or retail sales) and dividing it by

the number of persons in the specified population.

**Index numbers**—An index number is the measure of difference or change, usually expressed as a percent, relating one quantity (the variable) of a specified kind to another quantity of the same kind. Index numbers are widely used to express changes in prices over periods of time, but may also be used to express differences between related subjects for a single point in time.

To compute a price index, a base year or period is selected. The base year price (of the commodity or service) is then designated as the base or reference price to which the prices for other years or periods are related. Many price indexes use the year 1982 as the base year; in tables this is shown as "1982 = 100." A method of expressing the price relationship is: The price of a set of one or more items for a related year (e.g. 1990) **divided by** the price of the same set of items for the base year (e.g. 1982). The result multiplied by 100 provides the index number. When 100 is subtracted from the index number, the result equals the percent change in price from the base year.

**Average annual percent change**—Unless otherwise stated in the *Abstract* (as in Section 1, Population), average annual percent change is computed by use of a *compound interest formula*. This formula assumes that the rate of change is constant throughout a specified compounding period (1 year for average annual rates of change). The formula is similar to that used to compute the balance of a savings account that receives compound interest. According to this formula, at the end of a compounding period the amount of accrued change (e.g., school enrollment or bank interest) is added to the amount that existed at the beginning of the period. As a result, over time (e.g., with each year or quarter), the same rate of change is applied to a larger and larger figure.

The *exponential formula*, which is based on continuous compounding, is often used to measure population change. It is preferred by population experts, because they view population and population-related subjects as changing without interruption, ever ongoing. Both exponential and compound interest formulas assume a constant rate of change. The former, however, applies the amount of change continuously to the base rather than at the end of each compounding

period. When the average annual rates are small (e.g., less than 5 percent) both formulas give virtually the same results. For an explanation of these two formulas as they relate to population, see U.S. Census Bureau, *The Methods and Materials of Demography*, Vol. 2, 3d printing (rev.), 1975, pp. 372–381.

#### **Current and constant dollars**—

Statistics in some tables in a number of sections are expressed in both current and constant dollars (see, e.g., Table 662 in Section 13, Income, Expenditures, and Wealth). Current dollar figures reflect actual prices or costs prevailing during the specified year(s). Constant dollar figures are estimates representing an effort to remove the effects of price changes from statistical series reported in dollar terms. In general, constant dollar series are derived by dividing current dollar estimates by the appropriate price index for the appropriate period (e.g., the Consumer Price Index). The result is a series as it would presumably exist if prices were the same throughout, as in the base year—in other words, as if the dollar had constant purchasing power. Any changes in this constant dollar series would reflect only changes in real volume of output, income, expenditures, or other measure.

#### **Explanation of Symbols**

The following symbols, used in the tables throughout this book, are explained in condensed form in footnotes to the tables where they appear:

- Represents zero or rounds to less than half the unit of measurement shown.
- B** Base figure too small to meet statistical standards for reliability of a derived figure.
- D** Figure withheld to avoid disclosure pertaining to a specific organization or individual.
- NA** Data not enumerated, tabulated, or otherwise available separately.
- S** Figure does not meet publication standards for reasons other than that covered by symbol B, above.
- X** Figure not applicable because column heading and stub line make entry impossible, absurd, or meaningless.
- Z** Entry would amount to less than half the unit of measurement shown.

In many tables, details will not add to the totals shown because of rounding.

# Telephone & Internet Contacts

To help *Abstract* users find more data and information about statistical publications, we are issuing this list of contacts for Federal agencies with major statistical programs. The intent is to give a single, first-contact point-of-entry for users of statistics. These agencies will provide general information on their statistical programs and publications, as well as specific information on how to order their publications. We are also including the Internet (World Wide Web) addresses for many of these agencies. These URLs were current in July 2005.

---

## Section 1

# Population

---

This section presents statistics on the growth, distribution, and characteristics of the U.S. population. The principal source of these data is the U.S. Census Bureau, which conducts a decennial census of population, a monthly population survey, a program of population estimates and projections, and a number of other periodic surveys relating to population characteristics. For a list of relevant publications, see the Guide to Sources of Statistics in Appendix I.

**Decennial censuses**—The U.S. Constitution provides for a census of the population every 10 years, primarily to establish a basis for apportionment of members of the House of Representatives among the states. For over a century after the first census in 1790, the census organization was a temporary one, created only for each decennial census. In 1902, the Census Bureau was established as a permanent federal agency, responsible for enumerating the population and also for compiling statistics on other population and housing characteristics.

Historically, the enumeration of the population has been a complete count. That is, an attempt is made to account for every person, for each person's residence, and for other characteristics (sex, age, family relationships, etc.). Since the 1940 census, in addition to the complete count information, some data have been obtained from representative samples of the population. In the 1990 and 2000 censuses, variable sampling rates were employed. For most of the country, 1 in every 6 households (about 17 percent) received the long form or sample questionnaire; in governmental units estimated to have fewer than 2,500 inhabitants, every other household (50 percent) received the sample questionnaire to enhance the reliability of sample data for small areas. Exact agreement is not to be expected between sample data and the 100-percent count. Sample data may be

used with confidence where large numbers are involved and assumed to indicate trends and relationships where small numbers are involved.

**Current Population Survey (CPS)**—This is a monthly nationwide survey of a scientifically selected sample representing the noninstitutionalized civilian population. The sample is located in 754 areas with coverage in every state and the District of Columbia and is subject to sampling error. At the present time, about 60,000 occupied households are eligible for interview every month; of these between 6 and 7 percent are, for various reasons, unavailable for interview.

While the primary purpose of the CPS is to obtain monthly statistics on the labor force, it also serves as a vehicle for inquiries on other subjects. Using CPS data, the Census Bureau issues a series of publications under the general title of *Current Population Reports*, which cover population characteristics (P20), consumer income (P60), special studies (P23), and other topics.

Estimates of population characteristics based on the CPS will not agree with the counts from the census because the CPS and the census use different procedures for collecting and processing the data for racial groups, the Hispanic population, and other topics. Caution should also be used when comparing estimates for various years because of the periodic introduction of changes into the CPS. Beginning in January 1994, a number of changes were introduced into the CPS that effect all data comparisons with prior years. These changes included the results of a major redesign of the survey questionnaire and collection methodology and the introduction of 1990 census population controls, adjusted for the estimated undercount. Beginning with the 2001 CPS Annual Demographic Supplement, the independent estimates used as control totals for the CPS are based on civilian population benchmarks consistent with Census 2000. In March 2002, the sample

size of the Annual Demographic Supplement was increased to approximately 78,000. In 2003 the name of the March supplement was changed to Annual Social and Economic Supplement. These changes in population controls had relatively little impact on derived measures such as means, medians, and percent distribution, but did have a significant impact on levels.

### **American Community Survey**

**(ACS)**—This is a nationwide survey to obtain data about demographic, social, economic, and housing information of people, households, and housing units. The survey collects the same type of information that has been collected every 10 years from the long-form questionnaire of the census, which the American Community Survey will replace. The estimates are limited to the household population and exclude the population living in institutions, college dormitories, and other group quarters.

### **Population estimates and projections**

—Estimates of the United States population are derived by updating the resident population enumerated in Census 2000 with information on the components of population change: births, deaths, and net international migration. The April 1, 2000, population used in these estimates reflects modifications to the Census 2000 population as documented in the Count Question Resolution program.

Registered births and deaths are estimated from data supplied by the National Center for Health Statistics. The net international component combines three parts: (1) net migration of the foreign-born, (2) emigration of natives, and (3) net movement from Puerto Rico to the United States. The American Community Survey (ACS) is used as the basis for the level of net migration of the foreign-born between 2000 to 2001 and 2001 to 2002 along with estimates developed from the Demographic Analysis and Population Estimates (DAPE) project. (See Deardorff and Blumerman, 2001, "Evaluation Components of International Migration: Estimates of the Foreign-Born Population by Migrant Status in 2000," Population Division Working Paper Series, No. 58.)

Estimates for state and county areas are based on the same components of change data and sources as the national estimates with the addition of net internal migration. School enrollment statistics from state departments of education and parochial school systems, federal income tax returns from the Internal Revenue Service, group quarters data from the Federal-State Cooperative Program, and Medicare data from the Centers for Medicare and Medicaid Services are also included.

The population by age for April 1, 1990, (shown in Table 11) reflects modifications to the 1990 census data counts. The review of detailed 1990 information indicated that respondents tended to report age as of the date of completion of the questionnaire, not as of April 1, 1990. In addition, there may have been a tendency for respondents to round up their age if they were close to having a birthday. A detailed explanation of the age modification procedure appears in 1990 Census of Population and Housing, Data Paper Listing CPH-L74.

Population estimates and projections are available on the Census Bureau Internet site <<http://www.census.gov>>. These estimates and projections are consistent with official decennial census figures with no adjustment for estimated net census coverage. However, the categories for these estimates and projections by race have been modified and are not comparable to the census race categories (see section below under "Race"). For details on methodology, see the sources cited below the individual tables.

**Immigration**—Immigration (migration to a country) is one component of international migration; the other component is emigration (migration from a country). In its simplest form, international migration is defined as any movement across a national border. In the United States, federal statistics on international migration are produced primarily by the U.S. Census Bureau and the Office of Immigration Statistics (located in the Department of Homeland Security).

The Census Bureau collects data used to estimate international migration through its decennial censuses and numerous surveys of the U.S. population.

The Office of Immigration Statistics publishes immigration data in the *Yearbook of Immigration Statistics* and collects these data from several administrative records such as the Immigrant Visa and Alien Registration (OF-155, U.S. State Department) for new arrivals, and the Memorandum of Creation of Record of Lawful Permanent Residence (I-181, INS) for persons adjusting migrant status. Immigrants are aliens admitted for legal permanent residence in the United States. The category, immigrant, includes persons who may have entered the United States as nonimmigrants or refugees, but who subsequently changed their status to that of a permanent resident. Nonresident aliens admitted to the United States for a temporary period are nonimmigrants. Refugees are considered nonimmigrants when initially admitted into the United States but are not included in nonimmigrant admission data. A refugee is an alien outside the United States who is unable or unwilling to return to his or her country of nationality because of persecution or a well-founded fear of persecution. After 1 year of residence in the United States, refugees are eligible for immigrant status.

U.S. immigration law gives preferential immigration status to persons with a close family relationship with a U.S. citizen or legal permanent resident, persons with needed job skills, or persons who qualify as refugees. Immigration to the United States can be divided into two general categories: (1) those subject to the annual worldwide limitation and (2) those exempt from it. Numerical limits are imposed on visas issued and not on admissions. The maximum number of visas allowed to be issued under the preference categories in 2004 was 430,422—226,000 for family-sponsored immigrants and 204,422 for employment-based immigrants. Those exempt from the worldwide limitation include immediate relatives of U.S. citizens, refugees and asylees adjusting to permanent residence, and other various classes of special immigrants (see Table 6).

#### **Metropolitan and micropolitan**

**areas**—The United States Office of Management and Budget (OMB) defines metropolitan and micropolitan statistical areas according to published standards that are

applied to Census Bureau data. The general concept of a metropolitan or micropolitan statistical area is that of a core area containing a substantial population nucleus, together with adjacent communities having a high degree of economic and social integration with that core. Currently defined metropolitan and micropolitan statistical areas are based on application of 2000 standards to 2000 decennial census data as updated by application of those standards to more recent Census Bureau population estimates. The term “metropolitan area” (MA) was used to refer collectively to metropolitan statistical areas (MSAs), consolidated metropolitan statistical areas (CMSAs), and primary metropolitan statistical areas (PMSAs) as defined according to 1980 and 1990 standards. The term “core-based statistical area” (CBSA) became effective in 2003 and refers collectively to metropolitan and micropolitan areas.

Over time, new statistical areas are created and the components of others change. Because of historical changes in geographic definitions, users must be cautious in comparing data for these statistical areas from different dates. For some purposes, comparisons of data for areas as defined at given dates may be appropriate; for other purposes, it may be preferable to maintain consistent area definitions. For descriptive details and a list of titles and components of metropolitan and micropolitan statistical areas, see Appendix II.

**Urban and rural**—For Census 2000, the Census Bureau classified as urban all territory, population, and housing units located within urbanized areas (UAs) and urban clusters (UCs). A UA consists of densely settled territory that contains 50,000 or more people, while a UC consists of densely settled territory with at least 2,500 people but fewer than 50,000 people. (UCs are a new type of geographic entity for Census 2000.) From the 1950 census through the 1990 census, the urban population consisted of all people living in UAs and most places outside of UAs with a census population of 2,500 or more.

UAs and UCs encompass territory that generally consists of:

- A cluster of one or more block groups or census blocks each of which has a population density of at least 1,000 people per square mile at the time.
- Surrounding block groups and census blocks each of which has a population density of at least 500 people per square mile at the time.
- Less densely settled blocks that form enclaves or indentations, or are used to connect discontinuous areas with qualifying densities.

They also may include an airport located adjacent to qualifying densely settled area if it has an annual enplanement (aircraft boarding) of at least 10,000 people.

"Rural" for Census 2000 consists of all territory, population, and housing units located outside of UAs and UCs. Prior to Census 2000, rural consisted of all territory, population, and housing outside of UAs and outside of other places designated as "urban." For Census 2000, many more geographic entities, including metropolitan areas, counties, county subdivisions, and places, contain both urban and rural territory, population, and housing units.

**Residence**—In determining residence, the Census Bureau counts each person as an inhabitant of a usual place of residence (i.e., the place where one usually lives and sleeps most of the time). While this place is not necessarily a person's legal residence or voting residence, the use of these different bases of classification would produce the same results in the vast majority of cases.

**Race**—For the 1990 census, the Census Bureau collected and published racial statistics as outlined in Statistical Policy Directive No. 15 issued by the U.S. Office of Management and Budget (OMB). This directive provided standards on ethnic and racial categories for statistical reporting to be used by all federal agencies. According to the directive, the basic racial categories were American Indian or Alaska Native, Asian or Pacific Islander, Black, and White. (The directive identified Hispanic origin as an ethnicity.) The question on race for Census 2000 was different from the one for the 1990 census in several ways. Most significantly, respondents were given the option of selecting one or more race categories to indicate

their racial identities. Because of these changes, the Census 2000 data on race are not directly comparable with data from the 1990 census or earlier censuses. Caution must be used when interpreting changes in the racial composition of the United States population over time. Census 2000 adheres to the federal standards for collecting and presenting data on race and ethnicity as established by OMB in October 1997. Starting with Census 2000, the OMB requires federal agencies to use a minimum of five race categories: White, Black or African American, American Indian or Alaska Native, Asian, and Native Hawaiian or Other Pacific Islander. Additionally, to collect data on individuals of mixed race parentage, respondents were allowed to select one or more races. For respondents unable to identify with any of these five race categories, OMB approved and included a sixth category—"Some other race" on the Census 2000 questionnaire. The Census 2000 question on race included 15 separate response categories and three areas where respondents could write in a more specific race group. The response categories and write-in answers can be combined to create the five minimum OMB race categories plus "Some other race." People who responded to the question on race by indicating only one race are referred to as the *race alone* population, or the group that reported only one race category. Six categories make up this population: White alone, Black or African American alone, American Indian and Alaska Native alone, Asian alone, Native Hawaiian and Other Pacific Island alone, and Some other race alone. Individuals who chose more than one of the six race categories are referred to as the *Two or More Races* population, or as the group that reported more than one race. Additionally, respondents who reported one race together with those who reported the same race plus one or more other races are combined to create the *race alone or in combination* categories. For example, the *White alone or in combination group* consists of those respondents who reported White combined with one or more other race groups, such as "White and Black or African American," or "White and Asian and American Indian and Alaska Native." Another way to think of the group who reported White alone or in combination is

as the total number of people who identified entirely or partially as White. This group is also described as people who reported White, whether or not they reported any other race.

The *alone or in combination* categories are tallies of *responses* rather than *respondents*. That is, the alone or in combination categories are not mutually exclusive. Individuals who reported two races were counted in two separate and distinct alone or in combination race categories, while those who reported three races were counted in three categories, and so on. Consequently, the sum of all alone or in combination categories equals the number of races reported (i.e., responses) which exceeds the total population.

The concept of race, as used by the Census Bureau, reflects self-identification by people according to the race or races with which they most closely identify. These categories are sociopolitical constructs and should not be interpreted as being scientific or anthropological in nature. Furthermore, the race categories include both racial and national-origin groups.

Data for the population by race for April 1, 2000, (shown in Tables 13, 14, and 16) are modified counts and are not comparable to Census 2000 race categories. These numbers were computed using Census 2000 data by race that had been modified to be consistent with the 1997 Office of Management and Budget's, "Revisions to the Standards for the Classification of Federal Data on Race and Ethnicity," (Federal Register Notice, Vol. 62, No 210, October 1997). A detailed explanation of the race modification procedure appears on the Census Web page <[http://www.census.gov/popest/topics/methodology/2003\\_nat\\_char\\_meth.html](http://www.census.gov/popest/topics/methodology/2003_nat_char_meth.html)>.

In the CPS and other household sample surveys in which data are obtained through personal interview, respondents are asked to classify their race as: (1) White; (2) Black, African American or Negro; (3) American Indian or Alaska Native; (4) Asian; (5) Native Hawaiian or Other Pacific Islander. Beginning January 2003, respondents were allowed to report more than one race to indicate their mixed racial heritage.

**Hispanic population**—The Census Bureau collected data on the Hispanic origin population in the 2000 census by using a self-identification question. Persons of Spanish/Hispanic/Latino origin are those who classified themselves in one of the specific Hispanic origin categories listed on the questionnaire—Mexican, Puerto Rican, Cuban, as well as those who indicated that they were of Other Spanish/ Hispanic/Latino origin. Persons of Other Spanish/Hispanic/Latino origin are those whose origins are from Spain, the Spanish-speaking countries of Central or South America, or the Dominican Republic.

In the CPS, information on Hispanic persons is gathered by using a self-identification question. Based on a two-part question, the respondent is first asked whether or not they are of Hispanic, Spanish, or Latino origin and based on their response are further classified into the following categories: Mexican or Mexican-American or Chicano; Puerto Rican; Cuban; Central or South American; or Other Hispanic, Spanish, or Latino origin group.

Traditional and current data collection and classification treat race and Hispanic origin as two separate and distinct concepts in accordance with guidelines from the OMB. Race and Hispanic origin are two separate concepts in the federal statistical system. People who are Hispanic may be any race and people in each race group may be either Hispanic or Not Hispanic. Also, each person has two attributes, their race (or races) and whether or not they are Hispanic. The overlap of race and Hispanic origin is the main comparability issue. For example, Black Hispanics (Hispanic Blacks) are included in both the number of Blacks and in the number of Hispanics. For further information, see Census Web page <<http://www.census.gov/population/www/socdemo/compraceho.html>>.

**Foreign-born and native populations**—The Census Bureau separates the U.S. resident population into two groups based on whether or not a person was a U.S. citizen at the time of birth. Anyone born in the United States or a U.S. Island Area (such as Puerto Rico) or born abroad to a U.S. citizen parent is a U.S. citizen at the time of birth and consequently

included in the *native population*. The term *foreign-born population* refers to anyone who is not a U.S. citizen at birth. This includes naturalized U.S. citizens, legal permanent resident aliens (immigrants), temporary migrants (such as foreign students), humanitarian migrants (such as refugees), and people illegally present in the United States. The Census Bureau provides a variety of demographic, social, economic, geographic, and housing information on the foreign-born population in the United States. More information on the foreign-born population collected from censuses and surveys is available at <http://www.census.gov/population/www/socdemo/foreign.html>.

**Mobility status**—The U.S. population is classified according to mobility status on the basis of a comparison between the place of residence of each individual at the time of the survey or census and the place of residence at a specified earlier date. Nonmovers are all persons who were living in the same house or apartment at the end of the period as at the beginning of the period. Movers are all persons who were living in a different house or apartment at the end of the period than at the beginning of the period. Movers are further classified as to whether they were living in the same or different county, state, or region or were movers from abroad. Movers from abroad include all persons, either U.S. citizens or noncitizens, whose place of residence was outside the United States at the beginning of the period; that is, in Puerto Rico, another U.S. Island Area, or a foreign country.

**Living arrangements**—Living arrangements refer to residency in households or in group quarters. A "household" comprises all persons who occupy a "housing unit," that is, a house, an apartment or other group of rooms, or a single room that constitutes "separate living quarters." A household includes the related family members and all the unrelated persons, if any, such as lodgers, foster children, wards, or employees who share the housing unit. A person living alone or a group of unrelated persons sharing the same

housing unit is also counted as a household. See text, Section 20, Construction and Housing, for definition of housing unit.

All persons not living in housing units are classified as living in group quarters. These individuals may be institutionalized, e.g., under care or custody in juvenile facilities, jails, correctional centers, hospitals, or nursing homes; or they may be residents in noninstitutional group quarters such as college dormitories, group homes, or military barracks.

**Householder**—The householder is the person in whose name the home is owned or rented. If a home is owned or rented jointly by a married couple, either the husband or the wife may be listed first.

**Family**—The term family refers to a group of two or more persons related by birth, marriage, or adoption and residing together in a household. A family includes among its members the householder.

**Subfamily**—A subfamily consists of a married couple and their children, if any, or one parent with one or more never-married children under 18 years old living in a household. Subfamilies are divided into "related" and "unrelated" subfamilies. A related subfamily is related to, but does not include, the householder. Members of a related subfamily are also members of the family with whom they live. The number of related subfamilies, therefore, is not included in the count of families. An unrelated subfamily may include persons such as guests, lodgers, or resident employees and their spouses and/or children; none of whom is related to the householder.

**Married couple**—A married couple is defined as a husband and wife living together in the same household, with or without children and other relatives.

**Statistical reliability**—For a discussion of statistical collection and estimation, sampling procedures, and measures of statistical reliability applicable to Census Bureau data, see Appendix III.

No. 127.—NUMBER of ALIEN PASSENGERS ARRIVED in the UNITED STATES from FOREIGN COUNTRIES from October 1, 1819, to December 31, 1870.

a The natives of Ireland are partly estimated on the basis of data obtained by the Commissioners of Emigration of New York, who have made careful inquiries on this subject. The total from the British Isles, given above, is from official returns to the Bureau of Statistics.

NOTE.—It is estimated that the number of alien passengers arrived in the United States from 1789 to 1820 amounted to 250,000.

Table 1. Population and Area: 1790 to 2000

[Area figures represent area on indicated date including in some cases considerable areas not then organized or settled, and not covered by the census. Total area figures for 1790 to 1970 have been recalculated on the basis of the remeasurement of states and counties for the 1980 census, but not on the basis of the 1990 census. The land and water area figures for past censuses have not been adjusted and are not strictly comparable with the total area data for comparable dates because the land areas were derived from different base data, and these values are known to have changed with the construction of reservoirs, draining of lakes, etc. Density figures are based on land area measurements as reported in earlier censuses]

Table 3. Resident Population Projections: 2005 to 2050

[295,507 represents 295,507,000. As of July 1. The projections are based on assumptions about future childbearing, mortality, and migration. The level of childbearing among women is assumed to remain close to present levels, with differences by race and Hispanic origin diminishing over time. Mortality is assumed to decline gradually with less variation by race and Hispanic origin than at present. International migration is assumed to vary over time and decrease generally relative to the size of the population]

X Not applicable. <sup>1</sup> Includes spouses and children. <sup>2</sup> Category was eliminated in 1992 by the Immigration Act of 1990.<sup>3</sup> Includes categories of immigrants admitted under three laws intended to diversify immigration: P.L. 99-603, P.L. 100-658, and P.L. 101-649. <sup>4</sup> Under Public Law 100-202, Amerasians are aliens born in Vietnam between January 1, 1962, and January 1, 1976, who were fathered by U.S. citizens. <sup>5</sup> Spouses and children of persons granted permanent resident status under provisions of the Immigration Reform and Control Act of 1986. <sup>6</sup> Was suspension of deportation prior to April 1, 1997.Source: U.S. Department of Homeland Security, Office of Immigration Statistics, 2004 Yearbook of Immigration Statistics. See also <<http://uscis.gov/graphics/shared/statistics/yearbook/index.htm>>.

Table 7. Estimated Unauthorized Immigrants by Selected States and Countries of Origin: 2000

[In thousands (7,000 represents 7,000,000). As of January. Unauthorized immigrants refers to foreign-born persons who entered without inspection or who violated the terms of a temporary admission and who have not acquired legal permanent resident status or gained temporary protection against removal by applying for an immigration benefit. The estimates were derived using the residual technique: the legally-resident population was estimated and then subtracted from the census-based foreign-born population, leaving estimated unauthorized residents as a residual. The estimates rely primarily on data from two sources: (1) annual INS statistics (immigrants admitted, deportable aliens removed, and nonimmigrant residents admitted); and (2) data for the foreign-born population from the 2000 census. Estimates were derived separately for: (1) unauthorized residents who entered the United States in the 1990s; and (2) those who entered before 1990 and still lived here illegally in January 2000]

State	Number	Country	Number
<b>United States, total</b>	<b>7,000</b>	<b>Total</b>	<b>7,000</b>

<sup>1</sup> Total population count has been revised since the 1980 census publications. Numbers by age and sex have not been corrected. <sup>2</sup> The data shown have been modified from the official 1990 census counts. See text of this section for explanation. The April 1, 1990, estimates base (248,790,925) includes count resolution corrections processed through August 1997. It generally does not include adjustments for census coverage errors. However, it includes adjustments estimated for the 1995 Test Census in various localities in California, New Jersey, and Louisiana; and the 1998 census dress rehearsals in localities in California and Wisconsin. These adjustments amounted to a total of 81,052 persons. <sup>3</sup> The April 1, 2000, Population Estimates base reflects changes to the Census 2000 population from the Count Question Resolution program and geographic program revisions.

Figure 1.1  
Center of Population: 1790 to 2000

[Prior to 1960, excludes Alaska and Hawaii. The median center is located at the intersection of two median lines, a north-south line constructed so that half of the nation's population lives east and half lives west of it, and an east-west line selected so that half of the nation's population lives north and half lives south of it. The mean center of population is that point at which an imaginary, flat, weightless, and rigid map of the United States would balance if weights of identical value were placed on it so that each weight represented the location of one person on the date of the census]

Year	Median center		Mean center		
	Latitude-N	Longitude	Latitude-N	Longitude-W	Approximate location
1790 (August 2)	(NA)	(NA)	39 16 30	76 11 12	In Kent County, MD, 23 miles E of Baltimore MD
1850 (June 1) . .	(NA)	(NA)	38 59 00	81 19 00	In Wirt County, WV, 23 miles SE of Parkersburg, WV <sup>1</sup>
1900 (June 1) . .	40 03 32	84 49 01	39 09 36	85 48 54	In Bartholomew County, IN, 6 miles SE of Columbus, IN
1950 (April 1) . .	40 00 12	84 56 51	38 50 21	88 09 33	In Richland County, IL, 8 miles NNW of Olney, IL
1960 (April 1) . .	39 56 25	85 16 60	38 35 58	89 12 35	In Clinton County, IL, 6.5 miles NW of Centralia, IL
1970 (April 1) . .	39 47 43	85 31 43	38 27 47	89 42 22	In St. Clair County, IL, 5.3 miles ESE of Mascoutah, IL
1980 (April 1) . .	39 18 60	86 08 15	38 08 13	90 34 26	In Jefferson County, MO, .25 mile W of DeSoto, MO
1990 (April 1) . .	38 57 55	86 31 53	37 52 20	91 12 55	In Crawford County, MO, 10 miles SE of Steelville, MO
2000 (April 1) . .	38 45 23	86 55 51	37 41 49	91 48 34	In Phelps County, MO, 3 miles E of Edgar Springs, MO

NA Not available. <sup>1</sup>West Virginia was set off from Virginia, Dec. 31, 1862, and admitted as a state, June 19, 1863.

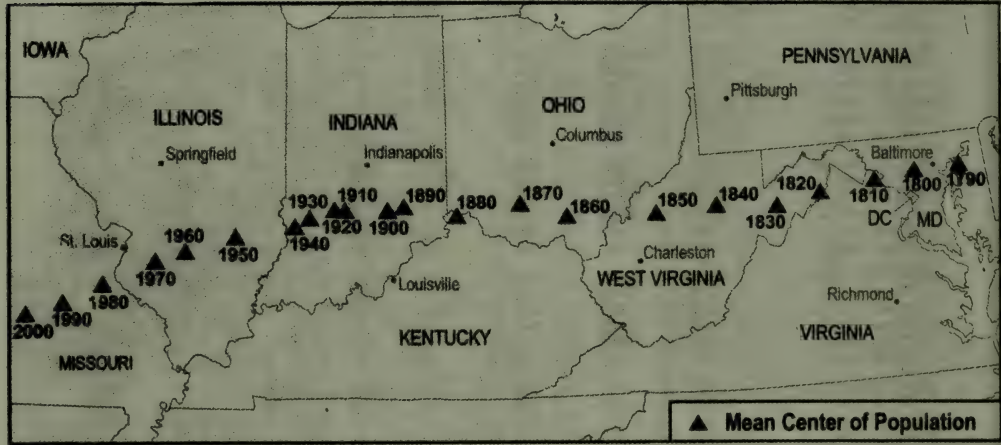

Table 17. Resident Population—States: 1980 to 2004

[In thousands (226,546 represents 226,546,000). 1980, 1990, and 2000 data as of April 1, data for other years as of July 1. Insofar as possible, population shown for all years is that of present area of state. See Appendix III]

**Table 19. State Resident Population—Projections: 2005 to 2030**

[As of July 1. These projections were produced in correspondence with the U.S. interim projections released in March 2004 (see Tables 3 and 11). They were developed for each of the 50 states and the District of Columbia by age and sex for the years 2000 to 2030, based on Census 2000 results. These projections differ from forecasts in that they represent the results of the mathematical projection model given that current state-specific trends in fertility, mortality, internal migration and international migration continue. The projections to 2004 have been superseded by population estimates which are shown in Table 17. Minus sign (-) indicates decrease.]

State	Number (1,000)						Change, 2000-2030		Rank

Source: U.S. Census Bureau, "Population estimates by State, Age and Sex for States and for Puerto Rico: April 1, 2000 to July 1, 2004"; published March 2005; <<http://www.census.gov/popest/states/asrh/SC-est2004-02.html>>

**Table 22. Resident Population by Age and State—Projections: 2005 and 2010**

[As of July 1. These projections were produced in correspondence with the U.S. interim projections released in March 2004 (see Tables 3 and 11). They were developed for each of the 50 states and the District of Columbia by age and sex for the years 2000 to 2030, based on Census 2000 results. These projections differ from forecasts in that they represent the results of the mathematical projection model given that current state-specific trends in fertility, mortality, internal migration and international migration continue. The projections to 2004 have been superseded by population estimates which are shown in Table 21]

State	Population (1,000)										Percent of population, 2010	
	Under 18 years old		18 to 44 years old		45 to 64 years old		65 to 74 years old		75 years old and over		Under 18 years old	65 years old and over
	2005	2010	2005	2010	2005	2010	2005	2010	2005	2010

Table 26. Large Metropolitan Statistical Areas—Population: 1990 to 2004—Con.

[1990 and 2000, as of April 1; beginning 2002 as of July 1 (658 represents 658,000). Covers metropolitan statistical areas with 250,000 and over population in 2004, as defined by the U.S. Office of Management and Budget as of November 2004. For definitions and components of all metropolitan and micropolitan areas, see Appendix II. Minus sign (-) indicates decrease]

Metropolitan statistical area	Number (1,000)					Percent change		Rank, 2004
	1990	2000	2002	2003	2004	1990- 2000	2000- 2004 <sup>1</sup>	
Tucson, AZ	667	844	878	891	907	26.5	7.5	52

Youngstown-Warren-Boardman, OH-PA	614	603	596	593	590	-1.7	-2.1	81

<sup>1</sup> Based on the April 1, 2000 Population Estimates base which reflects changes to the Census 2000 population from the Count Question Resolution program and geographic program revisions. <sup>2</sup> Broomfield County, CO was formed from parts of Adams, Boulder, Jefferson, and Weld Counties, CO, on November 15, 2001 and is coextensive with Broomfield city. For purposes of defining and presenting data for metropolitan statistical areas, Broomfield city is treated as if it were a county at the time of the 1990 and 2000 censuses. <sup>3</sup> The portion of Sullivan city in Crawford County, Missouri, is legally part of the St. Louis, MO-IL MSA. Data shown here do not include this area.

Table 38. American Indian and Alaska Native Population by Tribe: 2000

[As of April. This table shows data for American Indian and Alaska Native tribes alone or in combination of tribes or races. Respondents who identified themselves as American Indian or Alaska Native were asked to report their enrolled or principal tribe. Therefore, data shown here reflect the written tribal entries reported on the questionnaire. Some of the entries (for example, Iroquois, Sioux, Colorado River, and Flathead) represent nations or reservations. The information on tribe is based on self-identification and includes federally- or state-recognized tribes, as well as bands and clans]

American Indian and Alaska Native tribe	Number	American Indian and Alaska Native tribe	Number
<b>Total persons</b> <sup>1</sup>	<b>4,119,301</b>	Osage	15,897
Apache	96,833	Ottawa	10,677

**Table 45. Native and Foreign-Born Populations by Selected Characteristics: 2004**

[In thousands (288,280 represents 288,280,000). As of March. The foreign-born population includes anyone who is not a U.S. citizen at birth. This includes legal permanent residents (immigrants), temporary migrants (such as students), humanitarian migrants (such as refugees), and persons illegally present in the United States. Based on Current Population Survey, Annual Social and Economic Supplement which includes the civilian noninstitutional population plus Armed Forces living off post or with their families on post; see text of this section, and Appendix III]

Characteristic			Foreign-born population			
	Total population	Native population	Total	Naturalized citizen	Not U.S. citizen	Year of entry: 2000 to March 2004
<b>Total</b> . . . . .	<b>288,280</b>	<b>254,037</b>	<b>34,244</b>	<b>13,128</b>	<b>21,116</b>	<b>6,052</b>
Under 5 years old . . . . .	19,932	19,597	334	75	259	321
5 to 14 years old . . . . .	40,764	38,943	1,822	219	1,603	797
15 to 24 years old . . . . .	40,708	36,147	4,561	831	3,730	1,498
25 to 34 years old . . . . .	39,201	31,417	7,784	1,705	6,079	1,923

Table 59. Parents and Children in Stay-At-Home Parent Family Groups: 1995 to 2004

[In thousands (22,973 represents 22,973,000). Family groups with children include those families that maintain their own household (family households with own children); those that live in the home of a relative (related subfamilies); and those that live in the home of a nonrelative (unrelated subfamilies). Stay-at-home family groups are married-couple family groups with children under 15 where one parent is in the labor force all of the previous year and their spouse is out of the labor force for the entire year with the reason "taking care of home and family." Only married couples with children under 15 are included. Based on Current Population Survey; see Appendix III]

Year	Married-couple family groups			Children under 15 years old in married-couple family groups		
	Total	With stay-at-home mothers	With stay-at-home fathers	Total in married-couple family groups	With stay-at-home mothers	With stay-at-home fathers

**Table 69. Self-Described Religious Identification of Adult Population: 1990 and 2001**

[In thousands (175,440 represents 175,440,000). The American Religious Identification Survey (ARIS) 2001 was based on a random digit-dialed telephone survey of 50,281 American residential households in the continental U.S.A. (48 states). Respondents were asked to describe themselves in terms of religion with an open-ended question. Interviewers did not prompt or offer a suggested list of potential answers. Moreover, the self-description of respondents was not based on whether established religious bodies, institutions, churches, mosques or synagogues considered them to be members. Quite the contrary, the survey sought to determine whether the respondents themselves regarded themselves as adherents of a religious community. Subjective rather than objective standards of religious identification were tapped by the surveys]

Religious group	1990	2001	Religious group	1990	2001
<b>Adult population, total <sup>1</sup></b> .....	<b>175,440</b>	<b>207,980</b>

Christian Reform .....	40	79			
Foursquare Gospel .....	28	70	Refused to reply to question .....	4,031	11,246

NA Not available. <sup>1</sup> Refers to the total number of adults in all fifty states. All other figures are based on projections from surveys conducted in the continental United States (48 states). <sup>2</sup> Because of the subjective nature of replies to open-ended question, these categories are the most unstable as they do not refer to clearly identifiable denominations as much as underlying feelings about religion. Thus they may be the most subject to fluctuation over time.

Table 71. Christian Church Adherents, 2000, and Jewish Population, 2003—States

[133,377 represents 133,377,000. Christian church adherents were defined as "all members, including full members, their children and the estimated number of other regular participants who are not considered as communicants, confirmed or full members." The Jewish population includes Jews who define themselves as Jewish by religion as well as those who define themselves as Jewish in cultural terms. Data on Jewish population are based primarily on a compilation of individual estimates made by local Jewish federations. Additionally, most large communities have completed Jewish demographic surveys from which the Jewish population can be determined]

## Section 2

# Vital Statistics

---

This section presents vital statistics data on births, deaths, abortions, fetal deaths, fertility, life expectancy, marriages, and divorces. Vital statistics are compiled for the country as a whole by the National Center for Health Statistics (NCHS) and published in its annual report, *Vital Statistics of the United States*, in certain reports of the *Vital and Health Statistics* series, and in the *National Vital Statistics Reports* (formerly *Monthly Vital Statistics Report*). Reports in this field are also issued by the various state bureaus of vital statistics. Data on fertility, on age of persons at first marriage, and on marital status and marital history are compiled by the U.S. Census Bureau from its Current Population Survey (CPS; see text, Section 1) and published in *Current Population Reports*, P20 Series. Data on abortions are published by the Alan Guttmacher Institute, New York, NY, in selected issues of *Family Planning Perspectives* online at <[www.agi-usa.org/sections/abortion.html](http://www.agi-usa.org/sections/abortion.html)>.

**Registration of vital events**—The registration of births, deaths, fetal deaths, and other vital events in the United States is primarily a state and local function. The civil laws of every state provide for a continuous and permanent birth- and death-registration system. Many states also provide for marriage- and divorce-registration systems. Vital events occurring to U.S. residents outside the United States are not included in the data.

**Births and deaths**—The live-birth, death, and fetal-death statistics prepared by NCHS are based on vital records filed in the registration offices of all states, New York City, and the District of Columbia. The annual collection of death statistics on a national basis began in 1900 with a national death-registration area of ten states and the District of Columbia; a similar annual collection of birth statistics for a national birth-registration area began in 1915, also with ten reporting states and the District of Columbia. Since 1933, the birth- and death-registration areas have comprised the entire United

States, including Alaska (beginning 1959) and Hawaii (beginning 1960). National statistics on fetal deaths were first compiled for 1918 and annually since 1922.

Prior to 1951, birth statistics came from a complete count of records received in the Public Health Service (now received in NCHS). From 1951 through 1971, they were based on a 50-percent sample of all registered births (except for a complete count in 1955 and a 20- to 50-percent sample in 1967). Beginning in 1972, they have been based on a complete count for states participating in the Vital Statistics Cooperative Program (VSCP) (for details, see the technical appendix in *Vital Statistics of the United States*) and on a 50-percent sample of all other areas. Beginning in 1986, all reporting areas participated in the VSCP. Mortality data have been based on a complete count of records for each area (except for a 50-percent sample in 1972). Beginning in 1970, births to and deaths of nonresident aliens of the United States and U.S. citizens outside the United States have been excluded from the data. Fetal deaths and deaths among Armed Forces abroad are excluded. Data based on samples are subject to sampling error; for details, see annual issues of *Vital Statistics of the United States*.

Mortality statistics by cause of death are compiled in accordance with World Health Organization regulations according to the *International Classification of Diseases* (ICD). The ICD is revised approximately every 10 years. The tenth revision of the ICD was employed beginning in 1999. Deaths for prior years were classified according to the revision of the ICD in use at the time. Each revision of the ICD introduces a number of discontinuities in mortality statistics; for a discussion of those between the ninth and tenth revisions of the ICD, see *National Vital Statistics Reports*, Vol. 49, Nos. 2 and 8. Preliminary mortality data are based on a percentage of death records weighted up to the total number of deaths reported for the given

year; for a discussion of preliminary data, see *National Vital Statistics Reports*, Vol. 49, No. 3. Information on tests of statistical significance, differences between death rates, and standard errors can also be found in the reports mentioned above.

Some of the tables present age-adjusted death rates in addition to crude death rates. Age-adjusted death rates shown in this section were prepared using the direct method, in which age-specific death rates for a population of interest are applied to a standard population distributed by age. Age adjustment eliminates the differences in observed rates between points in time or among compared population groups that result from age differences in population composition.

**Fertility and life expectancy**—The total fertility rate, defined as the number of births that 1,000 women would have in their lifetime if, at each year of age, they experienced the birth rates occurring in the specified year, is compiled and published by NCHS. Other data relating to social and medical factors that affect fertility rates, such as contraceptive use and birth expectations, are collected and made available by both NCHS and the Census Bureau. NCHS figures are based on information in birth and fetal death certificates and on the periodic National Surveys of Family Growth; Census Bureau data are based on decennial censuses and the CPS.

Data on life expectancy, the average remaining lifetime in years for persons who attain a given age, are computed and published by NCHS. For details, see *National Vital Statistics Reports*, Vol. 52, No. 3.

**Marriage and divorce**—The compilation of nationwide statistics on marriages and divorces in the United States began in 1887–88, when the National Office of Vital Statistics prepared estimates for the years 1867–86. Although periodic updates took place after 1888, marriage and divorce statistics were not collected and published annually until 1944 by that office. In 1957 and 1958, respectively, the same office established marriage- and divorce-registration areas. Beginning in 1957, the marriage-registration area comprised 30 states, plus Alaska, Hawaii,

Puerto Rico, and the Virgin Islands; it currently includes 42 states and the District of Columbia. The divorce-registration area, starting in 1958 with 14 states, Alaska, Hawaii, and the Virgin Islands, currently includes a total of 31 states and the Virgin Islands. Procedures for estimating the number of marriages and divorces in the registration states are discussed in *Vital Statistics of the United States*, Vol. III—Marriage and Divorce. Total counts of events for registration and nonregistration states are gathered by collecting already summarized data on marriages and divorces reported by state offices of vital statistics and by county offices of registration. The collection and publication of detailed marriage and divorce statistics (for example: by age and race) was suspended beginning in January 1996. For additional information contact the National Center for Health Statistics online at <<http://www.cdc.gov/nchs/releases/96facts/mardiv.htm>>.

**Vital statistics rates**—Except as noted, vital statistics rates computed by NCHS are based on decennial census population figures as of April 1 for 1940, 1950, 1960, 1970, 1980, 1990, and 2000; and on midyear population figures for other years, as estimated by the Census Bureau (see text, Section 1).

**Race**—Data by race for births, deaths, marriages, and divorces from NCHS are based on information contained in the certificates of registration. The Census Bureau's Current Population Survey obtains information on race by asking respondents to classify their race as (1) White, (2) Black, (3) American Indian or Alaskan Native, Native Hawaiian or other Pacific Islander, and (4) Asian.

Beginning with the 1989 data year, NCHS is tabulating its birth data primarily by race of the mother. In 1988 and prior years, births were tabulated by race of the child, which was determined from the race of the parents as entered on the birth certificate.

Trend data by race shown in this section are by race of mother beginning with the 1980 data. Hispanic origin of the mother is reported and tabulated independently of race. Thus, persons of Hispanic origin may be any race. In 1994, 91 percent of women of Hispanic origin were reported as White.

Table 77. Total Fertility Rate by Race: 1970 to 2003

[Based on race of child and registered births only, through 1979. Beginning 1980, based on race of mother. Excludes births to non-residents of United States. The total fertility rate is the number of births that 1,000 women would have in their lifetime if, at each year of age, they experienced the birth rates occurring in the specified year. A total fertility rate of 2,110 represents "replacement-level" fertility for the total population under current mortality conditions (assuming no net immigration). See also Appendix III]

Year	Total <sup>1</sup>	White	Black <sup>2</sup>	Year	Total <sup>1</sup>	White	Black <sup>2</sup>
1970	2,480	2,385	3,067	1987	1,872	1,805	2,198

Table 88. Characteristics of Women Who Have Had a Child in the Last Year: 2000 and 2004

[As of June. Covers civilian noninstitutional population. Since the number of women who had a birth during the 12-month period was tabulated and not the actual numbers of births, some small underestimation of fertility for this period may exist due to the omission of: (1) multiple births, (2) two or more live births spaced within the 12-month period (the woman is counted only once), (3) women who had births in the period and who did not survive to the survey date, (4) women who were in institutions and therefore not in the survey universe. These losses may be somewhat offset by the inclusion in the CPS of births to immigrants who did not have their children born in the United States and births to nonresident women. These births would not have been recorded in the vital registration system. Based on Current Population Survey (CPS). The 2003 Current Population Survey (CPS) allowed respondents to choose more than one race. Beginning 2003, data represent persons who selected this race group only and exclude persons reporting more than one race. The CPS in prior years allowed respondents to report only one race group. See also comments on race in the text for Section 1, Population, and Appendix III.]

Characteristic	2000			2004		
	Number of women (1,000)	Women who have had a child in the last year		Number of women (1,000)	Women who have had a child in the last year	
		Total births per 1,000 women	First births per 1,000 women		Total births per 1,000 women	First births per 1,000 women

<sup>1</sup> Based on the proportion of the cohort who are alive at the beginning of an indicated age interval who will die before reaching the end of that interval. For example, out of every 1,000 people alive and exactly 50 years old at the beginning of the period, between 4 and 5 (4.42) will die before reaching their 51st birthdays.

**Table 99. Deaths and Death Rates by Sex and Race: 1970 to 2002**

[1,921 represents 1,921,000. Rates are per 1,000 population for specified groups. Excludes deaths of nonresidents of the United States and fetal deaths. For explanation of age-adjustment, see text, this section. The standard population for age-adjustment is the projected year 2000 population of the United States. See Appendix III. Data for Hispanic origin and specified races other than White and Black should be interpreted with caution because of inconsistencies between reporting Hispanic origin and race on death certificates and censuses and surveys]

**Table 103. Deaths and Death Rates by State and Outlying Areas: 1990 to 2003**

[2,148 represents 2,148,000. By state of residence. Excludes deaths of nonresidents of the United States, except as noted. Caution should be used in comparing death rates by state; rates are affected by the population composition of the area. For explanation of age adjustment, see table 99. See also Appendix III]

State	Number of deaths (1,000)						Crude rate per 1,000 population <sup>1</sup>						Age adjusted rate, 2003

## Section 3

# Health and Nutrition

---

This section presents statistics on health expenditures and insurance coverage, including Medicare and Medicaid, medical personnel, hospitals, nursing homes and other care facilities, injuries, diseases, disability status, nutritional intake of the population, and food consumption. Summary statistics showing recent trends on health care and discussions of selected health issues are published annually by the U.S. National Center for Health Statistics (NCHS) in *Health, United States*. Data on national health expenditures, medical costs, and insurance coverage are compiled by the U.S. Centers for Medicare & Medicaid Services (CMS) (formerly Health Care Financing Administration), and appear on the CMS Web site at <<http://www.cms.hhs.gov/statistics/nhe>> and in the annual *Medicare and Medicaid Statistical Supplement to the Health Care Financing Review*. Statistics on health insurance are also collected by NCHS and are published in Series 10 of *Vital and Health Statistics*. U.S. Census Bureau also publishes data on utilization of insurance coverage. Statistics on hospitals are published annually by the Health Forum, L.L.C., an American Hospital Association Company, in *Hospital Statistics*. Primary source for data on nutrition is the annual *Food Consumption, Prices, and Expenditures*, issued by the U.S. Department of Agriculture. NCHS also conducts periodic surveys of nutrient levels in the population, including estimates of food and nutrient intake, overweight and obesity, hypercholesterolemia, hypertension, and clinical signs of malnutrition.

**National health expenditures**—CMS compiles estimates of national health expenditures (NHE) to measure spending for health care in the United States. The NHE accounts are structured to show spending by type of expenditure (i.e., hospital care, physician and clinical care, dental care, and other professional care; home health care; retail sales of prescription drugs; other medical nondurables; vision products and other medical

durables; nursing home care and other personal health expenditures; plus non-personal health expenditures for such items as public health, research, construction of medical facilities, administration, and the net cost of private health insurance) and by source of funding (e.g., private health insurance, out-of-pocket payments, and a range of public programs including Medicare, Medicaid, and those operated by the Department of Veterans Affairs (VA)).

Data used to estimate health expenditures come from existing sources, which are tabulated for other purposes. The type of expenditure estimates rely upon statistics produced by such groups as the American Hospital Association, the Census Bureau, and the Department of Health and Human Services (HHS). Source of funding estimates are constructed using administrative and statistical records from the Medicare and Medicaid programs, the Department of Defense and VA medical programs, the Social Security Administration, Census Bureau's *Governmental Finances*, state and local governments, other HHS agencies, and other nongovernment sources. More information and detailed descriptions of sources and methods are available on the CMS home page at <<http://cms.hhs.gov/statistics/nhe/default.asp>>.

**Medicare, Medicaid and SCHIP**—Since July 1966, the federal Medicare program has provided two coordinated plans for nearly all people age 65 and over: (1) A hospital insurance plan, which covers hospital and related services and (2) a voluntary supplementary medical insurance plan, financed partially by monthly premiums paid by participants, which partly covers physicians' and related medical services. Such insurance also applies, since July 1973, to disabled beneficiaries of any age after 24 months of entitlement to cash benefits under the social security or railroad retirement programs and to persons with end stage renal disease.

Medicaid is a health insurance program for certain low-income people. These include: certain low-income families with children; aged, blind, or disabled people on supplemental security income; certain low-income pregnant women and children; and people who have very high medical bills. Medicaid is funded and administered through a state-federal partnership. Although there are broad federal requirements for Medicaid, states have a wide degree of flexibility to design their program. States have authority to establish eligibility standards, determine what benefits and services to cover, and set payment rates. Congress created the State Children's Health Insurance Program (SCHIP) to address the growing problem of children without health insurance. SCHIP was designed as a federal/state partnership, similar to Medicaid, with the goal of expanding health insurance to children whose families earn too much money to be eligible for Medicaid, but not enough money to purchase private insurance.

**Health resources**—Hospital statistics based on data from the American Hospital Association's yearly survey are published annually in *Hospital Statistics* and cover all hospitals accepted for registration by the Association. To be accepted for registration, a hospital must meet certain requirements relating to number of beds, construction, equipment, medical and nursing staff, patient care, clinical records, surgical and obstetrical facilities, diagnostic and treatment facilities, laboratory services, etc. Data obtained from NCHS cover all U.S. hospitals that meet certain criteria for inclusion. The criteria are published in *Vital and Health Statistics* reports, Series 13. NCHS defines a hospital as a nonfederal short-term general or special facility with six or more inpatient beds with an average stay of less than 30 days.

Statistics on the demographic characteristics of persons employed in the health occupations are compiled by the U.S. Bureau of Labor Statistics and reported in *Employment and Earnings* (monthly) (see Table 604, Section 12, Labor Force, Employment, and Earnings). Data based

on surveys of health personnel and utilization of health facilities providing long-term care, ambulatory care, and hospital care are presented in NCHS Series 13, *Data on Health Resources Utilization and Advance Data from Vital and Health Statistics*. Statistics on patient visits to health care providers, as reported in health interviews, appear in NCHS Series 10, *National Health Interview Survey Data*.

The CMS's *Health Care Financing Review* and its annual *Medicare and Medicaid Statistical Supplement* present data for hospitals and nursing homes as well as extended care facilities and home health agencies. These data are based on records of the Medicare program and differ from those of other sources because they are limited to facilities meeting federal eligibility standards for participation in Medicare.

**Disability and illness**—General health statistics, including morbidity, disability, injuries, preventive care, and findings from physiological testing are collected by NCHS in its National Health Interview Survey and its National Health and Nutrition Examination Surveys and appear in *Vital and Health Statistics*, Series 10 and 11, respectively. The Department of Labor compiles statistics on occupational injuries (see Section 12, Labor Force, Employment, and Earnings). Annual incidence data on notifiable diseases are compiled by the Public Health Service (PHS) at its Centers for Disease Control and Prevention in Atlanta, Georgia, and are published as a supplement to its *Morbidity and Mortality Weekly Report*. The list of diseases is revised annually and includes those which, by mutual agreement of the states and PHS, are communicable diseases of national importance.

**Nutrition**—Statistics on annual per capita consumption of food and its nutrient value are estimated by the U.S. Department of Agriculture. Data are available online at <<http://www.ers.usda.gov/data/foodconsumption>>. Statistics on food insufficiency and food and nutrient intake are collected by NCHS to estimate the diet of the nation's population. NCHS also collects physical examination data to assess the population's nutritional status, including growth,

overweight/obesity, nutritional deficiencies, and prevalence of nutrition-related conditions, such as hypertension, hypercholesterolemia, and diabetes.

**Statistical reliability**—For discussion of statistical collection, estimation, and sampling procedures and measures of reliability applicable to data from NCHS and CMS, see Appendix III.

- Represents zero. <sup>1</sup> Represents persons entitled because of End Stage Renal Disease only. Benefits for those who have ESRD, but would be entitled due to their aged or disabled status are included in aged and disabled benefits. <sup>2</sup> Beginning 1998, home health agency transfers are excluded from total supplementary medical insurance disbursements and included in total hospital insurance disbursements. <sup>3</sup> Beginning in 2002, Peer Review Organizations were renamed Quality Improvement Organizations. <sup>4</sup> Includes costs of experiments and demonstration projects. Includes costs of the health care fraud and abuse control program.

<sup>1</sup> Persons who had payments made on their behalf at any time during the fiscal year. <sup>2</sup> Payments are for fiscal year and reflect federal and state contribution payments. Data exclude disproportionate share hospital payments. Disproportionate share hospitals receive higher medicaid reimbursement than other hospitals because they treat a disproportionate share of Medicaid patients.

Table 138. State Children's Health Insurance Program (SCHIP)—Enrollment and Expenditures by State: 2000 and 2004

[(3,357.4 represents 3,357,400). For year ending September 30. This program provides health benefits coverage to children living in families whose incomes exceed the eligibility limits for medicaid. Although it is generally targeted to families with incomes at or below 200 percent of the federal poverty level, each state may set its own income eligibility limits, within certain guidelines. States have three options: they may expand their medicaid programs, develop a separate child health program that functions independently of medicaid, or do a combination of both]

**Table 140. Health Maintenance Organizations (HMOs): 1990 to 2003**

[As of January 1 (33.0 represents 33,000,000). An HMO is a prepaid health plan delivering comprehensive care to members through designated providers, having a fixed periodic payment for health care services, and requiring members to be in a plan for a specified period of time (usually 1 year). A group HMO delivers health services through a physician group that is controlled by the HMO unit or contracts with one or more independent group practices to provide health services. An individual practice association (IPA) HMO contracts directly with physicians in independent practice, and/or contracts with one or more associations of physicians in independent practice, and/or contracts with one or more multispecialty group practices. Data are based on a census of HMOs]

Persons below poverty	35.9	24.9	8.6	5.6	5.0	15.1	11.0	69.3	23.9	42.1	30.7

<sup>1</sup> Includes other government insurance, not shown separately. Persons with coverage counted only once in total, even though they may have been covered by more than one type of policy. <sup>2</sup> Related to employment of self or other family members. <sup>3</sup> Beginning 1997 persons with no coverage other than access to Indian Health Service are no longer considered covered by health insurance; instead they are considered to be uninsured. The effect of this change on the overall estimates of health insurance coverage is negligible; however, the decrease in the number of people covered by Medicaid may be partially due to this change. <sup>4</sup> Estimates reflect results of follow-up verification questions. <sup>5</sup> Implementation of Census-2000-based population controls. Sample expanded by 28,000 households. <sup>6</sup> Persons of Hispanic origin may be any race.

**Table 146. Outpatient Prescription Drug Benefits: 2002**

[In percent. Based on National Compensation Survey, a sample survey of 2,924 private industry establishments of all sizes, representing over 103 million workers; Summary of coverage, all private industry workers. see Appendix III. See also Table 639]

Characteristic	All workers	White collar	Blue collar	Service
Total with outpatient prescription <sup>1</sup>	100	100	100	100
Coverage for brand name drugs	99	99	99	99
Higher reimbursement for generic drugs	83	84	78	90
Coverage for mail order drugs <sup>2</sup>	70	73	65	75
Prescription card plan	9	8	12	6
Higher reimbursement for formulary drugs	27	30	22	22
Not determinable	6	5	7	7

<sup>1</sup> Sum of individual items is greater than the total because some participants were in plans with more than one type of coverage. <sup>2</sup> Programs that provide drugs for maintenance purposes, that is, drugs required on a continuous basis.

Table 155. Adults 18 Years and Over Who Used Complementary and Alternative Medicine (CAM), by Type of Therapy: 2002

[In thousands (149,271 represents 149,721,000) The denominators for statistics shown exclude persons with unknown CAM information. Estimates were age adjusted to the year 2000 U.S. standard population using four age groups: 18 to 24 years, 25 to 44 years, 45 to 64 years, and 65 years and over]

Therapy	Used during past 12 months		Therapy	Used during past 12 months	
	Ever used			Ever used	
<b>Any CAM<sup>1</sup> use</b>	<b>149,271</b>	<b>123,606</b>	<b>Manipulative and body-based therapies:</b>		
Alternative medical systems:			Chiropractic care	40,242	15,226
Acupuncture	8,188	2,136	Massage	18,899	10,052
Ayurveda	751	154	<b>Mind-body therapies:</b>		
Homeopathic treatment	7,379	3,433	Biofeedback	1,986	278
Naturopathy	1,795	498	Meditation	20,698	15,336
<b>Biologically-based therapies:</b>			Guided imagery	6,067	4,194
Chelation therapy	270	(B)	Progressive relaxation	8,518	6,185
Folk medicine	1,393	233	Deep breathing exercises	29,658	23,457
Nonvitamin, nonmineral, natural products	50,613	38,183	Hypnosis	3,733	505
Diet-based therapies <sup>2</sup>	13,799	7,099	Yoga	15,232	10,386
Vegetarian diet	5,324	3,184	Tai chi	5,056	2,565
Macrobiotic diet	1,368	317	Qi gong	950	527
Atkins diet	7,312	3,417	Prayer for health reasons <sup>3</sup>	110,012	89,624
Pritikin diet	580	137	Prayed for own health	103,662	85,432
Ornish diet	290	(B)	Others ever prayed for your health	62,348	48,467
Zone diet	1,062	430	Participate in prayer group	25,167	18,984
Megavitamin therapy	7,935	5,739	Healing ritual for own health	9,230	4,045
			Energy healing therapy/Reiki	2,264	1,080

B Base figure too small to meet statistical standards for reliability of derived figures. <sup>1</sup> Respondents may have reported using more than one type of therapy. <sup>2</sup> The sum of the categories listed under "Diet-based therapies" are greater than the total number of "Diet-based therapies" because respondents could choose more than one diet-based therapy. The sum of the categories listed under "Prayer for health reasons" are greater than the total number of "Prayer for health reasons" because respondents could choose more than one method of prayer.

Table 156. Percent Distribution of Number of Visits to Health Care Professionals by Selected Characteristics: 2002 and 2003

[Covers ambulatory visits to doctor's offices and emergency departments, and home health care visits during a 12-month period. Based on the redesigned National Health Interview Survey, a sample survey of the civilian noninstitutionalized population. See Appendix III]

Characteristic	None		1-3 visits		4-9 visits		10 or more visits	
	2002	2003	2002	2003	2002	2003	2002	2003
All persons <sup>1</sup>	15.9	15.8	45.5	45.8	25.2	24.8	13.4	13.6
Age:								
Under 6 years	5.6	5.5	47.0	46.0	37.1	39.0	10.4	9.4
6-17 years	13.0	14.0	59.0	58.7	22.3	20.8	5.7	6.6
18-44 years	22.6	22.4	45.7	46.7	19.4	19.1	12.4	11.8
45-64 years	14.8	14.7	41.9	42.2	26.9	26.6	16.4	16.5
65-74 years	9.1	7.1	33.7	34.0	36.8	35.7	20.5	23.3
75 years and over	7.3	5.4	28.6	28.6	35.8	36.0	28.3	30.0
Sex: <sup>1</sup>								
Male	20.6	20.6	46.5	46.8	22.2	21.9	10.7	10.7
Female	11.4	11.1	44.5	44.9	28.0	27.7	16.1	16.3
Race: <sup>1, 2</sup>								
White only	15.6	15.7	45.1	45.6	25.4	25.1	13.8	13.6
Black only	15.3	14.7	45.8	45.8	26.0	25.2	13.0	14.3
American Indian or Alaska Native only	18.1	23.3	43.7	41.4	21.7	20.6	16.6	14.7
Asian only	21.2	22.6	49.7	47.8	20.3	20.7	8.8	8.9
Two or more races	13.5	11.1	43.7	44.9	27.3	23.0	15.4	21.0
Race and Hispanic origin: <sup>1</sup>								
Hispanic	25.7	25.3	41.5	42.9	21.1	20.3	11.7	11.5
White, non-Hispanic	14.0	13.5	45.8	46.2	26.1	26.1	14.2	14.2
Black, non-Hispanic	15.3	14.6	45.7	45.9	26.0	25.3	13.1	14.2

<sup>1</sup> Estimates are age adjusted to the year 2000 standard using six age groups: Under 18 years, 18-44 years, 45-54 years, 55-64 years, 65-74 years, and 75 years and over. <sup>2</sup> Estimates by race and Hispanic origin are tabulated using the 1997 Standards for Federal data on race and ethnicity. Estimates for specific race groups are shown when they meet requirements for statistical reliability and confidentiality. The categories "White only," "Black or African American only," "American Indian and Alaska Native (AI/AN) only," and "Asian only" include persons who reported only one racial group; and the category "2 or more races" includes persons who reported more than one of the five racial groups in the 1997 Standards or one of the five racial groups and "Some other race."

Table 160. Hospitals—Summary Characteristics: 1980 to 2003

[For beds, (1,365 represents 1,365,000). Covers hospitals accepted for registration by the American Hospital Association; see text, this section. Short-term hospitals have an average patient stay of less than 30 days; long-term, an average stay of longer duration. Special hospitals include obstetrics and gynecology; eye, ear, nose, and throat; rehabilitation; orthopedic; and chronic and other special hospitals except psychiatric, tuberculosis, alcoholism, and chemical dependency hospitals]

Table 163. Hospital Use Rates by Type of Hospital: 1980 to 2003

Type of hospital	1980	1990	1995	1999	2000	2001	2002	2003
Community hospitals: <sup>1</sup>								
Admissions per 1,000 population <sup>2</sup>	159	125	116	116	117	118	120	120
Admissions per bed	37	34	35	39	40	40	42	43
Average length of stay <sup>3</sup> (days)	7.6	7.2	6.5	5.9	5.8	5.7	5.7	5.7
Outpatient visits per admission	5.6	9.7	13.4	15.3	15.8	15.9	16.1	16.2
Outpatient visits per 1,000 population <sup>2</sup>	890	1,207	1,556	1,816	1,852	1,890	1,932	1,937
Surgical operations (million <sup>4</sup> )	18.8	21.9	23.2	26.3	26.1	26.5	27.6	27.1
Number per admission	0.5	0.7	0.7	0.8	0.8	0.8	0.8	0.8
Nonfederal psychiatric:								
Admissions per 1,000 population <sup>2</sup>	2.5	2.9	2.7	2.4	2.4	2.6	2.5	2.6
Days in hospital per 1,000 population <sup>2</sup>	295	190	122	94	93	94	92	91

<sup>1</sup> For definition of community hospitals, see footnote 2, Table 160. <sup>2</sup> Based on U.S. Census Bureau estimated resident population as of July 1. Estimates reflect revisions based on the 2000 Census of Population. <sup>3</sup> Number of inpatient days divided by number of admissions. <sup>4</sup> 18.8 represents 18,800,000.

Table 164. Hospital Utilization Rates by Sex: 1990 to 2003

[30,788 represents 30,788,000. Represents estimates of inpatients discharged from noninstitutional, short-stay hospitals, exclusive of federal hospitals. Excludes newborn infants. Based on sample data collected from the National Hospital Discharge Survey, a sample survey of hospital records of patients discharged in year shown; subject to sampling variability]

Item and Sex	1990	1995	1997	1998	1999	2000	2001	2002	2003
Patients discharged (1,000)	30,788	30,722	30,914	31,827	32,132	31,706	32,653	33,727	34,738
Patients discharged per 1,000 persons, total	122	116	114	117	117	114	115	118	120
Male	100	94	93	93	95	92	93	95	98
Female	143	136	135	139	138	135	137	139	141
Days of care per 1,000 persons, total <sup>1</sup>	784	620	582	589	581	560	562	572	578
Male	694	551	508	517	510	491	490	506	507
Female	869	686	653	658	649	627	631	635	646
Average stay (days)	6.4	5.4	5.1	5.1	5.0	4.9	4.9	4.9	4.8
Male	6.9	5.8	5.5	5.5	5.4	5.3	5.3	5.3	5.2
Female	6.1	5.0	4.8	4.7	4.7	4.6	4.6	4.6	4.6

<sup>1</sup> Rates are computed using Census Bureau estimates of the civilian population as of July 1, based on the 2000 census. Population estimates used to calculate rates for 2001-2003 were based on the 2000 census. Rates for 1991-2000 data were computed using postcensal estimates of the civilian population based on the 1990 census.

Table 169. **Hospital Utilization Measures for HIV Patients: 1990 to 2003**

[HIV represents human immunodeficiency virus. See headnote, Table 164]

Measure of utilization	Unit	1990	1995	2000	2001	2002	2003
Number of patients discharged	1,000	146	249	173	185	189	207
Rate of patient discharges <sup>1</sup>	Rate	5.8	9.4	6.2	6.5	6.6	7.2
Number of days of care	1,000	2,188	2,326	1,257	1,435	1,322	1,696
Rate of days of care <sup>1</sup>	Rate	86.9	87.6	45.2	50.6	46.0	58.6
Average length of stay	Days	14.9	9.3	7.3	7.8	7.0	8.2

<sup>1</sup> Per 10,000 population. Based on Census Bureau estimated civilian population as of July 1. Beginning in 1997, rates are based on civilian population estimates that have been adjusted for net underenumeration in the 1990 census. Population estimates for the 2000 census were first used to calculate rates in 2001. The 2000 population estimates were based on the 1990 census.

Table 182. **Persons with Limitation of Activity Caused by Chronic Conditions: 2000 to 2003**

[In percent. Limitation of activity is assessed by asking respondents a series of questions about limitations in their ability to perform activities usual for their age group because of a physical, mental, or emotional problem. Respondents are asked about limitations in activities of daily living, or instrumental activities of daily living, play, school, work, difficulty walking or remembering, and any other activity limitations. For reported limitations the causal health conditions are determined and respondents are considered limited if one or more of these conditions is chronic. Based on the National Health Interview Survey, a sample survey of the civilian noninstitutionalized population; see Appendix III]

Characteristic	2000	2001	2002	2003	Characteristic	2000	2001	2002	2003
Total <sup>1, 2</sup>	11.7	12.1	12.4	12.1	Male <sup>2</sup>	11.7	12.2	12.3	11.9
Under 18 years	6.0	6.7	7.1	6.9	Female <sup>2</sup>	11.5	11.9	12.3	12.2
18 to 44 years	5.8	6.1	6.3	6.0	White, non-Hispanic <sup>2</sup>	11.5	11.8	12.1	11.8

Table 183. **Persons 65 Years Old and Over With Limitation of Activity Caused by Chronic Conditions: 2000 to 2003**

[In percent. Covers noninstitutionalized persons 65 years old and over. To determine activities of daily living (ADL) limitations respondents were asked "Because of a physical, mental, or emotional problem, does (this person) need the help of other persons with personal care needs, such as eating, bathing, dressing, or getting around inside this home?" Instrumental activities of daily living (IADL) were determined by asking respondents "Because of a physical, mental, or emotional problem, does (this person) need the help of other persons in handling routine needs, such as everyday household chores, doing necessary business, shopping, or getting around for other purposes?" See also headline, Table 182]

Characteristic	Percent with ADL limitation				Percent with IADL limitation

Table 185. **Disabilities Tallied by Age Group and by State: 2003**

[In thousands (3,668 represents 3,668,000). Data are limited to the household population and exclude the population living in institutions, college dormitories, and other group quarters. A disability is a long-lasting physical, mental, or emotional condition. This condition can make it difficult for a person to do activities such as walking, climbing stairs, dressing, bathing, learning, or remembering. This condition can also impede a person from being able to go outside the home alone or to work at a job or business. Based on data from the 2003 American Community Survey (ACS). See text, Section 1 and Appendix III]

Table 188. Cancer—Estimated New Cases, 2005, and Survival Rates, 1980–1982 to 1995–2001

[1,373 represents 1,373,000. The 5-year relative survival rate, which is derived by adjusting the observed survival rate for expected mortality, represents the likelihood that a person will not die from causes directly related to their cancer within 5 years. Survival data shown are based on those patients diagnosed while residents of an area listed below during the time periods shown. Data are based on information collected as part of the National Cancer Institute's Surveillance, Epidemiology and End Results (SEER) program, a collection of population-based registries in Connecticut, New Mexico, Utah, Iowa, Hawaii, Atlanta, Detroit, Seattle-Puget Sound, and San Francisco-Oakland]

Table 194. Drug Use by Type of Drug and Age Group: 2002 and 2003

[In percent. The 2002 Survey changed names from the National Household Survey on Drug Abuse to National Household Survey on Drug Use and Health (NSDUH). Current users are those who used drugs at least once within month prior to this study. Based on a representative sample of the U.S. population age 12 and older, including persons living in households and in some group quarters such as dormitories and homeless shelters. Estimates are based on computer-assisted interviews of about 68,000 respondents. Subject to sampling variability; see source]

**Table 195. Estimated Use of Selected Drugs by State: 2002–2003**

[19,497 represents 19,497,000. Data in this table cover a two-year period. The 2002 survey changed names from the National Household Survey on Drug Abuse to National Household Survey on Drug Use and Health (NSDUH). Due to the impact of survey improvements, 2002 data should not be compared with data collected in 2001 or earlier years. Current users are those persons 12 years old and over who used drugs at least once within month prior to this study. Based on national sample of respondents (see also headnote, Table 194). The state estimates were produced by combining the prevalence rate based on the state sample data and the prevalence rate based on a national regression model applied to local-area county and census block group/tract-level estimates from the state. The parameters of the regression model are estimated from the entire national sample. For comparison purposes, the data shown here display estimates for all 50 States and the District of Columbia utilizing the modeled estimates for all 51 areas]

State	Estimated current users (1,000)					Current users as percent of population

<sup>1</sup> Any illicit drug indicates use at least once of marijuana/hashish, cocaine (including crack), inhalants, hallucinogens (including PCP and LSD), heroin, or any prescription-type psychotherapeutic used nonmedically. Any illicit drug other than marijuana indicates use at least once of any of these listed drugs, regardless of marijuana/hashish use; marijuana/hashish users who also have used any of the other listed drugs are included. <sup>2</sup> Binge use is defined as drinking five or more drinks on the same occasion on at least one day in the past 30 days. By "occasion" means at the same time or within a couple hours of each other.

Table 197. Age-adjusted Percent Distributions of Body Mass Index (BMI) Among Persons 18 Years Old and Over, by Selected Characteristics: 2003

[Body Mass Index (BMI) is a measure that adjusts body weight for height. It is calculated as weight in kilograms divided by height in meters squared. For both men and women, underweight is indicated by a BMI under 18.5; healthy weight is indicated by a BMI greater than or equal to 18.5 and less than 25; overweight is indicated by those who have a BMI equal to 25 and less than 30. Percent who are obese represent those who have a BMI equal to or above 30. BMI is calculated from the information respondents supplied in response to the questions in the survey regarding height and weight. Based on the National Health Interview Survey; for details, see Appendix III]

Selected characteristic			Above healthy weight		
	Underweight	Healthy weight	Total	Overweight	Obese
Total <sup>1</sup> (age-adjusted)	2.0	39.2	58.7	35.7	23.0
Total <sup>1</sup> (crude)	2.0	39.0	59.0	35.8	23.2
Age: <sup>2</sup>					
18 to 44 years	2.5	43.6	53.9	33.2	20.7
45 to 64 years	0.9	31.8	67.2	38.5	28.7
65 to 74 years	1.6	33.3	65.1	39.9	25.2
75 years and over	3.7	43.7	52.6	37.3	15.3
Sex:					
Male	0.9	32.2	66.8	44.1	22.7
Female	3.0	46.1	50.9	27.6	23.3
Race:					
White alone <sup>3</sup>	2.0	39.5	58.5	36.3	22.2
Black or African American alone <sup>3</sup>	1.1	30.2	68.7	35.1	33.6
American Indian or Alaska Native alone <sup>3</sup>	<sup>4</sup> 2.9	31.9	65.2	33.8	31.4
Asian alone <sup>3</sup>	6.2	63.2	30.7	24.8	5.9
Native Hawaiian or other Pacific Islander alone <sup>3</sup>	-	<sup>4</sup> 32.1	67.9	42.2	<sup>4</sup> 25.7
2 or more races <sup>5</sup>	<sup>4</sup> 2.1	39.6	58.3	31.4	26.9
Hispanic or Latino origin status <sup>6</sup> :					
Hispanic or Latino	1.1	33.9	65.0	39.8	25.2
Not Hispanic or Latino	2.2	39.9	57.9	35.2	22.7
Education: <sup>7</sup>					
Less than a high school diploma	1.8	32.3	65.9	37.7	28.2
High school diploma or GED	1.5	33.6	64.9	37.9	27.0
Some college	1.8	34.6	63.6	36.3	27.3
Bachelor's degree or higher	1.6	44.4	54.0	37.1	16.9

- Represents zero.

<sup>1</sup> Total includes other races not shown separately and persons with unknown characteristics. <sup>2</sup> Estimates for age groups are not age adjusted. <sup>3</sup> Refers to persons who indicated only a single race group. <sup>4</sup> Base figure too small to meet statistical standards for reliability of a derived figure. <sup>5</sup> The "two or more races" refers to all persons who indicated more than one race group. <sup>6</sup> Persons of Hispanic origin may be of any race. <sup>7</sup> Education is shown only for persons 25 years old and over.

**Table 199. Households and Persons Having Problems With Access to Food: 2000 to 2003**

[106,043 represents 106,043,000. Food secure means that a household had access at all times to enough food for an active healthy life for all household members, with no need for recourse to socially unacceptable food sources or extraordinary coping behaviors to meet their basic food needs. Food insecure households had limited or uncertain ability to acquire acceptable foods in socially acceptable ways. Food insecure households with hunger were those with one or more household members who were hungry at least sometime during the period due to inadequate resources for food. The omission of homeless persons may be a cause of underreporting. The severity of food insecurity and hunger in households is measured through a series of questions about experiences and behaviors known to characterize households that are having difficulty meeting basic food needs. These experiences and behaviors generally occur in an ordered sequence as the severity of food insecurity increases. As resources become more constrained, adults in typical households first worry about having enough food, then they stretch household resources and juggle other necessities, then decrease the quality and variety of household members' diets, then decrease the frequency and quantity of adults' food intake, and finally decrease the frequency and quantity of children's food intake. All questions refer to the previous 12 months and include a qualifying phrase reminding respondents to report only those occurrences that resulted from inadequate financial resources. Restrictions to food intake due to dieting or busy schedules are excluded. Data are from the Food Security Supplement to the Current Population Survey (CPS); for details about the CPS, see text, Section 1 and Appendix III]

Household food security level	Number (1,000)				Percent distribution			
	2000	2001	2002	2003	2000	2001	2002	2003
<b>Households, total</b> . . . . .	<b>106,043</b>	<b>107,824</b>	<b>108,601</b>	<b>112,214</b>	<b>100.0</b>	<b>100.0</b>	<b>100.0</b>	<b>100.0</b>
Food secure . . . . .	94,942	96,303	96,543	99,631	89.5	89.3	88.9	88.8
Food insecure . . . . .	11,101	11,521	12,058	12,583	10.5	10.7	11.1	11.2

## Section 4

# Education

---

This section presents data primarily concerning formal education as a whole, at various levels, and for public and private schools. Data shown relate to the school-age population and school enrollment, educational attainment, education personnel, and financial aspects of education. In addition, data are shown for charter schools, computer usage in schools, distance education, and adult education. The chief sources are the decennial census of population and the Current Population Survey (CPS), both conducted by the U.S. Census Bureau (see text, Section 1, Population); annual, biennial, and other periodic surveys conducted by the National Center for Education Statistics (NCES), a part of the U.S. Department of Education; and surveys conducted by the National Education Association.

The censuses of population have included data on school enrollment since 1840 and on educational attainment since 1940. The CPS has reported on school enrollment annually since 1945 and on educational attainment periodically since 1947.

The NCES is continuing the pattern of statistical studies and surveys conducted by the U.S. Office of Education since 1870. The annual *Digest of Education Statistics* provides summary data on pupils, staff, finances, including government expenditures, and organization at the elementary, secondary, and higher education levels. It is also a primary source for detailed information on federal funds for education, projections of enrollment, graduates, and teachers. *The Condition of Education*, issued annually, presents a summary of information on education of particular interest to policymakers. NCES also conducts special studies periodically.

The census of governments, conducted by the Census Bureau every 5 years (for the years ending in "2" and "7"), provides data on school district finances and state and local government expenditures for education. Reports published by the

Bureau of Labor Statistics contain data relating civilian labor force experience to educational attainment (see also Tables 580, 607, and 615 in Section 12, Labor Force, Employment, and Earnings).

**Types and sources of data**—The statistics in this section are of two general types. One type, exemplified by data from the Census Bureau, is based on direct interviews with individuals to obtain information about their own and their family members' education. Data of this type relate to school enrollment and level of education attained, classified by age, sex, and other characteristics of the population. The school enrollment statistics reflect attendance or enrollment in any regular school within a given period; educational attainment statistics reflect the highest grade completed by an individual, or beginning 1992, the highest diploma or degree received.

Beginning in 2001, the CPS used Census 2000 population controls. From 1994 to 2000, the CPS used 1990 census population controls plus adjustment for undercount. Also the survey changed from paper to computer-assisted technology. For years 1981 through 1993, 1980 census population controls were used; 1971 through 1980, 1970 census population controls had been used. These changes had little impact on summary measures (e.g., medians) and proportional measures (e.g., enrollment rates); however, use of the controls may have significant impact on absolute numbers.

The second type, generally exemplified by data from the NCES and the National Education Association, is based on reports from administrators of educational institutions and of state and local agencies having jurisdiction over education. Data of this type relate to enrollment, attendance, staff, and finances for the nation, individual states, and local areas.

Unlike the NCES, the Census Bureau does not regularly include specialized vocational, trade, business, or correspondence schools in its surveys. The NCES includes nursery schools and kindergartens that are part of regular grade schools in their enrollment figures. The Census Bureau includes all nursery schools and kindergartens. At the higher education level, the statistics of both agencies are concerned with institutions granting degrees or offering work acceptable for degree-credit, such as junior colleges.

**School attendance**—All states require that children attend school. While state laws vary as to the ages and circumstances of compulsory attendance, generally they require that formal schooling begin by age 6 and continue to age 16.

**Schools**—The NCES defines a school as "a division of the school system consisting of students composing one or more grade groups or other identifiable groups, organized as one unit with one or more teachers to give instruction of a defined type, and housed in a school plant of one or more buildings. More than one school may be housed in one school plant, as is the case when the elementary and secondary programs are housed in the same school plant."

*Regular* schools are those which advance a person toward a diploma or degree. They include public and private nursery schools, kindergartens, graded schools, colleges, universities, and professional schools.

*Public* schools are schools controlled and supported by local, state, or federal governmental agencies; private schools are those controlled and supported mainly by religious organizations or by private persons or organizations.

The Census Bureau defines *elementary* schools as including grades 1 through 8; *high* schools as including grades 9 through 12; and *colleges* as including junior or community colleges, regular 4-year colleges, and universities and graduate or professional schools. Statistics reported by the NCES and the National Education Association by type of organization, such as elementary level and secondary level, may not be strictly comparable with those from the Census Bureau because the grades included at the two levels vary, depending on the level assigned to the middle or junior high school by the local school systems.

**School year**—Except as otherwise indicated in the tables, data refer to the school year which, for elementary and secondary schools, generally begins in September of the preceding year and ends in June of the year stated. For the most part, statistics concerning school finances are for a 12-month period, usually July 1 to June 30. Enrollment data generally refer to a specific point in time, such as fall, as indicated in the tables.

**Statistical reliability**—For a discussion of statistical collection, estimation, and sampling procedures and measures of statistical reliability applicable to the Census Bureau and the NCES data, see Appendix III.

Table 204. School Enrollment: 1970 to 2013

[In thousands (59,838 represents 59,838,000). As of fall. Based on survey of state education agencies; see source for details]

Year	Total	All levels		Pre-K through grade 8		Grades 9 through 12		College <sup>1</sup>	
		Public	Private	Public	Private	Public	Private	Public	Private
1970	59,838	52,322	7,516	32,558	4,052	13,336	1,311	6,428	2,153

Table 205. School Expenditures by Type of Control and Level of Instruction in Constant (2001–2002) Dollars: 1960 to 2002

[In millions of dollars (144,699 represents \$144,699,000,000). For school years ending in year shown. Total expenditures for public elementary and secondary schools include current expenditures, interest on school debt and capital outlay. Data deflated by the Consumer Price Index, wage earners, and clerical workers through 1975; thereafter, all urban consumers, on a school-year basis (supplied by the National Center for Education Statistics). See also Appendix III. Based on survey of state education agencies; see source for details]

Year		Elementary and secondary schools			Colleges and universities <sup>2</sup>

NA Not available. <sup>1</sup> Includes races not shown separately. <sup>2</sup> Beginning 2003 for persons who selected this race group only. See footnote 2, Table 214. <sup>3</sup> Persons of Hispanic origin may be of any race. The method of identifying Hispanic children was changed in 1980 from allocation based on status of mother to status reported for each child. The number of Hispanic children using the new method is larger.

<sup>1</sup> Percent of persons 5-17 years old. Based on enumerated resident population as of April 1, 1980 and 1990, and estimated resident population as of July 1 for 2000 and 2002.

Source: U.S. National Center for Education Statistics, *Digest of Education Statistics*, annual.

Table 233. **Public School Districts With Alternative Schools or Programs for at-Risk Students: 2000–2001**

[For the school year. Alternative schools and programs are designed to address the needs of students that typically cannot be met in regular schools. The schools and programs in data shown here serve students who are typically at risk for educational failure (as indicated by poor grades or truancy, for example). Alternative schools are usually housed in a separate facility where students are removed from regular schools. Alternative programs are usually housed within regular schools. Based on the Fast Response Survey System; see source for details]

District characteristic	Percent of districts with schools or programs	Percent distribution of districts with schools or programs by—						
		Number of schools or programs			Percent of district students enrolled			
		One	Two	Three or more	Less than 1 percent	1 to 1.99 percent	2 to 2.99 percent	3 percent or more
<b>Total</b> . . . . .	<b>39</b>	<b>65</b>	<b>18</b>	<b>17</b>	<b>43</b>	<b>27</b>	<b>14</b>	<b>16</b>

Table 248. Distance Education in Public Elementary and Secondary Schools: 2002-03

[For the school year. Distance education courses are for-credit classes offered to students enrolled in the district where the teacher and student were in different locations. They could be delivered via audio, video, Internet or other computer technologies. Reasons for districts providing these courses include providing courses not otherwise available, offering Advanced Placement courses, addressing growing populations and space limitations, reducing scheduling conflicts for students, and permitting students who failed a course to take the course again. Excludes such things as virtual field trips, online homework, or a course delivered mainly by written correspondence. Based on the Fast Response Survey System and subject to sampling error; see source for details]

NA Not available. <sup>1</sup> Number of institutions includes count of branch campuses. Due to revised survey procedures, data beginning 1998 reflect a new classification of institutions; this classification includes some additional, primarily 2-year, colleges and excludes a few institutions that did not award degrees. Includes institutions that were eligible to participate in Title IV federal financial aid programs. <sup>2</sup> Due to revised survey methods, data beginning 1990 not comparable with previous years. <sup>3</sup> Branch campuses counted according to actual status, e.g., 2-year branch in 2-year category. <sup>4</sup> Includes unclassified students. (Students taking courses for credit, but are not candidates for degrees.) <sup>5</sup> Includes items not shown separately. <sup>6</sup> Includes schools accredited by the National Association of Trade and Technical Schools. See footnote 1 for information pertaining to data beginning 1998.

Table 273. Undergraduates Reported Disability Status by Selected Characteristic: 1999–2000

[In percent. Persons with any disability or difficulty include those who indicated they had a long-lasting condition, such as blindness or deafness; or a condition substantially limiting a basic physical activity, such as walking or lifting; or a physical, emotional, or mental condition lasting six months or more which made it difficult to do any one of the following: get to school, get around campus, learn, dress, or work at a job. Based on the 1999-2000 National Postsecondary Student Aid Survey; see source and Appendix III for details]

Student characteristic	Any disability or difficulty reported	None reported	Consider self with disability	Don't consider self with disability
Total	9.3	90.7	3.6	96.4

## Law Enforcement, Courts, and Prisons

This section presents data on crimes committed, victims of crimes, arrests, and data related to criminal violations and the criminal justice system. The major sources of these data are the Bureau of Justice Statistics (BJS), the Federal Bureau of Investigation (FBI), and the Administrative Office of the U.S. Courts. BJS issues several reports, including *Sourcebook of Criminal Justice Statistics*, *Criminal Victimization in the United States*, *Prisoners in State and Federal Institutions*, *Census of State Correctional Facilities and Survey of Prison Inmates*, *Census of Jails and Survey of Jail Inmates*, *Parole in the United States*, *Capital Punishment*, and the annual *Expenditure and Employment Data for the Criminal Justice System*. The Federal Bureau of Investigation's major annual reports are *Crime in the United States*, *Law Enforcement Officers Killed and Assaulted*, annual, and *Hate Crimes*, annual, which presents data on reported crimes as gathered from state and local law enforcement agencies.

**Legal jurisdiction and law enforcement**—Law enforcement is, for the most part, a function of state and local officers and agencies. The U.S. Constitution reserves general police powers to the states. By act of Congress, federal offenses include only offenses against the U.S. government and against or by its employees while engaged in their official duties and offenses which involve the crossing of state lines or an interference with interstate commerce. Excluding the military, there are 52 separate criminal law jurisdictions in the United States: 1 in each of the 50 states, 1 in the District of Columbia, and the federal jurisdiction. Each of these has its own criminal law and procedure and its own law enforcement agencies. While the systems of law enforcement are quite similar among the states, there are often substantial differences in the penalties for like offenses.

Law enforcement can be divided into three parts: Investigation of crimes and

arrests of persons suspected of committing them; prosecution of those charged with crime; and the punishment or treatment of persons convicted of crime.

**Crime**—There are two major approaches taken in determining the extent of crime. One perspective is provided by the FBI through its Uniform Crime Reporting Program (UCR). The FBI receives monthly and annual reports from law enforcement agencies throughout the country, currently representing 93 percent of the national population. Each month, city police, sheriffs, and state police file reports on the number of index offenses, hate crimes and law enforcement assaults that become known to them. Additionally, data are collected for officers killed in the line of duty.

The FBI Crime Index offenses are as follows: *Murder and nonnegligent manslaughter* is based on police investigations, as opposed to the determination of a medical examiner or judicial body, includes willful felonious homicides and excludes attempts and assaults to kill, suicides, accidental deaths, justifiable homicides, and deaths caused by negligence; *forcible rape* includes forcible rapes and attempts; *robbery* includes stealing or taking anything of value by force or violence or threat of force or violence and includes attempted robbery; *aggravated assault* includes assault with intent to kill; *burglary* includes any unlawful entry to commit a felony or a theft and includes attempted burglary and burglary followed by larceny; *larceny* includes theft of property or articles of value without use of force and violence or fraud and excludes embezzlement, "con games," forgery, etc.; *motor vehicle theft* includes all cases where vehicles are driven away and abandoned but excludes vehicles taken for temporary use and returned by the taker. Arson was added as the eighth Index offense in April 1979 following a Congressional mandate. *Arson* includes any willful or malicious burning

or attempt to burn, with or without intent to defraud, a dwelling house, public building, motor vehicle or aircraft, personal property of another, etc.

The monthly Uniform Crime Reports also contain data on crimes cleared by arrest and on characteristics of persons arrested for all criminal offenses. In summarizing and publishing crime data, the FBI depends primarily on the adherence to the established standards of reporting for statistical accuracy, presenting the data as information useful to persons concerned with the problem of crime and criminal law enforcement.

**National Crime Victimization Survey (NCVS)**—A second perspective on crime is provided by this survey of the Bureau of Justice Statistics. Details about the crimes come directly from the victims. No attempt is made to validate the information against police records or any other source.

The NCVS measures rape, robbery, assault, household and personal larceny, burglary, and motor vehicle theft. The NCVS includes offenses reported to the police, as well as those not reported.

Police reporting rates (percent of victimizations) varied by type of crime. In 2003, for instance, 33 percent of rapes/ sexual assaults were reported; 61 percent of robberies; 46 percent of assaults; 32 percent of personal thefts; 54 percent of household burglaries; and 77 percent of motor vehicle thefts.

Murder and kidnapping are not covered. Commercial burglary and robbery were dropped from the program during 1977. The so-called victimless crimes, such as drunkenness, drug abuse, and prostitution, also are excluded, as are crimes for which it is difficult to identify knowledgeable respondents or to locate data records.

Crimes of which the victim may not be aware also cannot be measured effectively. Buying stolen property may fall into this category, as may some instances of embezzlement. Attempted crimes of many types probably are under recorded

for this reason. Events in which the victim has shown a willingness to participate in illegal activity also are excluded.

In any encounter involving a personal crime, more than one criminal act can be committed against an individual. For example, a rape may be associated with a robbery, or a household offense, such as a burglary, can escalate into something more serious in the event of a personal confrontation. In classifying the survey-measured crimes, each criminal incident has been counted only once—by the most serious act that took place during the incident and ranked in accordance with the seriousness classification system used by the Federal Bureau of Investigation. The order of seriousness for crimes against persons is as follows: Rape, robbery, assault, and larceny. Personal crimes take precedence over household offenses.

A *victimization*, basic measure of the occurrence of crime, is a specific criminal act as it affects a single victim. The number of victimizations is determined by the number of victims of such acts. Victimization counts serve as key elements in computing rates of victimization. For crimes against persons, the rates are based on the total number of individuals age 12 and over or on a portion of that population sharing a particular characteristic or set of traits. As general indicators of the danger of having been victimized during the reference period, the rates are not sufficiently refined to represent true measures of risk for specific individuals or households.

An *incident* is a specific criminal act involving one or more victims; therefore the number of incidents of personal crimes is lower than that of victimizations.

**Courts**—Statistics on criminal offenses and the outcome of prosecutions are incomplete for the country as a whole, although data are available for many states individually. The only national compilations of such statistics were made by the Census Bureau for 1932 to 1945 covering a maximum of 32 states and by the Bureau of Justice Statistics for 1986, 1988, 1990, and 1992 based on a nationally representative sample survey.

The bulk of civil and criminal litigation in the country is commenced and determined in the various state courts. Only when the U.S. Constitution and acts of Congress specifically confer jurisdiction upon the federal courts may civil or criminal litigation be heard and decided by them. Generally, the federal courts have jurisdiction over the following types of cases: Suits or proceedings by or against the United States; civil actions between private parties arising under the Constitution, laws, or treaties of the United States; civil actions between private litigants who are citizens of different states; civil cases involving admiralty, maritime, or prize jurisdiction; and all matters in bankruptcy. The Administrative Office of the United States Courts has compiled statistics on the caseload of the federal courts annually since 1940.

There are several types of courts with varying degrees of legal jurisdiction. These jurisdictions include original, appellate, general, and limited or special. A court of original jurisdiction is one having the authority initially to try a case and pass judgment on the law and the facts; a court of appellate jurisdiction is one with the legal authority to review cases and hear appeals; a court of general jurisdiction is a trial court of unlimited original jurisdiction in civil and/or criminal cases, also called a "major trial court"; a court of limited or special jurisdiction is a trial court with legal authority over only a particular class of cases, such as probate, juvenile, or traffic cases.

The 94 federal courts of original jurisdiction are known as the U.S. district courts. One or more of these courts is established in every state and one each in the District of Columbia, Puerto Rico, the Virgin Islands, the Northern Mariana Islands, and Guam. Appeals from the district courts are taken to intermediate appellate

courts of which there are 13, known as U.S. courts of appeals and the United States Court of Appeals for the Federal Circuit. The Supreme Court of the United States is the final and highest appellate court in the federal system of courts.

**Juvenile offenders**—For statistical purposes, the FBI and most states classify as juvenile offenders persons under the age of 18 years who have committed a crime or crimes.

Delinquency cases are all cases of youths referred to a juvenile court for violation of a law or ordinance or for seriously "antisocial" conduct. Several types of facilities are available for those adjudicated delinquents, ranging from the short-term physically unrestricted environment to the long-term very restrictive atmosphere.

**Prisoners**—Data on prisoners in federal and state prisons and reformatories were collected annually by the Census Bureau until 1950, by the Federal Bureau of Prisons until 1971, transferred then to the Law Enforcement Assistance Administration, and, in 1979, to the Bureau of Justice Statistics. Adults convicted of criminal activity may be given a prison or jail sentence. A *prison* is a confinement facility having custodial authority over adults sentenced to confinement of more than 1 year. A *jail* is a facility, usually operated by a local law enforcement agency, holding persons detained pending adjudication and/or persons committed after adjudication to 1 year or less. Nearly every state publishes annual data either for its whole prison system or for each separate state institution.

**Statistical reliability**—For discussion of statistical collection, estimation and sampling procedures, and measures of statistical reliability pertaining to the National Crime Victimization Survey and Uniform Crime Reporting Program, see Appendix III.

**Table 293. Crimes and Crime Rates by Type of Offense: 1980 to 2003**

[1,345 represents 1,345,000. Data refer to offenses known to the police. Rates are based on Census Bureau estimated resident population as of July 1; 1980, 1990 and 2000, enumerated as of April 1. See source for details. For definitions of crimes, see text, this section.]

Item and year	Violent crime					Property crime

Wyoming . . . . .	273	262	3	27	17	216	3,307	3,321	521	2,641	159

<sup>1</sup> Includes nonnegligent manslaughter. <sup>2</sup> Forcible rape figures furnished by the state-level uniform crime reporting (UCR) program administered by the Delaware State Bureau of Investigation were not in accordance with the national UCR guidelines; therefore, it was necessary that the forcible rape count be estimated. <sup>3</sup> Includes offenses reported by the police at the National Zoo. <sup>4</sup> Complete data were not available; therefore, it was necessary for the crime counts to be estimated for Illinois, Kansas, Kentucky, and Montana for all years shown.

2002	17,638	6,282	2,403	6,896	1,391	6.1	5.4	2.0	38.4	7.0		

<sup>1</sup> Includes races not shown separately. <sup>2</sup> Rate based on enumerated population figures as of April 1 for 1980, 1990 and 2000; July 1 estimates for other years. <sup>3</sup> Effective with data for 1999, causes of death are classified by The Tenth Revision International Classification of Diseases (ICD-10), replacing the Ninth Revision (ICD-9) used for 1979-98 data. Breaks in the comparability of some cause of death statistics result from changes in category titles, changes in the structure and content of the classification, and changes in coding rules used to select the underlying cause of death. In ICD-9, the category Homicide also includes death as a result of legal intervention. ICD-10 has two separate categories for these two causes of death. Some caution should be used in comparing data between 1998 and 1999.

Table 310. Criminal Victimizations by Age of Victim: 1993-2002

[In percent. Covers period 1993 to 2002. Offender characteristics are based on victim's perception. See source for details. For definitions of crimes, see text, this section.]

Characteristic	Age of victim		Characteristic	Age of victim	
	12-64 years old	65 years old or older		12-64 years old	65 years old or older
NONFATAL VIOLENT VICTIMIZATIONS					
Victims facing weapons	25.7	30.2	Boyfriend/girlfriend	5.9	10.6
Firearm	9.4	12.7	Own child	0.9	2.6
Knife	6.3	6.4	Other relatives	4.0	4.1
Other type	8.7	9.3	Well-known person	15.8	13.9
Don't know type	1.2	1.8	Casual acquaintance	18.2	15.7
Victims resisting	71.0	55.5	Stranger	46.3	52.5
Threatened/attacked with weapon	2.2	2.5	Don't know relationship	3.7	8.2
Threatened/attacked without weapon	27.9	15.3	Age 30 or older	30.2	48.3
Nonconfrontational resistance	29.5	24.9	Male	78.6	75.6
Other or unknown type	11.3	12.9	CHARACTERISTICS OF CRIMES		
Victims not resisting	29.0	44.5	Occurring at night:		
Victims injured	25.9	21.8	Violence	45.8	27.2
Serious injury	3.3	2.8	Personal theft	34.4	14.8
Minor injury	21.2	18.7	Property crimes	29.2	20.9
Rape without injury	1.2	0.3	Occurring at/near home:		
CHARACTERISTIC OF OFFENDER			Violence	27.0	45.5
Relationship to victim:			Personal theft	5.4	5.8
Known to victim	31.7	23.6	Property crimes	54.3	67.0
Spouse/exspouse	5.1	2.4	Crime reported to police:		
			Violence	43.9	53.0
			Personal theft	32.1	42.3
			Property crimes	34.7	35.5

<sup>1</sup> Based on 10 or fewer sample cases.

Table 331. **Delinquency Cases and Case Rates by Sex and Race: 1992 to 2000**

[A delinquency offense is an act committed by a juvenile for which an adult could be prosecuted in a criminal court. Disposition of a case involves taking a definite action such as waiving the case to criminal court, dismissing the case, placing the youth on probation, placing the youth in a facility for delinquents, or such actions as fines, restitution, and community service. Offenses may not add to total sex and race categories due to rounding]

**Table 332. Child Abuse and Neglect Cases Substantiated and Indicated—Victim Characteristics: 1990 to 2003**

[Based on reports alleging child abuse and neglect that were referred for investigation/assessment by the respective child protective services agency in each state. The reporting period may be either calendar or fiscal year. Children are counted each time they were subjects of an investigation report. Victims are children whose alleged maltreatments have been substantiated, indicated, or assessed as maltreatments. A substantiated case represents a type of investigation disposition that determines that there is sufficient evidence under state law to conclude that maltreatment occurred or that the child is at risk of maltreatment. An indicated case represents a type of disposition that concludes that there was a reason to suspect maltreatment had occurred. An alternative response-victim case represents a type of disposition that identifies a child as a victim within the alternative response system]

ITEM	1990		2000		2002		2003	
	Number	Percent	Number	Percent	Number	Percent	Number	Percent
<b>TYPES OF SUBSTANTIATED MALTREATMENT</b>

- Represents or rounds to zero NA Not available. <sup>1</sup> State-level data excludes Federal inmates. <sup>2</sup> Includes both jail and prison inmates (State has combined jail and prison system). <sup>3</sup> Numbers are for custody rather than jurisdiction counts. <sup>4</sup> The transfer of responsibility for sentenced felons from the District of Columbia to the Federal System was completed by year-end 2001. Since June 30, 2000, the inmate population in the District of Columbia has dropped by 5825 inmates. Approximately 58% of the growth in the Federal System in the last 6 months of 2001 was the result of this transfer of responsibility. <sup>5</sup> 1990, data are for custody counts; thereafter, jurisdiction counts are reported.

## Section 6

# Geography and Environment

---

This section presents a variety of information on the physical environment of the United States, starting with basic area measurement data and ending with climatic data for selected weather stations around the country. The subjects covered between those points are mostly concerned with environmental trends but include related subjects such as land use, water consumption, air pollutant emissions, toxic releases, oil spills, hazardous waste sites, municipal waste and recycling, threatened and endangered wildlife, and the environmental industry.

The information in this section is selected from a wide range of federal agencies that compile the data for various administrative or regulatory purposes, such as the Environmental Protection Agency (EPA), U.S. Geological Survey (USGS), National Oceanic and Atmospheric Administration (NOAA), Natural Resources Conservation Service (NRCS), and General Services Administration (GSA). New information on hazardous waste generation and shipment by state and federal funding for several environmental programs may be found in Tables 370 and 371.

**Area**—For the 2000 census, area measurements were calculated by computer based on the information contained in a single, consistent geographic database, the Topologically Integrated Geographic Encoding & Referencing system (TIGER®) database, rather than relying on historical, local, and manually calculated information. Information from the 2000 census may be found in Table 346.

**Geography**—The USGS conducts investigations, surveys, and research in the fields of geography, geology, topography, geographic information systems, mineralogy, hydrology, and geothermal energy resources as well as natural hazards. The USGS provides United States cartographic

data through the Earth Sciences Information Center, water resources data through the National Water Data Exchange (NAWDEX), and a variety of research and Open-File reports which are announced monthly in *New Publications of the USGS*.

In a joint project with the U.S. Census Bureau, during the 1980s, the USGS provided the basic information on geographic features for input into a national geographic and cartographic database prepared by the Census Bureau, called TIGER® database. Since then, using a variety of sources, the Census Bureau has updated these features and their related attributes (names, descriptions, etc.) and inserted current information on the boundaries, names, and codes of legal and statistical geographic entities; very few of these updates added aerial water features. Maps prepared by the Census Bureau using the TIGER® database show the names and boundaries of entities and are available on a current basis.

The U.S. Census Bureau uses the Boundary and Annexation Survey to maintain a current inventory of government units and their legal boundaries. The information is available to the public online. There are also several series of maps for Census 2000: P.L. County Block Maps, Census Tract Outline Maps, and Voting District/State Legislative District Outline Maps. These maps can be obtained online via the American Fact-Finder®.

An inventory of the nation's land resources by type of use/cover was conducted by the National Resources Inventory Conservation Service every 5 years beginning in 1977. The most recent survey results, which were published in the 1997 National Resources Inventory, cover

all nonfederal land in Puerto Rico, the Virgin Islands, and the United States except Alaska. Tables 349 to 351 provide results from the survey. Beginning with the release of the 2001 estimates, this program will shift to become an annual release of land use data.

**Environment**—The principal federal agency responsible for pollution abatement and control activities is the Environmental Protection Agency (EPA). It is responsible for establishing and monitoring national air quality standards, water quality activities, solid and hazardous waste disposal, and control of toxic substances. Many of these series now appear in the Envirofacts portion of the EPA Web site at <<http://www.epa.gov/enviro/>>. In 2003, EPA released a major compilation of environmental indicators, entitled *Draft Report on the Environment: 2003*, found at <<http://www.epa.gov/indicators/roe/hlm/roeTOC.htm>>. A new series of reports (technical, public, and electronic) are planned for 2006.

National Ambient Air Quality Standards (NAAQS) for suspended particulate matter, sulfur dioxide, photochemical oxidants, carbon monoxide, and nitrogen dioxide were originally set by the EPA in April 1971. Every 5 years, each of the NAAQS is reviewed and revised to include any additional or new health or welfare data. The standard for photochemical oxidants, now called ozone, was revised in February 1979. Also, a new NAAQS for confining lead was promulgated in October 1978 and for suspended particulate matter in 1987. Table 359 gives some of the health-related standards for the six air pollutants having NAAQS. Data gathered from state networks are periodically submitted to EPA's National Aerometric Information Retrieval System (AIRS) for summarization in annual reports on the nationwide status and trends in air quality. For details, see *National Air Quality and Emissions Trends Report*. More current information on emissions may be found on the EPA Web site at <<http://www.epa.gov/airtrends>>.

The Toxics Release Inventory (TRI), published by the EPA, is a valuable source of information on nearly 650 chemicals that are being used, manufactured, treated,

transported, or released into the environment. Sections 313 of the Emergency Planning and Community Right-To-Know Act (EPCRA) and 6607 of the Pollution Prevention Act (PPA), mandate that a publicly-accessible toxic chemical database be developed and maintained by EPA. This database, known as the TRI, contains information concerning waste management activities and the release of toxic chemicals by facilities that manufacture, process, or otherwise use said materials. Data on the release of these chemicals are collected from over 23,000 facilities and facilities added in 1998 that have the equivalent of 10 or more full-time employees and meet the established thresholds for manufacturing, processing, or "other use" of listed chemicals. Facilities must report their releases and other waste management quantities. Since 1994 federal facilities have been required to report their data regardless of industry classification. In May 1997, EPA added seven new industry sectors that reported to the TRI for the first time in July 1999 for the 1998 reporting year.

**Climate**—NOAA, through the National Weather Service and the National Environmental Satellite, Data, and Information Service, is responsible for climate data. NOAA maintains about 11,600 weather stations, of which over 3,000 produce autographic precipitation records, about 600 take hourly readings of a series of weather elements, and the remainder record data once a day. These data are reported monthly in the Climatological Data and Storm Data, published monthly and annually in the Local Climatological Data (published by location for major cities).

The normal climatological temperatures, precipitation, and degree days listed in this publication are derived for comparative purposes and are averages for the 30-year period, 1971–2000. For stations that did not have continuous records for the entire 30 years from the same instrument site, the normals have been adjusted to provide representative values for the current location. The information in all other tables is based on data from the beginning of the record at that location through 2003.

Table 347. Land and Water Area of States and Other Entities: 2000

[One square mile = 2.59 square kilometers. Area is calculated from the specific boundary recorded for each entity in the U.S. Census Bureau's geographic TIGER database]

State and other area	Total area		Land area		Water area					
	Sq. mi.	Sq. km.	Sq. mi.	Sq. km.	Total		Inland (sq. mi.)	Coastal (sq. mi.)	Great Lakes (sq. mi.)	Terri- torial (sq. mi.)

Table 353. U.S. Wetland Resources and Deepwater Habitats by Type: 1986 and 1997

[In thousands of acres (144,673.3 represents 144,677,300). Wetlands and deepwater habitats are defined separately because the term wetland does not include permanent water bodies. Deepwater habitats are permanently flooded land lying below the deepwater boundary of wetlands. Deepwater habitats include environments where surface water is permanent and often deep, so that water, rather than air, is the principal medium within which the dominant organisms live, whether or not they are attached to the substrate. As in wetlands, the dominant plants are hydrophytes; however, the substrates are considered nonsoil because the water is too deep to support emergent vegetation. In general terms, wetlands are lands where saturation with water is the dominant factor determining the nature of soil development and the types of plant and animal communities living in the soil and on its surface. The single feature that most wetlands share is soil or substrate that is at least periodically saturated with or covered by water. Wetlands are lands transitional between terrestrial and aquatic systems where the water table is usually at or near the surface or the land is covered by shallow water]

Wetland or deepwater category	1986	1997	Change, 1986 to 1997
All wetlands and deepwater habitats, total	144,673.3	144,136.8	-536.5
All deepwater habitats, total	38,537.6	38,645.1	107.5
Lacustrine <sup>1</sup>	14,608.9	14,725.3	116.4
Riverine <sup>2</sup>	6,291.1	6,255.9	-35.2
Estuarine Subtidal <sup>3</sup>	17,637.6	17,663.9	26.3
All wetlands, total	106,135.7	105,491.7	-644.0
Intertidal wetlands <sup>4</sup>	5,336.6	5,326.2	-10.4
Marine intertidal	133.1	130.9	-2.2
Estuarine intertidal nonvegetated	580.4	580.1	-0.3
Estuarine intertidal vegetated	4,623.1	4,615.2	-7.9
Freshwater wetlands	100,799.1	100,165.5	-633.6
Freshwater nonvegetated	5,251.0	5,914.3	663.3
Freshwater vegetated	95,548.1	94,251.2	-1,296.9
Freshwater emergent <sup>5</sup>	26,383.3	25,157.1	-1,226.2
Freshwater forested <sup>6</sup>	51,929.6	50,728.5	-1,201.1
Freshwater shrub <sup>7</sup>	17,235.2	18,365.6	1,130.4

<sup>1</sup> The lacustrine system includes deepwater habitats with all of the following characteristics: (1) situated in a topographic depression or a dammed river channel; (2) lacking trees, shrubs, persistent emergents, emergent mosses or lichens with greater than 30 percent coverage; (3) total area exceeds 20 acres. The riverine system includes deepwater habitats contained within a channel, with the exception of habitats with water containing ocean derived salts in excess of 0.5 parts per thousand. <sup>2</sup> The estuarine system consists of deepwater tidal habitats and adjacent tidal wetland that are usually semi-enclosed by land but have open, partly obstructed, or sporadic access to the open ocean, and in which ocean water is at least occasionally diluted by freshwater runoff from the land. Subtidal is where the substrate is continuously submerged by marine or estuarine waters. <sup>3</sup> Intertidal is where the substrate is exposed and flooded by tides. Intertidal includes the splash zone of coastal waters. <sup>4</sup> Emergent wetlands are characterized by erect, rooted, herbaceous hydrophytes, excluding mosses and lichens. This vegetation is present for most of the growing season in most years. These wetlands are usually dominated by perennial plants. <sup>5</sup> Forested wetlands are characterized by woody vegetation that is 20 feet tall or taller. <sup>6</sup> Shrub wetlands include areas dominated by woody vegetation less than 20 feet tall. The species include true shrubs, young trees, and trees or shrubs that are small or stunted because of environmental conditions.

<sup>1</sup> Represents both fresh and saline water.

Source: U.S. Geological Survey, *Estimated Use of Water in the United States in 2000*, circular 1268. See also <<http://water.usgs.gov/pubs/circ/2004/circ1268/#availability>> (released 12 March 2004).

Table 357. U.S. Water Quality Conditions by Type of Waterbody: 2000

[Section 305(b) of the Clean Water Act requires states and other jurisdictions to assess the health of their waters and the extent to which their waters support water quality standards. Section 305(b) requires that states submit reports describing water quality conditions to the Environmental Protection Agency every two years. Water quality standards have three elements (designated uses, criteria developed to protect each use, and an antidegradation policy). For information on survey methodology and assessment criteria, see report]

Item	Rivers and streams (miles)	Lakes, reservoirs, and ponds (acres)	Estuaries (sq. miles)	Great Lakes shoreline (miles)	Ocean shoreline (miles)

Septic tanks	(NA)	(NA)	(NA)	61	103
Urban runoff and storm sewers	34,871	13,699,327	5,045	152	241

- Represents zero. NA Not available. <sup>1</sup> Includes waterbodies assessed as not attainable for one or more uses. Most states do not assess all their waterbodies during the 2-year reporting cycle, but use a "rotating basin approach" whereby all waters are monitored over a set period of time. <sup>2</sup> Based on assessment of available data, water quality supports all designated uses. Water quality meets narrative and/or numeric criteria adopted to protect and support a designated use. <sup>3</sup> Although all assessed uses are currently met, data show a declining trend in water quality. Projections based on this trend indicate water quality will be impaired in the future, unless action is taken to prevent further degradation. <sup>4</sup> Impaired or not attainable. The reporting state or jurisdiction has performed a "use-attainability analysis" and demonstrated that support of one or more designated beneficial uses is not attainable due to specific biological, chemical, physical, or economic/social conditions. <sup>5</sup> Excludes unknown and natural sources.

Table 359. National Ambient Air Pollutant Concentrations: 1990 to 2003

[Data represent annual composite averages of pollutant based on daily 24-hour averages of monitoring stations, except carbon monoxide is based on the second-highest, nonoverlapping, 8-hour average; ozone, the second-highest daily maximum 1-hour value or the fourth-highest maximum 8-hour value; and lead, the maximum quarterly average of ambient lead levels. Based on data from the Air Quality System.  $\mu\text{g}/\text{m}^3$  = micrograms of pollutant per cubic meter of air; ppm = parts per million]

Pollutant	Unit	Monitoring stations, number	Air quality standard <sup>1</sup>	1990	1995	1999	2000	2001	2002	2003
Carbon monoxide	ppm	387	<sup>2</sup> 9	6.0	4.7	3.9	3.4	3.2	3.0	2.8
Ozone	ppm	785	<sup>3</sup> 12	0.111	0.112	0.108	0.101	0.101	0.105	0.101
Ozone	ppm	785	<sup>4</sup> 0.08	0.085	0.088	0.086	0.080	0.081	0.085	0.080
Sulfur dioxide	ppm	449	<sup>5</sup> 03	0.0384	0.0261	0.0237	0.0230	0.0216	0.0198	0.0210
Particulates (PM-10)	$\mu\text{g}/\text{m}^3$	770	<sup>5</sup> 50	30.9	26.1	25.2	24.8	24.1	23.4	23.5
Nitrogen dioxide	ppm	250	<sup>5</sup> 053	(NA)	(NA)	13.4	13.2	12.9	12.3	12.0
Lead	$\mu\text{g}/\text{m}^3$	96	<sup>6</sup> 1.5	0.019	0.018	0.018	0.017	0.017	0.016	0.016

<sup>1</sup> Refers to the primary National Ambient Air Quality Standard that protects the public health. <sup>2</sup> Based on 8-hour standard of 9 ppm. <sup>3</sup> Based on 1-hour standard of .12 ppm. <sup>4</sup> Based on 8-hour standard of .08 ppm. <sup>5</sup> The particulates (PM-10) standard replaced the previous standard for total suspended particulates in 1987. <sup>6</sup> Based on 3-month standard of 1.5  $\mu\text{g}/\text{m}^3$ .

Table 360. National Air Pollutant Emissions: 1970 to 2002

[In thousands of tons (13,042 represents 13,042,000), except as indicated. PM-10 = Particulate matter of less than ten microns; PM-2.5 = particulate matter of less than 2.5 microns effective diameter. Methodologies to estimate data for 1970 to 1980 period and 1985 to present emissions differ. Beginning with 1985, the methodology for more recent years is described in the document available at <<http://www.epa.gov/ttn/chieftrends/trends99/neiproc99.pdf>>.]

Year	PM-10	PM-10, fugitive dust <sup>1</sup>	PM-2.5	Sulfur dioxide	Nitrogen dioxides	Volatile organic compounds	Carbon monoxide	Lead (tons) <sup>2</sup>

Table 370. **Federal Funding for the Superfund, Brownfields, and Related Programs: 1995 to 2005**

[In millions of dollars (1,354 represents \$1,354,000,000). For fiscal years ending in year shown; see text, Section 8, State and Local Government Finances and Employment. Represents either outlays or obligations; see footnotes below for further explanation]

Program	1995	1996	1997	1998	1999	2000	2001	2002	2003	2004	2005
Current dollars											
Total	1,354	1,314	1,394	1,503	1,503	1,403	1,408	1,418	1,590	1,579	1,567
Superfund <sup>1</sup>	1,224	1,195	1,239	1,279	1,273	1,178	1,179	1,175	1,265	1,258	1,247
Brownfields <sup>3</sup>	2	8	37	89	91	92	91	95	167	170	164
ATSDR <sup>4</sup>	69	59	64	74	76	70	75	78	82	73	76
NIEHS <sup>5</sup>	59	52	54	61	63	63	63	70	76	78	80
Constant (2004) dollars <sup>6</sup>											
Total	1,589	1,514	1,578	1,682	1,660	1,519	1,489	1,473	1,622	1,579	1,537
Superfund <sup>2</sup>	1,437	1,377	1,403	1,431	1,406	1,275	1,247	1,220	1,290	1,258	1,223
Brownfields <sup>3</sup>	2	9	42	100	100	100	96	99	170	170	161
ATSDR <sup>4</sup>	81	68	72	83	84	76	79	81	84	73	75
NIEHS <sup>5</sup>	69	60	61	68	70	68	67	73	78	78	78

<sup>1</sup> For purposes of this analysis, excludes all emergency supplemental appropriations designated specifically for homeland security purposes. <sup>2</sup> Superfund program funding is the enacted appropriations excluding amounts designated for the Brownfields, ATSDR, and NIEHS programs. <sup>3</sup> Brownfields funding includes amounts received through the Superfund appropriations for fiscal years 1995 through 2002 and direct appropriations for fiscal years 2003 through 2005. <sup>4</sup> Agency for Toxic Substances and Disease Registry (ATSDR) and National Institute for Environmental Health Sciences (NIEHS) funding includes amounts received through the Superfund appropriations for fiscal years 1995 through 2000 and direct appropriations for fiscal years 2001 through 2005. <sup>5</sup> The amount designated for the Brownfields program in fiscal year 1993 was 0.15 million in current year dollars and 0.18 in constant year 2004 dollars. <sup>6</sup> The current years dollars adjusted for inflation using the Gross Domestic Product (Chained) Price Index, with 2004 as the reference year.

Table 375. Major U.S. Weather Disasters: 1995 to 2004

[6.5 represents \$6,500,000,000. Covers only weather related disasters costing \$1 billion or more]

Event	Description	Estimated cost (bil.dol.) Deaths		
		Time period		
Hurricane Jeanne . . . . .	Category 3 hurricane makes landfall in east-central Florida, causing considerable damage in Florida and some flood damage in GA, SC, NC, VA, MD, DE, NJ, PA, and NY.	September 2004	over 6.5	28
Hurricane Ivan . . . . .	Category 3 hurricane makes landfall on Gulf coast of Alabama causing significant damage in AL and FL and wind/flood damage in GA, SC, NC, LA, MS, WV, MD, TN, KY, OH, DE, NJ, PA, and NY.	September 2004	over 12	52
Hurricane Jeanne . . . . .	Category 2 hurricane makes landfall in east-central Florida causing significant damage in FL and considerable flood damage in GA, SC, NC, and NY.	September 2004	over 9	38
Hurricane Charly. . . . .	Category 4 hurricane makes landfall in southwest FL resulting in major damage in FL and some damage in SC and NC.	September 2004	over 14	34
Southern California wildfires. . . . .	Dry weather, high winds, and resulting wildfires in southern CA burned 743,000 acres and destroyed 3700 homes.	Oct.-early Nov. 2003	2.5	22
Hurricane Isabel . . . . .	Category 2 hurricane makes landfall in eastern NC, causing damage along coasts of NC, VA, and MD with wind damage and flooding in NC, VA, MD, DE, WV, NJ, NY and PA.	September 2003	over 4	47
Midwest severe storms and tornadoes . . . . .	Numerous tornadoes over the midwest, MS River valley, and OH/TN River valleys with record 400 tornadoes in one week.	Early May 2003	over 3.1	41
Storms and hail . . . . .	Severe storms and large hail over southern plains, lower MS River valley, and TX.	Early April 2003	over 1.6	21
Widespread drought . . . . .	Moderate to extreme drought over large portions of 30 states.	Spring to fall 2002	over 10	43
Western fire season . . . . .	Major fires over 11 western states from Rockies to west coast.	Spring to fall 2002	over 2	3
Tropical Storm Allison . . . . .	Tropical storm produced rainfall and severe flooding in coastal portions of TX and LA and damage in MS, FL, VA, and PA.	June 2001	5.0	140
Midwest and Ohio Valley hail and tornadoes . . . . .	Storms, tornadoes, and hail in TX, OK, KS, NE, IA, MO, IL, IN, WI, MI, OH, KY, and PA.	April 2001	1.7	75
Southern drought/heat wave . . . . .	Severe drought and heat over south-central and southeastern states cause significant losses in agriculture and related industries.	Spring-summer 2000	over 4.0	256
Western fire season . . . . .	Severe fire season in western states.	Spring-summer 2000	over 2.0	55
Hurricane Floyd . . . . .	Category 2 hurricane in NC, causing severe flooding in NC and some flooding in SC, VA, MD, PA, NY, NJ, DE, RI, CT, MA, and VT.	September 1999	6.0	31
Drought/heat wave . . . . .	Drought/heatwave over eastern U.S.	Summer 1999	1.0	40
Oklahoma-Kansas tornadoes . . . . .	Category F4-F5 tornadoes hit OK, KS, TX, and TN.	May 1999	1.0	75
Arkansas-Tennessee tornadoes . . . . .	Two outbreaks of tornadoes in 6-day period.	January 1999	1.3	256
Texas flooding . . . . .	Severe flooding in southeast Texas from 2 heavy rain events with 10-20 in. totals.	Oct.-Nov. 1998	1.0	55
Hurricane Georges . . . . .	Category 2 hurricane in Puerto Rico, Florida Keys, and Gulf coasts of LA, MS, AL, and FL.	September 1998	3-4	31
Hurricane Bonnie . . . . .	Category 3 hurricane in eastern NC and VA.	August 1998	1.0	31
Southern drought/heat wave . . . . .	Severe drought and heat wave from TX/OK to the Carolinas.	Summer 1998	6.0	16
Minnesota severe storms/hail. . . . .	Very damaging severe thunderstorms with large hail over wide areas of Minnesota.	May 1998	1.5	2
Southeast severe weather. . . . .	Tornadoes and flooding related to strong El Nino in the south-east.	Winter/Spring 1998	1.0	200
Northeast ice storm. . . . .	Intense ice storm hits ME, NH, VT, and NY.	January 1998	1.4	16
Northern plains flooding . . . . .	Severe flooding in Dakotas and Minnesota due to heavy spring snowmelt.	April-May 1997	2.0	11
MS and OH valleys flooding . . . . .	Tornadoes and severe flooding hit the states of AR, MO, MS, TN, IL, IN, KY, OH, and WV.	March 1997	1.0	67
West Coast flooding . . . . .	Flooding from rains and snowmelt in CA, WA, OR, ID, NV, and MT	Dec. 1996-Jan. 1999	2-3	36
Hurricane Fran . . . . .	Category 3 hurricane in NC and VA.	Sept. 1996	5.0	(NA)
Southern Plains severe drought. . . . .	Drought in agricultural areas of TX and OK.	Fall 1995-summer 1996	Over 4	9
Pacific Northwest severe flooding. . . . .	Flooding from heavy rain and snowmelt in OR, WA, ID, and MT.	Feb. 1996	1.0	187
Blizzard of '96 followed by flooding. . . . .	Heavy snowstorm followed by severe flooding in Appalachians, Mid-Atlantic, and Northeast.	Jan. 1996	3.0	27

- Represents zero. NA Not available or not reported.

## Section 7

# Elections

---

This section relates primarily to presidential, congressional, and gubernatorial elections. Also presented are summary tables on congressional legislation; state legislatures; Black, Hispanic, and female officeholders; population of voting age; voter participation; and campaign finances.

Official statistics on federal elections, collected by the Clerk of the House, are published biennially in *Statistics of the Presidential and Congressional Election* and *Statistics of the Congressional Election*. Federal and state elections data appear also in *America Votes*, a biennial volume published by CQ Press (a division of Congressional Quarterly, Inc.), Washington, DC. Federal elections data also appear in the U.S. Congress, *Congressional Directory*, and in official state documents. Data on reported registration and voting for social and economic groups are obtained by the U.S. Census Bureau as part of the Current Population Survey (CPS) and are published in Current Population Reports, Series P20 (see text, Section 1).

Almost all federal, state, and local governmental units in the United States conduct elections for political offices and other purposes. The conduct of elections is regulated by state laws or, in some cities and counties, by local charter. An exception is that the U.S. Constitution prescribes the basis of representation in Congress and the manner of electing the President and grants to Congress the right to regulate the times, places, and manner of electing federal officers. Amendments to the Constitution have prescribed national criteria for voting eligibility. The 15th Amendment, adopted in 1870, gave all citizens the right to vote regardless of race, color, or previous condition of servitude. The 19th Amendment, adopted in 1919, further extended the right to vote to all citizens regardless of sex. The payment of poll taxes as a prerequisite to voting in federal elections was banned by the 24th Amendment in

1964. In 1971, as a result of the 26th Amendment, eligibility to vote in national elections was extended to all citizens, 18 years old and over.

**Presidential election**—The Constitution specifies how the President and Vice President are selected. Each state elects, by popular vote, a group of electors equal in number to its total of members of Congress. The 23d Amendment, adopted in 1961, grants the District of Columbia three presidential electors, a number equal to that of the least populous state. Subsequent to the election, the electors meet in their respective states to vote for President and Vice President. Usually, each elector votes for the candidate receiving the most popular votes in his or her state. A majority vote of all electors is necessary to elect the President and Vice President. If no candidate receives a majority, the House of Representatives, with each state having one vote, is empowered to elect the President and Vice President, again, with a majority of votes required.

The 22nd Amendment to the Constitution, adopted in 1951, limits presidential tenure to two elective terms of 4 years each or to one elective term for any person who, upon succession to the Presidency, has held the office or acted as President for more than 2 years.

**Congressional election**—The Constitution provides that Representatives be apportioned among the states according to their population, that a census of population be taken every 10 years as a basis for apportionment, and that each state have at least one Representative. At the time of each apportionment, Congress decides what the total number of Representatives will be. Since 1912, the total has been 435, except during 1960 to 1962 when it increased to 437, adding one Representative each for Alaska and Hawaii. The total reverted to 435 after

reapportionment following the 1960 census. Members are elected for 2-year terms, all terms covering the same period. The District of Columbia, American Samoa, Guam, and the Virgin Islands each elect one nonvoting Delegate, and Puerto Rico elects a nonvoting Resident Commissioner.

The Senate is composed of 100 members, 2 from each state, who are elected to serve for a term of 6 years. One-third of the Senate is elected every 2 years. Senators were originally chosen by the state legislatures. The 17th Amendment to the Constitution, adopted in 1913, prescribed that Senators be elected by popular vote.

**Voter eligibility and participation—**The Census Bureau publishes estimates of the population of voting age and the

percent casting votes in each state for Presidential and congressional election years. These voting-age estimates include a number of persons who meet the age requirement but are not eligible to vote, (e.g. aliens and some institutionalized persons). In addition, since 1964, voter participation and voter characteristics data have been collected during November of election years as part of the CPS. These survey data include noncitizens in the voting age population estimates, but exclude members of the Armed Forces and the institutional population.

**Statistical reliability—**For a discussion of statistical collection and estimation, sampling procedures, and measures of statistical reliability applicable to Census Bureau data, see Appendix III.

Figure 7.1  
**Vote Cast for President by Major Political Party:  
1996 to 2004**

<sup>1</sup>Candidates with 1 million or more votes: 1996—Reform, Ross Perot;  
2000—Green, Ralph Nader.

Table 390. **Vote Cast for United States Representatives by Major Political Party—States: 2000 to 2004**

[In thousands (98,800 represents 98,800,000), except percent. R = Republican, D = Democrat, and I = Independent. In each state, totals represent the sum of votes cast in each Congressional District or votes cast for Representative-at-Large in states where only one member is elected. In all years there are numerous districts within the state where either the Republican or Democratic party had no candidate. In some states the Republican and Democratic vote includes votes cast for the party candidate by endorsing parties]

State	2000				2002				2004

X Not applicable. <sup>1</sup> No candidate. <sup>2</sup> According to state law, it is not required to tabulate votes for unopposed candidates.  
<sup>3</sup> Louisiana holds an open-primary election with candidates from all parties running on the same ballot. Any candidate who receives a majority is elected; if no candidate receives 50 percent, there is a run-off election in November between the top two finishers.  
<sup>4</sup> Sanders, an Independent, was elected with 67.5 percent of the vote in 2004.

Table 400. **Composition of State Legislatures by Political Party Affiliation: 2003 and 2005**

[Data reflect election results in year shown for most states; and except as noted, results in previous year for other states. Figures reflect immediate results of elections, including holdover members in state houses which do not have all of their members running for re-election. Dem. = Democrat, Rep. = Republican, Vac. = Vacancies. In general, Lower House refers to body consisting of state Representatives; Upper House, of state Senators]

Table 401. Political Party Control of State Legislatures by Party: 1983 to 2005

[As of beginning of year. Nebraska has a nonpartisan legislature]

Year	Legislatures under—			Year	Legislatures under—			Year	Legislatures under—		
	Democrat- ic control	Split control or tie	Repub- lican control		Democrat- ic control	Split control or tie	Repub- lican control		Democrat- ic control	Split control or tie	Repub- lican control
1983 <sup>1</sup> . . .	34	4	11	1993 . . . .	25	16	8	2000 . . . .	16	15	18
1985 . . . .	27	11	11	1994 . . . .	24	17	8	2001 . . . .	16	15	18
1987 . . . .	28	12	9	1995 . . . .	18	12	19	2002 . . . .	17	15	17
1989 <sup>2</sup> . . .	28	13	8	1996 . . . .	16	15	18	2003 . . . .	16	12	21
1990 . . . .	29	11	9	1997 . . . .	20	11	18	2004 . . . .	17	11	21
1992 . . . .	29	14	6	1999 . . . .	20	12	17	2005 . . . .	19	10	20

<sup>1</sup> Two 1984 midterm recall elections resulted in a change in control of the Michigan State Senate. At the time of the 1984 election, therefore, Democrats controlled 33 legislatures. <sup>2</sup> A party change during the year by a Democratic representative broke the tie in the Indiana House of Representatives, giving the Republicans control of both chambers.

<sup>1</sup> Includes other races not shown separately. <sup>2</sup> Beginning with the 2003 Current Population Survey (CPS), respondents could choose more than one race. 2004 data represent persons who selected this race group only and exclude persons reporting more than one race. The CPS in prior years only allowed respondents to report one race group. See also comments on race in the text for Section 1. <sup>3</sup> Hispanic persons may be any race. <sup>4</sup> For composition of regions, see map, inside cover. <sup>5</sup> Represents those who completed 9th to 12th grade, but have no high school diploma. <sup>6</sup> High school graduates. <sup>7</sup> Some college or associate's degree. <sup>8</sup> Bachelor's or advanced degree.

## State and Local Government Finances and Employment

This section presents data on revenues, expenditures, debt, and employment of state and local governments. Nationwide statistics relating to state and local governments, their numbers, finances, and employment are compiled primarily by the U.S. Census Bureau through a program of censuses and surveys. Every fifth year (for years ending in "2" and "7"), the Census Bureau conducts a census of governments involving collection of data for all governmental units in the United States. In addition, the Census Bureau conducts annual surveys which cover all the state governments and a sample of local governments.

Annually, the Census Bureau releases information on the Internet which presents financial data for the federal government, nationwide totals for state and local governments, and state-local data by states. Also released annually is a series on state, city, county, and school finances and on state and local public employment. There is also a series of quarterly data releases covering tax revenue and finances of major public employee retirement systems.

Basic information for Census Bureau statistics on governments is obtained by mail canvass from state and local officials; however, financial data for each of the state governments and for many of the large local governments are compiled from their official records and reports by Census Bureau personnel. In over two-thirds of the states, all or part of local government financial data are obtained through central collection arrangements with state governments. Financial data on the federal government are primarily based on the *Budget* published by the Office of Management and Budget (see text, Section 9, Federal Government Finances and Employment).

**Governmental units**—The governmental structure of the United States includes, in addition to the federal government and

the states, thousands of local governments—counties, municipalities, townships, school districts, and many "special districts." In 2002, 87,525 local governments were identified by the census of governments (see Tables 415-417). As defined by the census, governmental units include all agencies or bodies having an organized existence, governmental character, and substantial autonomy. While most of these governments can impose taxes, many of the special districts—such as independent public housing authorities and numerous local irrigation, power, and other types of districts—are financed from rentals, charges for services, benefit assessments, grants from other governments, and other nontax sources. The count of governments excludes semi-autonomous agencies through which states, cities, and counties sometimes provide for certain functions—for example, "dependent" school systems, state institutions of higher education, and certain other "authorities" and special agencies which are under the administrative or fiscal control of an established governmental unit.

**Finances**—The financial statistics relate to government fiscal years ending June 30 or at some date within the 12 previous months. The following governments are exceptions and are included as though they were part of the June 30 group; ending September 30, the state governments of Alabama and Michigan, the District of Columbia, and Alabama school districts; and ending August 31, the state government of Texas and Texas school districts. New York State ends its fiscal year on March 31. The federal government ended the fiscal year June 30 until 1976 when its fiscal year, by an act of Congress, was revised to extend from Oct. 1 to Sept. 30. A 3-month quarter (July 1 to Sept. 30, 1976) bridged the transition.

Nationwide government finance statistics have been classified and presented in

terms of uniform concepts and categories, rather than according to the highly diverse terminology, organization, and fund structure utilized by individual governments.

Statistics on governmental finances distinguish among general government, utilities, liquor stores, and insurance trusts. *General government* comprises all activities except utilities, liquor stores, and insurance trusts. Utilities include government water supply, electric light and power, gas supply, and transit systems. Liquor stores are operated by 17 states and by local governments in 6 states. Insurance trusts relate to employee retirement, unemployment compensation, and other social insurance systems administered by the federal, state, and local governments.

Data for cities or counties relate only to municipal or county and their dependent agencies and do not include amounts for other local governments in the same geographic location. Therefore, expenditure figures for "education" do not include spending by the separate school districts which administer public schools within most municipal or county areas. Variations in the assignment of governmental responsibility for public assistance, health, hospitals, public housing, and

other functions to a lesser degree also have an important effect upon reported amounts of city or county expenditure, revenue, and debt.

**Employment and payrolls**—These data are based mainly on mail canvassing of state and local governments. Payroll includes all salaries, wages, and individual fee payments for the month specified, and employment relates to all persons on governmental payrolls during a pay period of the month covered—including paid officials, temporary help, and (unless otherwise specified) part-time as well as full-time personnel. Beginning 1986, statistics for full-time equivalent employment have been computed with a formula using hours worked by part-time employees. A payroll-based formula was used prior to 1985. Full-time equivalent employment statistics were not computed for 1985. Figures shown for individual governments cover major dependent agencies such as institutions of higher education, as well as the basic central departments and agencies of the government.

**Statistical reliability**—For a discussion of statistical collection and estimation, sampling procedures, and measures of statistical reliability applicable to Census Bureau data, see Appendix III.

Structures	98.5	117.3	159.7	176.0	192.4	208.2	213.4	221.8
Equipment and software	28.7	36.7	46.4	49.0	50.6	51.0	51.5	52.4

<sup>1</sup> Government consumption expenditures are services (such as education and national defense) produced by government that are valued at their cost of production. Excludes government sales to other sectors and government own-account investment (construction and software). <sup>2</sup> Gross government investment consists of general government and government enterprise expenditures for fixed assets; inventory investment is included in government consumption expenditures.

NA Not available. <sup>1</sup> Government consumption expenditures are services (such as education and national defense) produced by government that are valued at their cost of production. Excludes government sales to other sectors and government own-account investment (construction and software). <sup>2</sup> Gross government investment consists of general government and government enterprise expenditures for fixed assets; inventory investment is included in government consumption expenditures. <sup>3</sup> Consists of general medical assistance and state child health care programs. <sup>4</sup> Consists of aid to families with dependent children and, beginning with 1996, assistance programs operating under the Personal Responsibility and Work Opportunity Reconciliation Act of 1996. <sup>5</sup> Consists of expenditures for food under the supplemental program for women, infants, and children; foster care; adoption assistance; and payments to nonprofit welfare institutions. <sup>6</sup> Consists largely of veterans benefits, Alaska dividends, and crime-victim payments.

Other <sup>5</sup> . . .	206	88	376	2,148	4,530	5,633	5,026	5,630
State proceeds (net income) <sup>6</sup> . . .	978	3,735	7,703	11,100	11,404	12,478	13,991	15,094

<sup>1</sup> Player scratches a latex section on ticket which reveals instantly whether ticket is a winner. <sup>2</sup> Players choose and bet on three or four digits, depending on game, with various payoffs for different straight order or mixed combination bets. <sup>3</sup> Players typically select six digits out of a large field of numbers. Varying prizes are offered for matching three through six numbers drawn by lottery. <sup>4</sup> Includes break-open tickets, spiel, keno, video lottery, etc. <sup>5</sup> Sales minus prizes and expenses equal net government income.

## Federal Government Finances and Employment

This section presents statistics relating to the financial structure and the civilian employment of the federal government. The fiscal data cover taxes, other receipts, outlays, and debt. The principal sources of fiscal data are the *Budget of the United States Government* and related documents, published annually by the Office of Management and Budget (OMB), and the U.S. Department of the Treasury's *United States Government Annual Report* and its *Appendix*. Detailed data on tax returns and collections are published annually by the Internal Revenue Service. The personnel data relate to staffing and payrolls. They are published by the Office of Personnel Management and the Bureau of Labor Statistics. The primary source for data on public lands is *Public Land Statistics*, published annually by the Bureau of Land Management, Department of the Interior. Data on federally owned land and real property are collected by the General Services Administration and presented in its annual *Inventory Report on Real Property Owned by the United States Throughout the World*.

**Budget concept**—Under the unified budget concept, all federal monies are included in one comprehensive budget. These monies comprise both federal funds and trust funds. Federal funds are derived mainly from taxes and borrowing and are not restricted by law to any specific government purpose. Trust funds, such as the Unemployment Trust Fund, collect certain taxes and other receipts for use in carrying out specific purposes or programs in accordance with the terms of the trust agreement or statute. Fund balances include both cash balances with the Treasury and investments in U.S. securities. Part of the balance is obligated, part unobligated. Prior to 1985, the budget totals, under provisions of law, excluded some federal activities—including the Federal Financing Bank, the Postal Service, the Synthetic Fuels Corporation, and the lending activities of the Rural Electrification Administration. The Balanced Budget

and Emergency Deficit Control Act of 1985 (P.L.99-177) repealed the off-budget status of these entities and placed social security (federal old-age and survivors insurance and the federal disability insurance trust funds) off-budget. Though social security is now off-budget and, by law, excluded from coverage of the congressional budget resolutions, it continues to be a federal program.

Receipts arising from the government's sovereign powers are reported as governmental receipts; all other receipts; i.e., from business-type or market-oriented activities, are offset against outlays. Outlays are reported on a checks-issued (net) basis (i.e., outlays are recorded at the time the checks to pay bills are issued).

**Debt concept**—For most of U.S. history, the total debt consisted of debt borrowed by the Treasury (i.e., public debt). The present debt series, includes both public debt and agency debt. The *gross federal debt* includes money borrowed by the Treasury and by various federal agencies; it is the broadest generally used measure of the federal debt. *Total public debt* is covered by a statutory debt limitation and includes only borrowing by the Treasury.

**Treasury receipts and outlays**—All receipts of the government, with a few exceptions, are deposited to the credit of the U.S. Treasury regardless of ultimate disposition. Under the Constitution, no money may be withdrawn from the Treasury unless appropriated by the Congress.

The day-to-day cash operations of the federal government clearing through the accounts of the U.S. Treasury are reported in the *Daily Treasury Statement*. Extensive detail on the public debt is published in the *Monthly Statement of the Public Debt of the United States*.

Budget receipts such as taxes, customs duties, and miscellaneous receipts, which are collected by government agencies,

and outlays represented by checks issued and cash payments made by disbursing officers as well as government agencies are reported in the *Daily Treasury Statement of Receipts and Outlays of the United States Government* and in the Treasury's *United States Government Annual Report* and its *Appendix*. These deposits in and payments from accounts maintained by government agencies are on the same basis as the unified budget.

The quarterly *Treasury Bulletin* contains data on fiscal operations and related Treasury activities, including financial statements of government corporations and other business-type activities.

**Income tax returns and tax collections**—Tax data are compiled by the Internal Revenue Service of the Treasury Department. The annual *Internal Revenue Service Data Book* gives a detailed account of tax collections by kind of tax. The agency's annual *Statistics of Income* reports present detailed data from individual income tax returns and corporation income tax returns. The quarterly *Statistics of Income Bulletin* has, in general, replaced the supplemental *Statistics of Income* publications which presented data on such diverse subjects as tax-exempt organizations, unincorporated businesses, fiduciary income tax and estate tax returns, sales of capital assets by individuals, international income and taxes reported by corporations and individuals, and estate tax wealth.

**Employment and payrolls**—The Office of Personnel Management collects employment and payroll data from all departments and agencies of the federal government, except the Central Intelligence Agency, the National Security Agency, and the Defense Intelligence Agency. Employment figures represent the number of persons who occupied civilian

positions at the end of the report month shown and who are paid for personal services rendered for the federal government, regardless of the nature of appointment or method of payment. Federal payrolls include all payments for personal services rendered during the report month and payments for accumulated annual leave of employees who separate from the service. Since most federal employees are paid on a biweekly basis, the calendar month earnings are partially estimated on the basis of the number of work days in each month where payroll periods overlap.

Federal employment and payroll figures are published by the Office of Personnel Management in its *Federal Civilian Workforce Statistics—Employment and Trends*. It also publishes biennial employment data for minority groups, data on occupations of white- and blue-collar workers, and data on employment by geographic area; reports on salary and wage distribution of federal employees are published annually. General schedule is primarily white-collar; wage system primarily blue-collar. Data on federal employment are also issued by the Bureau of Labor Statistics in its *Monthly Labor Review* and in *Employment and Earnings* and by the U.S. Census Bureau in its annual publication *Public Employment*.

**Public lands**—The data on applications, entries, selections, patents, and certifications refer to transactions that involve the disposal, under the public land laws (including the homestead laws), of federal public lands to nonfederal owners. In general, original entries and selections are applications to secure title to public lands that have been accepted as properly filed (i.e., allowed). Some types of applications, however, are not reported until issuance of the final certificate, which passes equitable title to the land to the applicant.

Table 459. Federal Budget—Receipts, Outlays, and Debt: 1960 to 2005

[In billions of dollars (92.5 represents \$92,500,000,000), except percent. For fiscal years ending in year shown; see text. Section 8. State and Local Government Finances and Employment. The Balanced Budget and Emergency Deficit Control Act of 1985 put all the previously off-budget Federal entities into the budget and moved Social Security off-budget. Minus sign (-) indicates deficit or decrease]

**Table 469. Tax Expenditures Estimates Relating to Individual and Corporate Income Taxes by Selected Function: 2004 to 2006**

(In millions of dollars (2,460 represents \$2,460,000,000). For years ending Sept. 30. Tax expenditures are defined as revenue losses attributable to provisions of the Federal tax laws which allow a special exclusion, exemption, or deduction from gross income or which provide a special credit, a preferential rate of tax, or a deferral of liability)

Function and provision	2004	2005	2006	2006, rank
<b>National defense:</b>				
Exclusion of benefits and allowances to armed forces personnel . . . . .	2,460	2,490	2,520	36
<b>International affairs:</b>				
Exclusion of income earned abroad by U.S. citizens . . . . .	2,680	2,750	2,810	33
Exclusion of certain allowances for Federal employees abroad . . . . .	850	900	950	59
Extraterritorial income exclusion . . . . .	5,500	5,170	4,270	24
Inventory property sales source rules exception . . . . .	1,500	1,620	1,770	47
Deferral of income from controlled foreign corporations (normal tax method) . . . . .	7,240	7,000	7,440	18
Deferred taxes for financial firms on certain income earned overseas . . . . .	2,130	2,190	2,260	37
<b>General science, space, and technology:</b>				
Expensing of research and experimentation expenditures (normal tax method) . . . . .	2,330	4,110	7,920	17
Credit for increasing research activities . . . . .	4,680	5,130	2,140	40
<b>Agriculture:</b>				
Capital gains treatment of certain income . . . . .	670	730	760	63
<b>Commerce and housing:</b>				
Financial institutions and insurance:				
Exemption of credit union income . . . . .	1,270	1,330	1,390	50
Exclusion of interest on life insurance savings . . . . .	20,830	22,750	24,070	12
<b>Housing:</b>				
Exclusion of interest on owner-occupied mortgage subsidy bonds . . . . .	1,020	1,110	1,180	53
Deductibility of mortgage interest on owner-occupied homes . . . . .	61,450	68,870	76,030	2
Deductibility of state and local property tax on owner-occupied homes . . . . .	19,930	16,590	14,830	14
Deferral of income from post 1987 installment sales . . . . .	1,100	1,120	1,140	55
Capital gains exclusion on home sales . . . . .	29,730	32,840	36,270	5
Exception from passive loss rules for \$25,000 of rental loss . . . . .	5,030	4,900	4,750	22
Credit for low-income housing investments . . . . .	3,660	3,850	4,010	25
Accelerated depreciation on rental housing (normal tax method) . . . . .	750	156	993	
<b>Commerce:</b>				
Capital gains (except agriculture, timber, iron ore, and coal) <sup>1</sup> . . . . .	25,150	27,200	28,370	10
Step-up basis of capital gains at death . . . . .	24,200	26,140	28,760	9
Accelerated depreciation of buildings other than rental housing <sup>1</sup> . . . . .	3,250	4,180	4,790	
Accelerated depreciation of machinery and equipment <sup>1</sup> . . . . .	44,690	11,000	37,830	
Expensing of certain small investments <sup>1</sup> . . . . .	1,520	4,820	1,650	48
Graduated corporation income tax rate <sup>1</sup> . . . . .	2,450	3,190	3,730	29
<b>Transportation:</b>				
Exclusion of reimbursed employee parking expenses . . . . .	2,470	2,590	2,730	35
<b>Community and regional development:</b>				
Empowerment zones, Enterprise communities, and renewal communities . . . . .	1,080	1,120	1,210	52
<b>Education, training, employment, and social services:</b>				
<b>Education:</b>				
Exclusion of scholarship and fellowship income <sup>1</sup> . . . . .	1,320	1,400	1,460	49
HOPE tax credit . . . . .	3,320	3,410	3,220	32
Lifetime Learning tax credit . . . . .	2,190	2,130	2,080	43
Deduction for higher education expenses . . . . .	1,280	1,830	1,840	45
Parental personal exemption for students age 19 or over . . . . .	3,200	2,670	2,110	41
Deductibility of charitable contributions (education) . . . . .	3,690	3,420	3,680	30
<b>Training, employment, and social services:</b>				
Exclusion of employee meals and lodging (other than military) . . . . .	810	850	890	60
Child credit . . . . .	22,400	32,710	32,810	7
Credit for child and dependent care expenses . . . . .	2,990	3,140	2,810	33
Deductibility of charitable contributions, other than education and health . . . . .	27,370	29,670	32,550	8
<b>Health:</b>				
Exclusion of employer contributions for medical insurance premiums <sup>2</sup> . . . . .	102,250	112,160	125,690	1
Self-employed medical insurance premiums . . . . .	3,330	3,780	4,330	23
Deductibility of medical expenses . . . . .	7,380	8,590	9,140	16
Exclusion of interest on hospital construction bonds . . . . .	1,870	2,020	2,160	39
Deductibility of charitable contributions (health) . . . . .	3,090	3,350	3,670	31
<b>Income security:</b>				
Exclusion of workers compensation benefits . . . . .	5,490	5,730	5,940	20
Net exclusion of pension contributions and earnings:				
Employer plans . . . . .	46,970	50,330	51,050	3
401(k) plans . . . . .	47,730	45,870	48,140	4
Individual Retirement Accounts . . . . .	7,450	7,340	7,310	19
Low and moderate income savers credit . . . . .	970	1,100	1,170	54
Keogh plans . . . . .	8,830	9,380	9,980	15
Exclusion of other employee benefits:				
Premiums on group term life insurance . . . . .	2,070	2,090	2,110	41
Special ESOP rules . . . . .	1,920	2,060	2,220	38
Additional deduction for the elderly . . . . .	1,700	1,810	1,960	44
Earned income tax credit . . . . .	4,890	4,980	5,420	21
<b>Social Security:</b>				
Exclusion of social security benefits:				
Social Security benefits for retired workers . . . . .	19,200	19,480	19,770	13
Social Security benefits for disabled . . . . .	3,580	3,740	3,870	27
Social Security benefits for dependents and survivors . . . . .	4,140	4,120	3,990	26
<b>Veterans' benefits and services:</b>				
Exclusion of veterans' death benefits and disability compensation . . . . .	3,300	3,560	3,750	28
<b>General purpose fiscal assistance:</b>				
Exclusion of interest on public purpose state and local bonds . . . . .	26,150	26,530	26,610	11
Deductibility of nonbusiness state & local taxes other than on owner-occupied home . . . . .	45,290	39,090	34,620	6
Tax credit for corps. receiving income from doing business in U.S. possessions . . . . .	1,000	900	500	72

<sup>1</sup> Normal tax method. <sup>2</sup> Includes premiums and medical care.

**Table 472. Tax Returns Filed—Examination Coverage: 2000 and 2004**

(In thousands (124,887 represents 124,887,000), except as indicated. Return classification as Schedule C or C-EZ (nonfarm sole proprietorships) or Schedule F (farm proprietorships) for audit examination purposes was based on the largest source of income on the return and certain other characteristics. Therefore, some returns with business activity are reflected in the nonbusiness individual income tax return statistics in the table below (and vice versa), so that the statistics for the number of returns with Schedule C is not comparable to the number of nonfarm sole proprietorship returns in Table 728. For more detailed information, see the annual *IRS Data Book* (Publication 55B);

**Table 478. Federal Individual Income Tax—Tax Liability and Effective and Marginal Tax Rates for Selected Income Groups: 1990 to 2001**

[Refers to income after exclusions. Effective rate represents tax liability divided by stated income. The marginal tax rate is the percentage of the first additional dollar of income which would be paid in income tax. Computations assume the low income allowance, standard deduction, zero bracket amount, or itemized deductions equal to 10 percent of adjusted gross income, whichever is greatest. Excludes self-employment tax]

## National Security and Veterans Affairs

This section displays data for national security (national defense and homeland security) and benefits for veterans. Data are presented on national defense and its human and financial costs; active and reserve military personnel; and federally sponsored programs and benefits for veterans, and funding, budget and selected agencies for homeland security. The principal sources of these data are the annual *Selected Manpower Statistics* and the *Atlas/Data Abstract for the United States and Selected Areas* issued by the Office of the Secretary of Defense; *Annual Report of Secretary of Veterans Affairs*, Department of Veterans Affairs; *Budget in Brief*, Department of Homeland Security; and *The Budget of the United States Government*, Office of Management and Budget. For more data on expenditures and personnel, see Section 30.

**Department of Defense (DOD)**—The Department of Defense is responsible for providing the military forces of the United States. It includes the Office of the Secretary of Defense, the Joint Chiefs of Staff, the Army, the Navy, the Air Force, and the defense agencies. The President serves as Commander-in-Chief of the Armed Forces; from him, the authority flows to the Secretary of Defense and through the Joint Chiefs of Staff to the commanders of unified and specified commands (e.g., U.S. Strategic Command).

**Reserve components**—The Reserve Components of the Armed Forces consist of the Army National Guard of the United States, Army Reserve, Naval Reserve, Marine Corps Reserve, Air National Guard, Air Force Reserve, and Coast Guard Reserve. They provide trained personnel and units available for active duty in the Armed Forces during times of war or national emergency, and at such other times as national security may require. The National Guard has dual federal-state responsibilities and uses jointly provided equipment, facilities, and budget support. The President is empowered to mobilize the National Guard and to use such of the

Armed Forces as he considers necessary to enforce federal authority in any state. There is in each Armed Force a Ready Reserve, a Standby Reserve, and a Retired Reserve. The Ready Reserve includes the Selected Reserve, which provides trained and ready units and individuals to augment the active forces during times of war or national emergency, or at other times when required; and the Individual Ready Reserves, which is a manpower pool, that can be called to active duty during times of war or national emergency and would normally be used as individual fillers for active, guard and reserve units, and as a source of combat replacements. Most of the Ready Reserve serves in an active status. The Standby Reserve cannot be called to active duty, other than for training, unless authorized by Congress under "full mobilization," and a determination is made that there are not enough qualified members in the Ready Reserve in the required categories who are readily available. The Retired Reserve represents a lower potential for involuntary mobilization.

### Department of Veterans Affairs

**(VA)**—The Department of Veterans Affairs administers laws authorizing benefits for eligible former and present members of the Armed Forces and for the beneficiaries of deceased members. Veterans benefits available under various acts of Congress include compensation for service-connected disability or death; vocational rehabilitation, education, and training; home loan insurance; life insurance; health care; special housing and automobiles or other conveyances for certain disabled veterans; burial and plot allowances; and educational assistance to families of deceased or totally disabled veterans, servicemen missing in action, or prisoners of war. Since these benefits are legislated by Congress, the dates they were enacted and the dates they apply to veterans may be different from the actual dates the conflicts occurred.

VA estimates of veterans cover all persons discharged from active U.S. military service under conditions other than dishonorable.

**Homeland Security**—In an effort to increase homeland security following the September 11, 2001, terrorist attacks on the United States, President George W. Bush issued the *National Strategy for Homeland Security* in July 2002 and signed legislation creating the Department of Homeland Security (DHS) in November 2002.

The *National Strategy* sets forth a plan to improve homeland security through 43 initiatives that fall within six critical mission areas. These mission areas are intelligence and warning, border and transportation security, domestic counterterrorism, protection of critical infrastructure, defense against catastrophic terrorism, and emergency preparedness and response. The first three mission areas focus primarily on preventing terrorist attacks; the next two on reducing our nation's vulnerabilities; and the final one on minimizing the damage and recovery from attacks that do occur.

The funding and activities of homeland security are not only carried out by DHS, but also by other federal agencies, state, and local entities. In addition to DHS, there are 32 other federal agencies that comprise federal homeland security funding. DHS, along with four other agencies—Department of Defense (DOD), Energy (DOE), Health and Human Services (HHS), and Justice (DOJ)—account for over 90 percent of federal spending for homeland security.

**Department of Homeland Security (DHS)**—The mission of DHS is to lead a unified effort to secure the United States. This effort is to prevent and deter terrorist attacks and to protect against and respond to threats and hazards to the nation. This effort is to ensure safe and secure borders, to welcome lawful immigrants and visitors, and to promote the free flow of commerce.

The creation of the Department of Homeland Security, which began operations in March 2003, represents a fusion of 22 federal agencies (legacy agencies) to coordinate and centralize the leadership of

many homeland security activities under a single department. Twenty of these agencies are housed in one of the four major directorates of DHS. These four directorates are: Border and Transportation Security, Emergency Preparedness and Response, Science and Technology, and Information Analysis and Infrastructure. The Secret Service and Coast Guard remain intact and report directly to the Secretary. Immigration and Naturalization Services (INS) adjudications and benefits programs report directly to the Deputy Secretary as the U.S. Citizenship and Immigration Services (USCIS).

The Customs and Border Protection (CBP) is responsible for managing, securing, and controlling U.S. borders. This includes carrying out traditional border-related responsibilities, such as stemming the tide of illegal drugs and illegal aliens; securing and facilitating legitimate global trade and travel; and protecting the food supply and agriculture industry from pests and disease. CBP is composed of the Border Patrol and Inspections (both moved from INS) along with Customs (absorbed from the Department of Treasury) and Animal and Plant Health Inspections Services (absorbed from the Department of Agriculture).

Immigration and Customs Enforcement (ICE) is the largest investigation arm of DHS. ICE's mission is to prevent acts of terrorism by targeting the people, money, and materials that support terrorist and criminal activities. Selected responsibilities include the enforcement of immigration customs laws within the U.S., the protection of specified federal buildings, and air and marine enforcement. ICE is composed of five law enforcement divisions: Investigations, Intelligence, Federal Air Marshal Service, Federal Protective Service, and Apprehension, Detention, and Removal.

The Transportation Security Administration (TSA) was created as part of the Aviation and Transportation Security Act on November 19, 2001. TSA was originally part of the Department of Transportation, but was moved to Department of Homeland Security. TSA's mission is to provide security to our nation's transportation systems with a primary focus on aviation security.

<sup>1</sup> Military awards for supplies, services, and construction. Net value of contracts of over \$25,000 for work in each state and DC. Figures reflect impact of prime contracting on state distribution of defense work. Often the State in which a prime contractor is located is not the State where the subcontracted work is done. See also headnote, Table 493. Undistributed civilians and military personnel, their payrolls, and prime contract awards for performance in classified locations are excluded.

Table 506. Military Reserve Personnel: 1990 to 2004

[As of September 30. The Ready Reserve includes the Selected Reserve which is scheduled to augment active forces during times of war or national emergency, and the Individual Ready Reserve which, during times of war or national emergency, would be used to fill out Active, Guard and Reserve units, and which would also be a source for casualty replacements; Ready Reservists serve in an active status (except for the Inactive National Guard—a very small pool within the Army National Guard). The Standby Reserve cannot be called to active duty, other than for training, unless authorized by Congress under "full mobilization," and a determination is made that there are not enough qualified members in the Ready Reserve in the required categories who are readily available. The Retired Reserve represents a lower potential for involuntary mobilization.]

**Table 522. Immigration and Customs Enforcement (ICE) Investigations Activities: 2000 to 2003**

[As of September 30. Investigative activity for 2003 carried out by Immigration and Customs Enforcement (ICE). Prior to 2003, investigation activity was carried out by Immigration and Naturalization Service (INS).]

Activities	2000	2001	2002	2003
<b>Criminal investigations: <sup>1</sup></b>				
Cases completed . . . . .	90,519	89,222	78,841	82,236
Defendants prosecuted . . . . .	3,802	2,962	2,309	3,138
Defendants convicted . . . . .	3,022	2,219	1,496	1,858
<b>Employer investigations: <sup>2</sup></b>				
Cases completed . . . . .	1,966	1,595	2,061	2,194
Warnings . . . . .	282	169	124	479
Notice of Intent to Fine . . . . .	178	100	53	162
Final orders . . . . .	180	78	13	124
Arrests . . . . .	953	735	485	445
<b>Fraud investigations: <sup>3</sup></b>				
Cases completed . . . . .	3,733	3,721	2,527	3,050
Defendants prosecuted . . . . .	483	397	253	347
Defendants convicted . . . . .	259	214	142	250
<b>Smuggling investigations: <sup>4</sup></b>				
Cases completed . . . . .	3,309	2,885	2,395	2,346
Smugglers arrested . . . . .	4,139	3,139	3,330	2,663
Smuggled aliens arrested . . . . .	46,001	32,429	19,278	14,418
Defendants prosecuted . . . . .	2,618	2,124	2,106	2,185
Defendants convicted . . . . .	1,474	1,174	1,252	1,418
<b>Entered without inspection/status violators: <sup>5</sup></b>				
Cases completed . . . . .	38,311	25,301	23,067	27,240
Aliens arrested . . . . .	14,963	11,162	10,538	9,319

<sup>1</sup> Criminal alien cases include large-scale organizations engaged in ongoing criminal activity and individual aliens convicted of crimes such as terrorism or drug trafficking. <sup>2</sup> Employer investigations target employers of unauthorized aliens and include criminal investigations, administrative investigations, auxiliary investigations, ICE Headquarters Investigation Project, and Department of Labor ESA-91. In FY 2003, also includes statistics pertaining to Work Site Enforcement National Interest Investigations. <sup>3</sup> Fraud investigations seek to penetrate fraud schemes of all sizes and degrees of complexity which are used to violate immigration and related laws or to shield the true status of illegal aliens in order to obtain entitlement benefits. <sup>4</sup> Smuggling cases involve those which target persons or entities who bring, transport, harbor or smuggle illegal aliens into or within the United States. The decline in Performance Analysis System (PAS) investigation figures for smugglers arrested and smuggled aliens arrested from fiscal year 2002 to 2003, may partially be attributable to the DHS reorganization and shift of workload from some anti-smuggling units in Border Patrol Sectors to ICE Special Agent in Charge (SAC) offices. <sup>5</sup> Includes Entry Without Inspection (EWI), such as stowaways, or landed crewmen who were ordered detained on board, and status violators.

Table 525. Prohibited Items Intercepted at U.S. Airport Screening Checkpoints: 2002 to 2004

[Passengers boarding aircraft in thousands (612,876 represents 612,876,000). For the calendar year. Transportation Security Administration (TSA) assumed responsibility for airport security on February 17, 2002, and by November 19, 2002, TSA assumed control over all passenger screenings from private contractors. TSA data are incomplete]

Year	2002	2003	2004
Passengers boarding aircraft total (1,000) <sup>1</sup>	612,876	646,275	697,701
Domestic . . . . .	560,107	592,412	635,515
International . . . . .	52,769	53,863	62,276
Total prohibited items . . . . .	4,185,916	6,167,497	7,103,560
Knife <sup>2</sup> . . . . .	1,147,843	1,969,003	2,055,306
Other cutting items <sup>3</sup> . . . . .	2,063,729	3,029,318	3,409,724
Club <sup>4</sup> . . . . .	13,134	25,578	28,998
Box cutter <sup>5</sup> . . . . .	37,504	21,396	22,428
Firearm <sup>6</sup> . . . . .	983	638	254
Incendiary <sup>7</sup> . . . . .	83,086	485,792	697,242
Other <sup>8</sup> . . . . .	839,637	635,772	889,608

<sup>1</sup> Data comes from the Air Transport Association. <sup>2</sup> Knife includes any length and type except round-bladed, butter, and plastic cutlery. <sup>3</sup> Other cutting instruments refers to, e.g., scissors, screwdrivers, swords, sabers, and ice picks. <sup>4</sup> Club refers to baseball bats, night sticks, billy clubs, bludgeons; etc. <sup>5</sup> Box cutter. <sup>6</sup> Firearm refers to items like pistols, revolvers, rifles, automatic weapons, shotguns, parts of guns and firearms. <sup>7</sup> Incendiaries refer to categories of ammunition and gunpowder, flammables/irritants, and explosives. <sup>8</sup> Other refers to tools, self-defense items, and sporting good (excluding baseball bats).

Source: U.S. Department of Homeland Security, Transportation Security Administration, unpublished data; 13 June 2005 <<http://www.tsa.gov>>; Air Transport Association of America, Washington, DC, Air Transport Annual Report, <<http://www.airlines.org/home/default.aspx>>.

Table 526. Federal Emergency Management Agency (FEMA) Declarations and Expenditures for Disasters: 2000 to 2004

[Expenditures in thousands of dollars (1,747,511 represents \$1,747,511,000). For calendar year. FEMA leads the federal government's role in preparing for, mitigating the effects of, responding to, and recovering from all domestic disasters, whether natural or manmade, including acts of terror]

Year	Declarations				Expenditures <sup>1</sup>
	Total disaster	Major disaster	Emergency	Fire Management Assistance	
2000 . . . . .	113	45	6	62	1,747,511
2001 . . . . .	100	45	10	45	11,297,969
2002 . . . . .	121	49	1	71	1,883,822
2003 . . . . .	123	56	19	48	2,377,908
2004 . . . . .	118	58	7	43	5,583,391

<sup>1</sup> Expenditures represent FEMA funding obligated as of 12/31/04. Expenditures for declared disasters within a calendar year represent obligations at the time data was collected. Figures will change as those disasters remaining open receive funding obligated for ongoing recovery and mitigation projects.

In the total number of applications filed in 1887 are included 14,735 survivors and 2,993 widows of the war with Mexico. In the total number of claims allowed in 1887 are included 7,562 survivors and 963 widows of the war with Mexico. (See act of Congress approved January 29, 1887.)  
 In the number of pensioners on the roll under the heads of "Invalida" and "Widows, etc." are included survivors and widows of the war of 1812, respectively, commencing with the year 1871. Survivors and widows of the war with Mexico are included in the number of pensioners on the roll June 30, 1887.

## Social Insurance and Human Services

This section presents data related to governmental expenditures for social insurance and human services; governmental programs for old-age, survivors, disability, and health insurance (OASDHI); governmental employee retirement; private pension plans; government unemployment and temporary disability insurance; federal supplemental security income payments and aid to the needy; child and other welfare services; and federal food programs. Also included here are selected data on workers' compensation and vocational rehabilitation, child support, child care, charity contributions, and philanthropic trusts and foundations.

The principal source for these data is the Social Security Administration's *Annual Statistical Supplement to the Social Security Bulletin* which presents current data on many of the programs.

**Social insurance under the Social Security Act**—Programs established by the Social Security Act provide protection against wage loss resulting from retirement, prolonged disability, death, or unemployment, and protection against the cost of medical care during old age and disability. The federal OASDI program provides monthly benefits to retired or disabled insured workers and their dependents and to survivors of insured workers. To be eligible, a worker must have had a specified period of employment in which OASDI taxes were paid. The age of eligibility for full retirement benefits has been 65 years old for many years. However, for persons born in 1938 or later that age will gradually increase until it reaches age 67 for those born after 1959. Reduced benefits may be obtained as early as age 62. The worker's spouse is under the same limitations. Survivor benefits are payable to dependents of deceased insured workers. Disability benefits are payable to an insured worker under full retirement age with a prolonged disability and to the disabled worker's dependents on the same basis as

dependents of retired workers. Disability benefits are provided at age 50 to the disabled widow or widower of a deceased worker who was fully insured at the time of death. Disabled children, aged 18 or older, of retired, disabled, or deceased workers are also eligible for benefits. A lump sum benefit is generally payable on the death of an insured worker to a spouse or minor children. For information on the medicare program, see Section 3, Health and Nutrition.

Retirement, survivors, disability, and hospital insurance benefits are funded by a payroll tax on annual earnings (up to a maximum of earnings set by law) of workers, employers, and the self-employed. The maximum taxable earnings are adjusted annually to reflect increasing wage levels (see Table 535). Effective January 1994, there is no dollar limit on wages and self-employment income subject to the hospital insurance tax. Tax receipts and benefit payments are administered through federal trust funds. Special benefits for uninsured persons; hospital benefits for persons aged 65 and over with specified amounts of social security coverage less than that required for cash benefit eligibility; and that part of the cost of supplementary medical insurance not financed by contributions from participants are financed from federal general revenues.

Unemployment insurance is presently administered by the U.S. Employment and Training Administration and each state's employment security agency. By agreement with the U.S. Secretary of Labor, state agencies also administer unemployment compensation for eligible ex-military personnel and federal employees. Under state unemployment insurance laws, benefits related to the individual's past earnings are paid to unemployed eligible workers. State laws vary concerning the length of time benefits are paid and their amount. In most states, benefits are payable for 26 weeks and, during periods

of high unemployment, extended benefits are payable under a federal-state program to those who have exhausted their regular state benefits. Some states also supplement the basic benefit with allowances for dependents.

Unemployment insurance is funded by a federal unemployment tax levied on the taxable payrolls of most employers. Taxable payroll under the federal act and 12 state laws is the first \$7,000 in wages paid each worker during a year. Forty-one states have taxable payrolls above \$7,000. Employers are allowed a percentage credit of taxable payroll for contributions paid to states under state unemployment insurance laws. The remaining percent of the federal tax finances administrative costs, the federal share of extended benefits, and advances to states. About 97 percent of wage and salary workers are covered by unemployment insurance.

#### **Retirement programs for government employees**

—The Civil Service Retirement System (CSRS) and the Federal Employees' Retirement System (FERS) are the two major programs providing age and service, disability, and survivor annuities for federal civilian employees. In general, employees hired after December 31, 1983, are covered under FERS and the social security program (OASDHI), and employees on staff prior to that date are members of CSRS and are covered under Medicare. CSRS employees were offered the option of transferring to FERS during 1987 and 1998. There are separate retirement systems for the uniformed services (supplementing OASDHI) and for certain special groups of federal employees. State and local government employees are covered for the most part by state and local retirement systems similar to the federal CSRS. In many jurisdictions these benefits supplement OASDHI coverage.

**Workers' compensation**—All states provide protection against work-connected injuries and deaths, although some states exclude certain workers (e.g., domestic workers). Federal laws cover federal employees, private employees in the District of Columbia, and longshoremen and harbor workers. In addition, the Department of Labor administers "black lung"

benefits programs for coal miners disabled by pneumoconiosis and for specified dependents and survivors. Specified occupational diseases are compensable to some extent. In most states, benefits are related to the worker's salary. The benefits may or may not be augmented by dependents' allowances or automatically adjusted to prevailing wage levels.

**Income support**—Income support programs are designed to provide benefits for persons with limited income and resources. The Supplemental Security Income (SSI) program and Temporary Assistance for Needy Families (TANF) program are the major programs providing monthly payments. In addition, a number of programs provide money payments or in-kind benefits for special needs or purposes. Several programs offer food and nutritional services. Also, various federal-state programs provide energy assistance, public housing, and subsidized housing to individuals and families with low incomes. General assistance may also be available at the state or local level.

The SSI program, administered by the Social Security Administration, provides income support to persons aged 65 or older and blind or disabled adults and children. Eligibility requirements and federal payment standards are nationally uniform. Most states supplement the basic SSI payment for all or selected categories of persons.

The Personal Responsibility and Work Opportunity Reconciliation Act of 1996 contained provisions that replaced the Aid to Families With Dependent Children (AFDC), Job Opportunities and Basic Skills (JOBS), and Emergency Assistance programs with the Temporary Assistance for Needy Families block grant program. This law contains strong work requirements, comprehensive child support enforcement, support for families moving from welfare to work, and other features. The TANF became effective as soon as each state submitted a complete plan implementing TANF, but no later than July 1, 1997. The AFDC program provided cash assistance based on need, income, resources, and family size.

**Federal food stamp program**—Under the food stamp program, single persons and those living in households meeting nationwide standards for income and assets may receive coupons redeemable for food at most retail food stores or provides benefits through electronic benefit transfer. The monthly amount of benefits or allotments a unit receives is determined by household size and income. Households without income receive the determined monthly cost of a nutritionally adequate diet for their household size. This amount is updated to account for food price increases. Households with income receive the difference between the amount of a nutritionally adequate diet and 30 percent of their income, after certain allowable deductions.

To qualify for the program, a household must have less than \$2,000 in disposable assets (\$3,000 if one member is aged 60 or older), gross income below 130 percent of the official poverty guidelines for the household size, and net income below 100 percent of the poverty guidelines. Households with a person aged 60 or older or a disabled person receiving SSI, social security, state general assistance, or veterans' disability benefits may have gross income exceeding 130 percent of the poverty guidelines. All households in which all members receive TANF or SSI are categorically eligible for food stamps without meeting these income or resource criteria. Households are certified for varying lengths of time, depending on their income sources and individual circumstances.

### **Health and welfare services—**

Programs providing health and welfare services are aided through federal grants to states for child welfare services, vocational rehabilitation, activities for the aged, maternal and child health services, maternity and infant care projects, comprehensive health services, and a variety of public health activities. For information about the Medicaid program, see Section 3, Health and Nutrition.

**Noncash benefits**—The U.S. Census Bureau annually collects data on the characteristics of recipients of noncash (in-kind) benefits to supplement the collection of annual money income data in the Current Population Survey (see text, Section 1, Population, and Section 14, Prices). Noncash benefits are those benefits received in a form other than money which serve to enhance or improve the economic well-being of the recipient. As for money income, the data for noncash benefits are for the calendar year prior to the date of the interview. The major categories of noncash benefits covered are public transfers (e.g., food stamps, school lunch, public housing, and Medicaid) and employer or union-provided benefits to employees.

**Statistical reliability**—For discussion of statistical collection, estimation, and sampling procedures and measures of statistical reliability applicable to HHS and Census Bureau data, see Appendix III.

<sup>1</sup> Consists largely of temporary disability payments, pension benefit guaranty payments, and black lung payments.  
<sup>2</sup> Consists of medicare and other medical vendor payments. <sup>3</sup> Consists of payments made under the TriCare Management Program (formerly called CHAMPUS) for the medical care of dependents of active duty military personnel and of retired military personnel and their dependents at nonmilitary medical facilities. <sup>4</sup> Through 1995, consists of emergency assistance and aid to families with dependent children. Beginning with 1998, consists of benefits—generally known as temporary assistance for needy families—provided under the Personal Responsibility and Work Opportunity Reconciliation Act of 1996. <sup>5</sup> Consists largely of general assistance, expenditures for food under the supplemental program for women, infants, and children; refugee assistance; foster home care and adoption assistance; earned income tax credits; and energy assistance. <sup>6</sup> Consists of trade readjustment allowance payments, Redwood Park benefit payments, public service employment benefit payments, and transitional benefit payments. <sup>7</sup> Consists largely of veterans' readjustment benefit payments, educational assistance to spouses and children of disabled or deceased veterans, payments to paraplegics, and payments for autos and conveyances for disabled veterans. <sup>8</sup> Consists largely of State and local government payments to veterans. <sup>9</sup> Excludes veterans. Consists largely of federal fellowship payments (National Science Foundation fellowships and traineeships, subsistence payments to state maritime academy cadets, and other federal fellowships), interest subsidy on higher education loans, basic educational opportunity grants, and Job Corps payments. <sup>10</sup> Consists largely of Bureau of Indian Affairs payments, education exchange payments, Alaska Permanent Fund dividend payments, compensation of survivors of public safety officers, compensation of victims of crime, disaster relief payments, compensation for Japanese internment, and other special payments to individuals.

- Represents or rounds to zero. <sup>1</sup> Beginning with the 2003 CPS, respondents could choose one or more races. For example, "White" refers to people who reported White and did not report any other race category. The use of this single-race population does not imply that it is the preferred method of presenting or analyzing data. Information on people who reported more than one race, such as "Asian and Black or African American," is available from Census 2000 through American FactFinder. <sup>2</sup> "Black" refers to people who reported Black and did not report any other race category. <sup>3</sup> Persons of Hispanic origin may be of any race. <sup>4</sup> TANF—Temporary Assistance for Needy Families program; AFDC—Aid to Families with Dependent Children program. <sup>5</sup> Includes estates and trusts reported as survivor benefits.

**Table 531. Households Receiving Means-Tested Noncash Benefits: 1980 to 2002**

[In thousands (82,368 represents 82,368,000), except percent. Households as of March of following year. Covers civilian noninstitutional population, including persons in the Armed Forces living off post or with their families on post. A means-tested benefit program requires that the household's income and/or assets fall below specified guidelines in order to qualify for benefits. There are general trends toward underestimation of noncash beneficiaries. Households are classified according to poverty status of family or nonfamily householder; for explanation of poverty level, see text, Section 13. Data for 1980 and 1990 based on 1980 census population controls; 1995 and 2000 based on 1990 census population controls; beginning 2002, based on Census 2000 population controls and a 28,000 household sample expansion to 78,000 households. Based on Current Population Survey; see text, Section 1 and Appendix III]

Type of benefit received	2002							
					Below poverty level			Above poverty level
	1980	1990	1995	2001	Total	Number	Percent of total	
Total households . . . . .	82,368	94,312	99,627	106,418	111,278	13,505	100	97,773
Receiving at least one noncash benefit . . . . .	14,266	16,098	21,148	20,131	22,478	7,806	58	14,672
Not receiving cash public assistance . . . . .	7,860	8,819	13,335	14,465	16,890	5,003	37	11,887
Receiving cash public assistance <sup>1</sup> . . . . .	6,407	7,279	7,813	5,667	5,588	2,803	21	2,785
Total households receiving—								
Food stamps . . . . .	6,769	7,163	8,388	5,563	6,245	3,834	28	2,411
School lunch . . . . .	5,532	6,252	8,607	7,185	7,930	3,092	23	4,838
Public housing . . . . .	2,777	4,339	4,846	4,689	5,125	2,593	19	2,532
Medicaid . . . . .	8,287	10,321	14,111	14,328	16,765	6,182	46	10,583

<sup>1</sup> Households receiving money from aid to families with dependent children program (beginning 2000, temporary assistance for needy families program), supplemental security income program or other public assistance programs.

Source: U.S. Census Bureau, "Table NC1. Means-Tested Noncash Benefits Received by Households, by Selected Household Characteristics, Race and Hispanic Origin, and Poverty Status: 2002"; May 2004; <<http://ferret.bls.census.gov/macro/032003/noncash/loc.htm>> and Current Population Reports, P-60 reports.

Table 532. Program Participation Status of Household—Poverty Status of People: 2003

[In thousands (287,699 represents 287,699,000), except percent. People who lived with someone (a nonrelative or a relative) who received aid. Not every person tallied here received the aid themselves. Excludes members of the Armed Forces except those living off post or with their families on post. Population controls for 2003 based on Census 2000 and an expanded sample of households. Based on Current Population Survey. See text section 1 and Appendix III]

Table 542. Private Pension Plans—Summary by Type of Plan: 1990 to 2000

[712.3 represents 712,300. "Pension plan" is defined by the Employee Retirement Income Security Act (ERISA) as "any plan, fund, or program which was heretofore or is hereafter established or maintained by an employer or an employee organization, or by both, to the extent that such plan (a) provides retirement income to employees, or (b) results in a deferral of income by employees for periods extending to the termination of covered employment or beyond, regardless of the method of calculating the contributions made to the plan, the method of calculating the benefits under the plan, or the method of distributing benefits from the plan." A defined benefit plan provides a definite benefit formula for calculating benefit amounts—such as a flat amount per year of service or a percentage of salary times years of service. A defined contribution plan is a pension plan in which the contributions are made to an individual account for each employee. The retirement benefit is dependent upon the account balance at retirement. The balance depends upon amounts contributed, investment experience, and, in the case of profit sharing plans, amounts which may be allocated to the account due to forfeitures by terminating employees. Employee Stock Ownership Plans (ESOP) and 401(k) plans are included among defined contribution plans. Data are based on Form 5500 series reports filed with the Department of Labor]

Item	Unit	Total				Defined contribution plan				Defined benefit plan			
		1990	1995	1999	2000	1990	1995	1999	2000	1990	1995	1999	2000

<sup>1</sup> Excludes all plans covering only one participant. <sup>2</sup> Includes double counting of workers in more than one plan. <sup>3</sup> Total participants include active participants, vested separated workers, and retirees. <sup>4</sup> Any workers currently in employment covered by a plan and who are earning or retaining credited service under a plan. Includes any nonvested former employees who have not yet incurred breaks in service. <sup>5</sup> Asset amounts shown exclude funds held by life insurance companies under allocated group insurance contracts for payment of retirement benefits. These excluded funds make up roughly 10 to 15 percent of total private fund assets. <sup>6</sup> Includes both employer and employee contributions. <sup>7</sup> Benefits paid directly from trust and premium payments made from plan to insurance carriers. Excludes benefits paid directly by insurance carriers.

Dollar amount formula . . . . .	22	10	41	18	40	11	22	21	50	8
Percent of contribution formula . . . . .	4	2	5	10	4	4	10	2	8	1
Cash balance . . . . .	17	25	7	8	8	23	17	18	9	21
Pension equity . . . . .	1	1	1	(Z)	1	1	1	1	(Z)	1
<b>Requirements for normal retirement:</b> <sup>1</sup>										
No age requirement . . . . .	6	7	5	2	6	6	9	5	7	6
Less than 30 years of service . . . . .	4	6	3	2	3	5	5	4	3	5
30 years of service . . . . .	2	2	3	(S)	3	1	4	1	4	1
At age 55 . . . . .	4	4	5	2	3	5	3	4	6	3
At age 60 . . . . .	8	6	10	10	6	8	13	6	11	6
At age 62 . . . . .	14	8	21	25	18	11	14	14	25	8
At age 65 . . . . .	66	74	53	61	63	67	60	67	48	74
Sum of age plus service <sup>2</sup> . . . . .	2	2	1	(S)	2	1	(S)	2	1	2

S Represents no employees in this category or data do not meet publication criteria. Z Less than 0.5 percent. <sup>1</sup> Normal retirement is defined as the point at which the participant could retire and immediately receive all accrued benefits by virtue of service and earnings, without reduction due to age. If a plan had alternative age and service requirements, the earliest age and associated service were tabulated; if one alternative did not specify an age, it was the requirement tabulated. Some age and service requirements are not shown separately. <sup>2</sup> In some plans, participants must also satisfy a minimum age or service requirement.

65 years old and over . . . . .	656	565	55	27	26.2	25.6	27.9	25.2

<sup>1</sup> Includes other races, not shown separately. <sup>2</sup> Beginning with the 2003 CPS, respondents could choose one or more races. For example, White refers to people who reported White and did not report any other race category; Black refers to people who reported Black and did not report any other race category. The use of this single-race population does not imply that it is the preferred method of presenting or analyzing data. The Census Bureau uses a variety of approaches. Information on people who reported more than one race, such as "White and American Indian and Alaska Native" or "Asian and Black or African American," is available from Census 2000 through American FactFinder. About 2.6 percent of people reported more than one race in Census 2000. <sup>3</sup> Hispanic persons may be of any race.

Source: U.S. Census Bureau, "Table NC8. Pension Plan Coverage of Workers by Selected Characteristics, Gender, Race and Hispanic Origin, and Poverty Status: 2002"; published May 2004; <<http://ferret.bls.census.gov/macro/032003/noncash/toc.htm>>.

Table 546. U.S. Households Owning IRAs: 2001 to 2004

[43.0 represents 43,000,000. Incidence of IRA ownership is based on an annual tracking survey of 3,000 randomly selected, representative U.S. households; see source for details]

Type of IRA	Number (mil.) <sup>1</sup>				Percent of U.S. households			
	2001	2002	2003	2004	2001	2002	2003	2004
Any type of IRA <sup>2</sup>	43.0	43.2	46.1	45.2	39.7	39.5	41.4	40.4
Traditional IRA	35.1	35.7	37.1	36.7	32.4	32.7	33.3	32.8
Roth IRA	12.2	13.2	16.2	14.3	11.3	12.1	14.6	12.8
SIMPLE IRA, SEP-IRA, or SAR-SEP IRA	8.3	8.5	8.3	9.6	7.7	7.8	7.5	8.6

<sup>1</sup> The number of U.S. households owning IRAs in 2001 through 2004 is based on the following U.S. Census Bureau's total U.S. household estimates: 108.2 million in 2001, 109.3 million in 2002, 111.3 million in 2003, and 112.0 million in 2004 (U.S. Bureau of the Census, Current Population Reports, P60-226, August 2004). <sup>2</sup> Excludes ownership of Coverdell Education Savings Accounts, which were referred to as Education IRAs before July 2001.

Table 550. Persons With Work Disability by Selected Characteristics: 2004

[In thousands, except percent (19,016 represents 19,016,000). As of March. Covers civilian noninstitutional population and members of Armed Forces living off post or with their families on post. Persons are classified as having a work disability if they (1) have a health problem or disability which prevents them from working or which limits the kind or amount of work they can do; (2) have a service-connected disability or ever retired or left a job for health reasons; (3) did not work in survey reference week or previous year because of long-term illness or disability; or (4) are under age 65, and are covered by Medicare or receive supplemental security income. Based on Current Population Survey; see text, Section 1, Population, and Appendix III]

Age and participation status in assistance programs	Total <sup>1</sup>	Male	Female	White <sup>2</sup>	Black <sup>3</sup>	Hispanic <sup>4</sup>
Persons with work disability . . . . .	19,016	9,381	9,634	14,354	3,625	1,961
16 to 24 years old . . . . .	1,504	812	692	1,045	374	178
25 to 34 years old . . . . .	2,331	1,138	1,193	1,642	527	304

Residing in subsidized housing . . . . .	3.7	3.0	4.5	2.9	6.7	5.8

<sup>1</sup> Includes other races not shown separately. <sup>2</sup> The 2003 Current Population Survey asked respondents to choose one or more races. White alone refers to people who reported White and did not report any other race category. The use of this single-race population does not imply that it is the preferred method of presenting or analyzing data. The Census Bureau uses a variety of approaches. Information on people who reported more than one race, such as "White and American Indian and Alaska Native" or "Asian and Black or African American," is available from Census 2001 through American FactFinder. About 2.6 percent of people reported more than one race in 2000. <sup>3</sup> Black alone refers to people who reported Black and did not report any other race category. <sup>4</sup> Hispanic persons may be of any race.

**Table 551. Workers' Compensation Payments: 1990 to 2002**

[In billions of dollars, except as indicated (\$3.1 represents \$53,100,000,000). See headnote, Table 552]

Item	1990	1994	1995	1996	1997	1998	1999	2000	2001	2002
Workers covered (mil.)	106	109	113	115	118	122	124	127	127	126
Premium amounts paid <sup>1</sup>	53.1	60.5	57.1	55.3	53.5	53.4	55.7	59.7	64.5	72.9
Private carriers	35.1	34.0	31.6	30.5	29.9	30.4	32.0	35.3	36.8	41.2
State funds	8.0	11.2	10.5	10.2	8.0	8.0	8.1	8.7	11.1	14.3
Federal programs	2.2	2.5	2.6	2.6	3.4	3.5	3.5	3.6	3.8	3.9
Self-insurers	7.9	12.8	12.5	12.1	12.3	11.7	12.1	12.2	12.9	13.5
Annual benefits paid <sup>1</sup>	38.2	43.4	43.5	41.8	42.4	43.9	45.9	48.3	49.8	53.4
By private carriers	22.2	22.7	21.4	20.4	21.6	23.0	24.6	26.5	27.3	29.0
From state funds	8.8	10.6	10.9	7.6	7.3	7.2	7.3	7.5	8.0	9.4
Employers' self-insurance	7.2	11.5	11.2	10.8	10.6	10.2	10.5	10.7	11.5	11.9
Type of benefit:										
Medical/hospitalization	15.1	17.1	16.6	16.5	17.2	17.9	19.2	20.6	22.1	24.2
Compensation payments	21.7	26.3	25.7	24.2	24.3	24.5	25.2	26.2	26.8	28.4
Percent of covered payroll: <sup>1</sup>										
Workers' compensation costs <sup>5, 6</sup>	2.18	2.05	1.82	1.66	1.49	1.38	1.34	1.33	1.40	1.58
Benefits <sup>6</sup>	1.57	1.51	1.38	1.26	1.18	1.11	1.09	1.06	1.08	1.16

<sup>1</sup> Premium and benefit amounts include estimated payments under insurance policy deductible provisions. Deductible benefits are allocated to private carriers and state funds. <sup>2</sup> Years 1990–1996 include federal employer compensation program and that portion of federal black lung benefits program financed from employer contributions. Years 1997–2002 include federal employer compensation program only due to changes in reporting methods. <sup>3</sup> Net cash and medical benefits paid by competitive and exclusive state funds and by federal workers' compensation programs. <sup>4</sup> Cash and medical benefits paid by self-insurers, plus value of medical benefits paid by employers carrying workers' compensation policies that exclude standard medical coverage. <sup>5</sup> Premiums written by private carriers and state funds, and benefits paid by self-insurers increased by 5–10 prior to 1992 and by 11 percent for 1992–2002 for administrative costs. Also includes benefits paid and administrative costs of federal system for government employees. <sup>6</sup> Excludes programs financed from general revenue—black lung benefits and supplemental pensions in some states.

**Table 559. Child Support Enforcement Program—Caseload and Collections: 1990 to 2004**

[For years ending September 30 (12,796 represents 12,796,000). Includes Puerto Rico, Guam, and the Virgin Islands. The child support enforcement program locates absent parents, establishes paternity of children born out-of-wedlock, and establishes and enforces support orders. By law, these services are available to all families that need them. The program is operated at the state and local government level, but 68 percent of administrative costs are paid by the federal government. Child support collected for families not receiving Temporary Assistance for Needy Families (TANF) goes to the family to help it remain self-sufficient. Most of the child support collected on behalf of TANF families goes to federal and state governments to offset TANF payments. Some states pass-through a portion of the CS collections to help families become self-sufficient. Based on data reported by state agencies. Minus sign (-) indicates net outlay]

<sup>1</sup> Passage of the Personal Responsibility and Work Opportunity Reconciliation Act of 1996 (PRWORA) mandated new categories in 1999 and cases were no longer double counted resulting in a 2 million case reduction. <sup>2</sup> Does not include in-hospital paternities. <sup>3</sup> Through 1990, includes modifications to orders. <sup>4</sup> Collections for current assistance cases where the children are: (1) recipients of TANF under title IV-A of the Social Security Act, or (2) entitled to Foster Care (FC) maintenance under title IV-E of the Social Security Act plus collections distributed as assistance reimbursements. Includes medical support and payments to families of current assistance not shown separately. Assistance reimbursements are collections that will be divided between the state and federal governments to reimburse their respective shares of either Title IV-A assistance payments or Title IV-E Foster Care maintenance payments. <sup>5</sup> Prior to fiscal year 2000, incentives were paid out of the federal share of collections and the net federal share was reported.

Table 562. **Selected Characteristics of Food Stamp Households and Participants: 1990 to 2003**

[7,803 represents 7,803,000. For years ending September 30. Data for 1990 exclude Guam and the Virgin Islands. Based on a sample of households from the Food Stamp Quality Control System]

Year	Households				Participants		
	Percent of total				Percent of total		
	Total (1,000)	With children	With elderly <sup>1</sup>	With disabled <sup>2</sup>	Total (1,000)	Children	Elderly <sup>1</sup>
1990 . . . . .	7,803	60.3	18.1	8.9	20,411	49.6	7.7
1995 . . . . .	10,883	59.7	16.0	18.9	26,955	51.5	7.1
1998 . . . . .	8,246	58.3	18.2	24.4	19,969	52.8	8.2
1999 . . . . .	7,670	55.7	20.1	26.5	18,149	51.5	9.4
2000 . . . . .	7,335	53.9	21.0	27.5	17,091	51.3	10.0
2001 . . . . .	7,450	53.6	20.4	27.7	17,297	51.1	9.6
2002 . . . . .	8,201	54.1	18.7	27.0	19,041	51.0	8.9
2003 . . . . .	8,971	54.7	18.0	23.3	20,934	50.8	8.5

<sup>1</sup> Persons 60 years old and over. <sup>2</sup> Beginning 1995, disabled households are defined as households with at least one member under age 65 who received SSI, or at least one member age 18 to 61 who received Social Security, veteran's benefits, or other government benefits as a result of a disability. For 1990, disabled households are defined as households with SSI but no members over age 59. The substantial increase in the percentage of households with a disabled member between 1994 and 1995 is due in part to the change in the definition of disabled households. Using the previous definition, 13.3 percent of households included a disabled person in fiscal year 1995.

## Labor Force, Employment, and Earnings

This section presents statistics on the labor force; its distribution by occupation and industry affiliation; and the supply of, demand for, and conditions of labor. The chief source of these data is the Current Population Survey (CPS) conducted by the U.S. Census Bureau for the Bureau of Labor Statistics (BLS). Comprehensive historical and current data are available from the BLS Internet site <<http://www.bls.gov/cps/>>. These data are published on a current basis in the BLS monthly publication *Employment and Earnings*. Detailed data on the labor force are also available from the Census Bureau's decennial census of population.

**Types of data**—Most statistics in this section are obtained by two methods: household interviews or questionnaires and reports of establishment payroll records. Each method provides data that the other cannot suitably supply. Population characteristics, for example, are readily obtainable only from the household survey, while detailed industrial classifications can be readily derived only from establishment records.

Household data are obtained from a monthly sample survey of the population. The CPS is used to gather data for the calendar week including the 12th of the month and provides current comprehensive data on the labor force (see text, Section 1, Population). The CPS provides information on the work status of the population without duplication since each person is classified as employed, unemployed, or not in the labor force. Employed persons holding more than one job are counted only once, according to the job at which they worked the most hours during the survey week.

Monthly, quarterly, and annual data from the CPS are published by the Bureau of Labor Statistics in *Employment and Earnings*. Data presented include national totals of the number of persons in the civilian labor force by sex, race, Hispanic

or Latino origin, and age; the number employed; hours of work; industry and occupational groups; and the number unemployed, reasons for, and duration of unemployment. Annual data shown in this section are averages of monthly figures for each calendar year, unless otherwise specified. Historical national CPS data are available on the Web site <<http://www.bls.gov/cps/>>.

The CPS also produces annual estimates of employment and unemployment for each state, 50 large metropolitan statistical areas, and selected cities. These estimates are published by BLS in its annual *Geographic Profile of Employment and Unemployment* available at <<http://www.bls.gov/opub/gp/laugp.htm>>. More detailed geographic data (e.g., for counties and cities) are provided by the decennial population censuses.

Data based on establishment records are compiled by BLS and cooperating state agencies as part of an ongoing Current Employment Statistics program. Survey data, gathered monthly from a sample of employers through electronic interviewing (including electronic data interchange, touchtone data entry, and computer-assisted telephone interviewing) or by mail, fax, on magnetic tape or computer diskette, are supplemented by data from other government agencies and adjusted at intervals to data from government social insurance program reports. The estimates exclude self-employed persons, private household workers, unpaid family workers, agricultural workers, and the Armed Forces. In March 2004, reporting establishments employed 4.9 million manufacturing workers (35 percent of the total manufacturing employment at the time), 21.8 million workers in private non-manufacturing industries (23 percent of the total in private nonmanufacturing), and 15.8 million federal, state, and local government employees (72 percent of total government).

The establishment survey counts workers each time they appear on a payroll during the reference period (the payroll period that includes the 12th of the month). Thus, unlike the CPS, a person with two jobs is counted twice. The establishment survey is designed to provide detailed industry information for the nation, states, and metropolitan areas on non-farm wage and salary employment, average weekly hours, and average hourly and weekly earnings. Establishment survey data also are published in *Employment and Earnings*. Historical national data are available on the Web site <<http://www.bls.gov/ces/>>. Historical data for states and metropolitan areas are available on the Web site <<http://www.bls.gov/sae/>>.

In June 2003, BLS completed a comprehensive sample redesign of the establishment survey begun in June 2000, changing from a quota-based sample to a probability-based sample. Also in June 2003, all establishment survey employment, hours, and earnings series were converted from being classified by the 1987 Standard Industrial Classification (SIC) system to being classified by the 2002 North American Industry Classification System (NAICS). The NAICS conversion resulted in major definitional changes to many of the previously published SIC-based series. All establishment survey historical time series were reconstructed as part of the NAICS conversion process and all published series have a NAICS-based history extending back to at least 1990. For total nonfarm industries and other high-level aggregates, NAICS history was reconstructed back to the previously existing start date for the series, 1939 in most cases. More information on the sample redesign, the conversion to NAICS, and other changes to the establishment survey implemented in June 2003 appears in "Revisions to the Current Employment Statistics National Estimates Effective May 2003" in the June 2003 issue of *Employment and Earnings*, as well as the Establishment Data portion of the Explanatory Notes and Estimates of Error section of *Employment and Earnings*.

The completion of the sample redesign and the conversion to NAICS for state and metropolitan area establishment survey

data was implemented in March 2003 with the release of January 2003 estimates. For a discussion of the changes to the state and area establishment survey data, see "Revisions to the Current Employment Statistics State and Area Estimates Effective January 2003" in the March 2003 issue of *Employment and Earnings*.

**Labor force**—According to the CPS definitions, the civilian labor force comprises all civilians in the noninstitutionalized population 16 years and over classified as "employed" or "unemployed" according to the following criteria: Employed civilians comprise (a) all civilians, who, during the reference week, did any work for pay or profit (minimum of an hour's work) or worked 15 hours or more as unpaid workers in a family enterprise and (b) all civilians who were not working but who had jobs or businesses from which they were temporarily absent for noneconomic reasons (illness, weather conditions, vacation, labor-management dispute, etc.) whether they were paid for the time off or were seeking other jobs. Unemployed persons comprise all civilians who had no employment during the reference week, who made specific efforts to find a job within the previous 4 weeks (such as applying directly to an employer or to a public employment service or checking with friends) and who were available for work during that week, except for temporary illness. Persons on layoff from a job and expecting recall also are classified as unemployed. All other civilian persons, 16 years old and over, are classified as "not in the labor force."

Various breaks in the CPS data series have occurred over time due to the introduction of population adjustments and other changes. For details on these breaks in series and the effect that they had on the CPS data, see the section on noncomparability of labor force levels in the Household Data portion of the Explanatory Notes and Estimates of Error section of *Employment and Earnings* available on the site <[http://www.bls.gov/cps/eetech\\_methods.pdf](http://www.bls.gov/cps/eetech_methods.pdf)>.

Beginning in January 2004, the CPS data reflect the introduction of revised population controls. The effect of the revised

population controls on the monthly CPS estimates was to decrease the December 2003 employment level by 409,000 and the unemployment level by 27,000. The updated controls had little or no effect on unemployment rates and other ratios. For additional information on the effects of the revised population controls on estimates from the CPS, see "Adjustments to Household Survey Population Estimates in January 2004" in the February 2004 issue of *Employment and Earnings*, available on the Internet at <http://www.bls.gov/cps/cps04adj.pdf>.

**Hours and earnings**—Average hourly earnings, based on establishment data, are gross earnings (i.e., earnings before payroll deductions) and include overtime premiums; they exclude irregular bonuses and value of payments in kind. Hours are those for which pay was received. Wages and salaries from the CPS consist of total monies received for work performed by an employee during the income year. It includes wages, salaries, commissions, tips, piece-rate payments, and cash bonuses earned before deductions were made for taxes, bonds, union dues, etc. Persons who worked 35 hours or more are classified as working full-time.

**Industry and occupational groups**—Industry data derived from the CPS for 1983–91 utilize the 1980 census industrial classification developed from the 1972 SIC. CPS data from 1971 to 1982 were based on the 1970 census classification system, which was developed from the 1967 SIC. Most of the industry categories were not affected by the change in classification.

The occupational classification system used in the 1980 census and in the CPS for 1983–91, evolved from the 1980 Standard Occupational Classification (SOC) system, first introduced in 1977. Occupational categories used in the 1980 census classification system are so radically different from the 1970 census system used in the CPS through 1982, that their implementation represented a break in historical data series. In cases where data have not yet been converted to the 1980 classifications and still reflect the 1970 classifications (e.g., Table 634), comparisons between the two systems should not be made.

Beginning in January 1992, the occupational and industrial classification systems used in the 1990 census were introduced into the CPS. (These systems were largely based on the 1980 Standard Occupational Classification and the 1987 Standard Industrial Classification Systems, respectively.)

Beginning in 2003, the 2002 Census Bureau occupational and industrial classification systems were introduced into the CPS. These systems were derived from the 2000 Standard Occupational Classification (SOC) and the 2002 North American Industry Classification System (NAICS). The composition of detailed occupational and industrial classifications in the new classification systems was substantially changed from the previous systems in use, as was the structure for aggregating them into broad groups. Consequently, the use of the new classification systems created breaks in existing data series at all levels of aggregation. CPS data using the new classification systems are available beginning 2000. Additional information on the 2002 Census Bureau occupational and industrial classifications systems appears in "Revisions to the Current Population Survey Effective in January 2003" in the February 2003 issue of *Employment and Earnings*, available on the BLS Web site <http://www.bls.gov/cps/rvcps03.pdf>.

For details on the changes over time in the industrial and occupational classification systems used in the CPS, see the section on changes in the occupational and industrial classification systems in the Household Data portion of the Explanatory Notes and Estimates of Error section of *Employment and Earnings* available on the site [http://www.bls.gov/cps/eetech\\_methods.pdf](http://www.bls.gov/cps/eetech_methods.pdf).

Establishments responding to the establishment survey are classified according to the 2002 North American Industrial Classification System (NAICS). Previously they were classified according to the Standard Industrial Classification Manual (SIC). See text, Section 15, Business Enterprise, for information about the SIC manual and NAICS.

**Productivity**—BLS publishes data on productivity as measured by output per hour (labor productivity), output per combined unit of labor and capital input (multifactor productivity), and, for manufacturing industries, output per combined unit of capital, labor, energy, materials, and purchased service inputs. Labor productivity and related indexes are published for the business sector as a whole and its major subsectors: nonfarm business, manufacturing, and nonfinancial corporations, and for over 200 detailed industries. Labor productivity data were converted to a NAICS classification from the SIC classification in September 2003. Data for the business and nonfarm business sectors were reconstructed back to 1947; data for nonfinancial corporations back to 1958; and data for the detailed industry measures and the manufacturing sectors were reconstructed back to 1987. Multifactor productivity and related measures (currently SIC-based) are published for the private business sector and its major subsectors. Productivity indexes that take into account capital, labor, energy, materials, and service inputs are published for the 18 major industry groups that comprise most of the manufacturing sector, the utility services industry group, for 140 3-digit SIC manufacturing industries, and railroad transportation and air transportation. The major sector data are published in the BLS quarterly news release, *Productivity and Costs* and in the annual *Multifactor Productivity Trends* release. Industry productivity measures are updated and published annually in the news releases *Productivity and Costs by Industry*. The latest data are available at the BLS productivity and costs Web site <<http://www.bls.gov/lpc/home.htm>>.

Detailed information on methods, limitations, and data sources appears in the BLS *Handbook of Methods*, BLS Bulletin 2490 (1997), Chapters 10 and 11.

**Unions**—As defined here, unions include traditional labor unions and employee associations similar to labor unions. Data on union membership status provided by BLS are for employed wage and salary workers and relate to their principal job. Earnings by union membership status are usual weekly earnings of full-time wage and salary workers. The information is collected through the Current Population Survey.

**Work stoppages**—Work stoppages include all strikes and lockouts known to BLS that last for at least 1 full day or shift and involve 1,000 or more workers. All stoppages, whether or not authorized by a union, legal or illegal, are counted. Excluded are work slowdowns and instances where employees report to work late or leave early to attend mass meetings or mass rallies.

**Seasonal adjustment**—Many economic statistics reflect a regularly recurring seasonal movement that can be estimated on the basis of past experience. By eliminating that part of the change which can be ascribed to usual seasonal variation (e.g., climate or school openings and closings), it is possible to observe the cyclical and other nonseasonal movements in the series. However, in evaluating deviations from the seasonal pattern—that is, changes in a seasonally adjusted series—it is important to note that seasonal adjustment is merely an approximation based on past experience. Seasonally adjusted estimates have a broader margin of possible error than the original data on which they are based, since they are subject not only to sampling and other errors, but also are affected by the uncertainties of the adjustment process itself.

**Statistical reliability**—For discussion of statistical collection, estimation, sampling procedures, and measures of statistical reliability applicable to Census Bureau and BLS data, see Appendix III.

Table 576. Employment Status of the Civilian Population: 1970 to 2004

[In thousands (137,085 represents 137,085,000), except as indicated. Annual averages of monthly figures. For the civilian noninstitutional population 16 years old and over. Based on Current Population Survey; see text, Section 1, and Appendix III]

Year	Civilian labor force							Not in labor force	
	Civilian noninstitutional population	Employment		Employment/population ratio <sup>1</sup>	Unemployed				
		Total	Percent of population		Number	Percent of labor force	Number	Percent of population	
1970	137,085	82,771	60.4	78,678	57.4	4,093	4.9	54,315	39.6
1980	167,745	106,940	63.8	99,303	59.2	7,637	7.1	60,806	36.2

**Table 604. Employed Civilians by Occupation, Sex, Race, and Hispanic Origin: 2004—Con.**

[For civilian noninstitutional population 16 years old and over (139,252 represents 139,252,000). Annual average of monthly figures. Based on Current Population Survey; see text, Section 1, and Appendix III. Occupational classifications are those used in the 2000 census and are not comparable to those used in the 1990 census]

Occupation	Total employed (1,000)	Percent of total			
		Female	Black <sup>1</sup>	Asian <sup>1</sup>	Hispanic <sup>2</sup>
<b>Construction and extraction occupations—con.</b>					
Carpenters . . . . .	1,764	1.8	5.2	0.8	21.8
Carpet, floor, and tile installers and finishers . . . . .	268	1.9	3.9	1.1	35.6
Cement masons, concrete finishers, and terrazzo workers . . . . .	115	0.2	9.6	0.3	44.0
Construction laborers . . . . .	1,234	3.2	8.9	1.0	38.1
Operating engineers and other construction equipment operators . . . . .	367	1.0	5.2	0.5	11.1
Drywall installers, ceiling tile installers, and tapers . . . . .	213	1.1	6.9	0.4	49.6
Electricians . . . . .	781	2.1	6.5	1.2	13.6
Painters, construction and maintenance . . . . .	719	5.8	7.6	2.1	36.2
Pipelayers, plumbers, pipefitters, and steamfitters . . . . .	635	0.9	8.7	1.0	17.3
Roofers . . . . .	269	1.3	8.2	0.2	39.4
Sheet metal workers . . . . .	152	4.0	4.0	0.9	12.8
Structural iron and steel workers . . . . .	66	0.8	3.4	3.9	9.8
Helpers, construction trades . . . . .	121	5.3	8.9	0.7	36.0
Construction and building inspectors . . . . .	104	12.4	8.5	2.7	11.8
Highway maintenance workers . . . . .	96	2.7	10.6	0.3	14.8
Installation, maintenance, and repair occupations <sup>3</sup> . . . . .	5,069	4.6	7.6	3.0	14.1
First-line supervisors/managers of mechanics, installers, and repairers . . . . .	327	7.1	7.6	0.4	9.3
Computer, automated teller, and office machine repairers . . . . .	369	12.0	11.8	6.7	9.5
Radio and telecommunications equipment installers and repairers . . . . .	235	13.6	14.7	4.1	10.7
Electronic home entertainment equipment installers and repairers . . . . .	68	3.3	6.9	3.1	19.1
Aircraft mechanics and service technicians . . . . .	135	3.4	6.2	2.6	15.5
Automotive body and related repairers . . . . .	169	2.4	4.7	2.1	20.5
Automotive service technicians and mechanics . . . . .	936	1.3	6.1	5.0	19.0
Bus and truck mechanics and diesel engine specialists . . . . .	325	0.6	6.2	1.0	12.2
Heavy vehicle and mobile equipment service technicians and mechanics . . . . .	205	0.3	6.5	2.7	12.2
Heating, air conditioning, and refrigeration mechanics and installers . . . . .	351	1.5	5.3	2.1	13.1
Industrial and refractory machinery mechanics . . . . .	434	3.7	7.3	2.6	10.1
Maintenance and repair workers, general . . . . .	300	4.1	8.6	2.1	17.0
Electrical power-line installers and repairers . . . . .	120	1.1	13.2	1.4	11.9
Telecommunications line installers and repairers . . . . .	142	4.8	12.4	4.2	16.7
<b>Production, transportation, and material occupations . . . . .</b>	<b>17,954</b>	<b>23.0</b>	<b>13.9</b>	<b>3.8</b>	<b>19.2</b>
Production occupations <sup>3</sup> . . . . .	9,462	30.4	11.9	5.3	20.0
First-line supervisors/managers of production and operating workers . . . . .	921	20.1	9.6	4.4	11.6
Electrical, electronics, and electromechanical assemblers . . . . .	226	54.9	12.0	17.6	21.1
Bakers . . . . .	188	45.6	13.0	6.6	28.4
Butchers and other meat, poultry, and fish processing workers . . . . .	304	19.6	12.1	4.1	44.3
Food batchmakers . . . . .	85	52.5	8.7	6.3	20.5
Cutting, punching, and press machine setters, operators, and tenders, metal and plastic . . . . .	139	28.4	8.9	1.5	16.3
Grinding, lapping, polishing, and buffing machine tool setters, operators, and tenders, metal and plastic . . . . .	74	11.0	15.5	1.1	26.2
Machinists . . . . .	445	4.4	6.0	3.8	10.9
Molders and molding machine setters, operators, and tenders, metal and plastic . . . . .	70	24.9	4.2	1.5	18.8
Tool and die makers . . . . .	86	3.0	2.8	0.8	3.7
Welding, soldering, and brazing workers . . . . .	572	5.0	7.9	1.5	23.3
Printing machine operators . . . . .	195	19.3	8.7	2.5	15.2
Laundry and dry-cleaning workers . . . . .	195	60.0	18.5	8.3	27.5
Pressers, textile, garment, and related materials . . . . .	76	68.0	21.8	7.3	47.1
Sewing machine operators . . . . .	281	77.7	13.5	15.2	32.5
Tailors, dressmakers, and sewers . . . . .	101	69.9	7.8	19.7	18.3
Cabinetmakers and bench carpenters . . . . .	86	4.4	1.5	0.8	18.0
Stationary engineers and boiler operators . . . . .	105	1.0	11.4	2.4	9.6
Crushing, grinding, polishing, mixing, and blending workers . . . . .	111	20.1	14.1	1.6	16.6
Cutting workers . . . . .	83	25.6	9.9	2.9	26.4
Inspectors, testers, sorters, samplers, and weighers . . . . .	690	38.0	11.0	5.7	13.3
Medical, dental, and ophthalmic laboratory technicians . . . . .	92	52.0	8.4	12.7	15.4
Packaging and filling machine operators and tenders . . . . .	318	54.9	20.4	3.5	42.4
Painting workers . . . . .	191	13.1	6.1	2.3	24.5
Transportation and material moving occupations <sup>3</sup> . . . . .	8,491	14.7	16.1	2.0	18.3
Supervisors, transportation and material moving workers . . . . .	220	17.8	15.4	4.0	13.3
Aircraft pilots and flight engineers . . . . .	118	5.3	1.7	1.5	3.2
Bus drivers . . . . .	602	48.5	24.4	2.0	12.8
Driver/sales workers and truck drivers . . . . .	3,276	4.5	13.4	1.4	15.8
Taxi drivers and chauffeurs . . . . .	277	12.9	28.7	10.5	12.4
Parking lot attendants . . . . .	77	13.3	15.5	5.5	23.0
Service station attendants . . . . .	120	8.7	8.7	1.7	9.4
Dredge, excavating, and loading machine operators . . . . .	80	0.1	5.4	-	11.6
Industrial truck and tractor operators . . . . .	530	7.5	22.2	0.5	25.0
Cleaners of vehicles and equipment . . . . .	316	11.9	16.2	2.2	29.5
Laborers and freight, stock, and material movers, hand . . . . .	1,797	16.2	17.0	2.2	20.6
Packers and packagers, hand . . . . .	432	60.8	14.1	3.5	44.1
Refuse and recyclable material collectors . . . . .	81	8.2	29.5	0.5	14.4

- Represents or rounds to zero. <sup>1</sup> For persons in this race group only. See footnote 3, Table 577. <sup>2</sup> Persons of Hispanic or Latino ethnicity may be of any race. <sup>3</sup> Includes other occupations, not shown separately.

**Table 606. Employment Projections by Occupation: 2002 and 2012**

[In thousands (365 represents 365,000), except percent and rank. Estimates based on the Current Employment Statistics Program; the Occupational Employment Statistics Survey; and the Current Population Survey. See source for methodological assumptions. Occupations based on the 2000 Standard Occupational Classification system]

Occupation	Employment (1,000)		Change 2002-2012		Quartile rank by 2002 median annual earnings <sup>1</sup>	Most significant source of postsecondary education or training
	2002	2012	(1,000)	Per- cent		
FASTEST GROWING						
Medical assistants . . . . .	365	579	215	59	3	Moderate-term on-the-job training
Network systems and data communications analysts . . . . .	186	292	106	57	1	Bachelor's degree
Physician assistants . . . . .	63	94	31	49	1	Bachelor's degree
Social and human service assistants . . . . .	305	454	149	49	3	Moderate-term on-the-job training
Home health aides . . . . .	580	859	279	48	4	Short-term on-the-job training
Medical records and health information technicians . . . . .	147	216	69	47	3	Associate's degree
Physical therapist aides . . . . .	37	54	17	46	3	Short-term on-the-job training
Computer software engineers, applications . . . . .	394	573	179	46	1	Bachelor's degree
Computer software engineers, systems software . . . . .	281	409	128	45	1	Bachelor's degree
Physical therapist assistants . . . . .	50	73	22	45	2	Associate's degree
Fitness trainers and aerobics instructors . . . . .	183	264	81	44	3	Postsecondary vocational award
Database administrators . . . . .	110	159	49	44	1	Bachelor's degree
Veterinary technologists and technicians . . . . .	53	76	23	44	3	Associate's degree
Hazardous materials removal workers . . . . .	38	54	16	43	2	Moderate-term on-the-job training
Dental hygienists . . . . .	148	212	64	43	1	Associate's degree
Occupational therapist aides . . . . .	8	12	4	43	3	Short-term on-the-job training
Dental assistants . . . . .	266	379	113	42	3	Moderate-term on-the-job training
Personal and home care aides . . . . .	608	854	246	40	4	Short-term on-the-job training Work experience in a related occupation
Self-enrichment education teachers . . . . .	200	281	80	40	2	occupation
Computer systems analysts . . . . .	468	653	184	39	1	Bachelor's degree
Occupational therapist assistants . . . . .	18	26	7	39	2	Associate's degree
Environmental engineers . . . . .	47	65	18	38	1	Bachelor's degree
Postsecondary teachers . . . . .	1,581	2,184	603	38	1	Doctoral degree
Network and computer systems administrators . . . . .	251	345	94	37	1	Bachelor's degree
Environmental science and protection technicians, including health . . . . .	28	38	10	37	2	Associate's degree
Preschool teachers, except special education . . . . .	424	577	153	36	4	Postsecondary vocational award
Computer and information systems managers . . . . .	284	387	103	36	1	Bachelor's or higher degree, plus work experience
LARGEST JOB GROWTH						
Registered nurses . . . . .	2,284	2,908	623	27	1	Associate's degree
Postsecondary teachers . . . . .	1,581	2,184	603	38	1	Doctoral degree
Retail salespersons . . . . .	4,076	4,672	596	15	4	Short-term on-the-job training
Customer service representatives . . . . .	1,894	2,354	460	24	3	Moderate-term on-the-job training
Combined food preparation and serving workers, including fast food . . . . .	1,990	2,444	454	23	4	Short-term on-the-job training
Cashiers, except gaming . . . . .	3,432	3,886	454	13	4	Short-term on-the-job training
Janitors and cleaners, except maids and housekeeping cleaners . . . . .	2,267	2,681	414	18	4	Short-term on-the-job training
General and operations managers . . . . .	2,049	2,425	376	18	1	Bachelor's or higher degree, plus work experience
Waiters and waitresses . . . . .	2,097	2,464	367	18	4	Short-term on-the-job training
Nursing aides, orderlies, and attendants . . . . .	1,375	1,718	343	25	3	Short-term on-the-job training
Truck drivers, heavy and tractor-trailer . . . . .	1,767	2,104	337	19	2	Moderate-term on-the-job training
Receptionists and information clerks . . . . .	1,100	1,425	325	29	3	Short-term on-the-job training
Security guards . . . . .	995	1,313	317	32	4	Short-term on-the-job training
Office clerks, general . . . . .	2,991	3,301	310	10	3	Short-term on-the-job training
Teacher assistants . . . . .	1,277	1,571	294	23	4	Short-term on-the-job training
Sales representatives, wholesale and manufacturing, except technical and scientific products . . . . .	1,459	1,738	279	19	1	Moderate-term on-the-job training
Home health aides . . . . .	580	859	279	48	4	Short-term on-the-job training
Personal and home care aides . . . . .	608	854	246	40	4	Short-term on-the-job training
Truck drivers, light or delivery services . . . . .	1,022	1,259	237	23	3	Short-term on-the-job training
Landscaping and groundskeeping workers . . . . .	1,074	1,311	237	22	3	Short-term on-the-job training
Elementary school teachers, except special education . . . . .	1,467	1,690	223	15	2	Bachelor's degree
Medical assistants . . . . .	365	579	215	59	3	Moderate-term on-the-job training
Maintenance and repair workers, general . . . . .	1,266	1,472	207	16	2	Moderate-term on-the-job training
Accountants and auditors . . . . .	1,055	1,261	205	19	1	Bachelor's degree
Computer systems analysts . . . . .	468	653	184	39	1	Bachelor's degree
Secondary school teachers, except special and vocational education . . . . .	988	1,167	180	18	1	Bachelor's degree
Computer software engineers, applications . . . . .	394	573	179	46	1	Bachelor's degree

<sup>1</sup> Quartile ranks based on the Occupational Employment Statistics annual earnings. 1 = very high (\$41,820 and over), 2 = high (\$27,500 to \$41,780), 3 = low (\$19,710 to \$27,380), and 4 = very low (up to \$19,600). The rankings were based on quartiles using one-fourth of total employment to define each quartile. Earnings are for wage and salary workers.
